**Stir-Frying to the Sky's Edge** Grace Young,2010-05-04 Winner of the 2011 James Beard Foundation Award for International Cooking, this is the authoritative guide to stir-frying: the cooking technique that makes less seem like more, extends small amounts of food to feed many, and makes ingredients their most tender and delicious. The stir-fry is all things: refined, improvisational, adaptable, and inventive. The technique and tradition of stir-frying, which is at once simple yet subtly complex, is as vital today as it has been for hundreds of years—and is the key to quick and tasty meals. In Stir-Frying to the Sky's Edge, award-winning author Grace Young shares more than 100 classic stir-fry recipes that sizzle with heat and pop with flavor, from the great Cantonese stir-fry masters to the culinary customs of Sichuan, Hunan, Shanghai, Beijing, Fujian, Hong Kong, Macau, Taiwan, Singapore, and Malaysia, as well as other countries around the world. With more than eighty stunning full-color photographs, Young's definitive work illustrates the innumerable, easy-to-learn possibilities the technique offers—dry stir-fries, moist stir-fries, clear stir-fries, velvet stir-fries—and weaves the insights of Chinese cooking philosophy into the preparation of beloved dishes as Kung Pao Chicken, Stir-Fried Beef and Broccoli, Chicken Lo Mein with Ginger Mushrooms, and Dry-Fried Sichuan Beans.

**Deep-Sky Companions: The Caldwell Objects** Stephen James O'Meara,2016-09-26 The Caldwell Catalogue, compiled by the late Sir Patrick Moore (1923–2012), has delighted amateur astronomers worldwide since its publication in 1995. Twenty years on, Stephen James O'Meara revisits his guide to these 109 deep-sky delights, breathing new life into them and the 20 additional observing targets included as an appendix. This second edition retains O'Meara's detailed visual descriptions and sketches, accompanied by stunning new images taken by amateur photographer Mario Motta and observations by Magda Streicher. The astrophysical descriptions have been updated to account for the many advances in our understanding of the objects, not least due to an armada of space-borne observatories and the new technologies used in large ground-based telescopes. Ideal for observers who have completed the Messier objects and are looking for their next challenge, Deep-Sky Companions: The Caldwell Objects is a fitting tribute from a renowned visual observer to one of astronomy's most famous personalities.

*Coastal Dawn* Andrew Bird,2012-10-24 In 1940, the defense of Great Britain rested with a handful of volunteer aircrew, Churchill's "few". Overshadowed in later folklore by the more famous Spitfire and Hurricane pilots, there were other pilots, observers and air gunners — just as courageous — flying the Bristol Blenheim MKIV-F. The future of the country and arguably that of the free world depended also on their skill, morale and sacrifice. Remarkably little has been chronicled of these men and their aircraft — the "Trade Protection" squadrons formed by Hugh Dowding — allotted to 11 Group in October 1939. The aircraft's range and endurance made it suitable for defense of coastal shipping against attack on the southern and eastern shores of Britain, and for operations further afield. Indeed during bitter fighting casualties among Numbers 235, 236, 248 and 254 Squadron Blenheims were high on operations over Norway, Holland, France, Dunkirk and then the Battle of Britain where the Blenheims were completely outclassed by Messerschmitt 109 and 110 fighters and fell easy victims, scythed from the sky. But the record of the aircraft and their crew was an immensely proud one. Drawing on contemporary diaries, periodicals, letters, logbooks, memoirs and interviews with survivors, lauded historian Andy Bird reassesses the vital role they played and repositions it in history. In doing so, he justifiably embraces the heroes we have left behind.
