Digital Entertainment Superguide , Audio and video content is all around us. And these days much of it comes not from TV cables, satellite dishes, and radio antennas, but from our digital devices around the house, streaming over the Internet and local networks. And that's why we created the Digital Entertainment Superguide, a primer with everything you need to know to get started. This book walks you through how to set up your home network and choose the right hardware—set-top boxes, smart TVs, media center computers, streaming speakers, remote controls, and more—for your needs. Like to watch TV shows and movies but not sure where to find what? We've got you covered with a guide to streaming video sources for your TV or mobile devices. We don't leave music lovers out either, as we help you choose the best streaming audio service. Do you want Mog, Rdio, Rhapsody, Slacker, or Spotify? How much does each service cost? Which sounds best? We answer all those questions and more in the pages that follow. Finally, if you're wondering how to move audio and video around the house—stream music wirelessly from an iPhone to an AirPlay speaker in the living room or send video from a computer to your beautiful wall-mounted HDTV—you've come to the right place. We'll even show you how to use your smartphone or tablet to control it all. So read on, and let the fun begin!

Smart TV Security Benjamin Michéle, 2015-11-27 This book discusses the emerging topic of Smart TV security, including its implications on consumer privacy. Semantic Methods for Knowledge Management and Communication Radosław Katarzyniak Katarzyniak, Tzu-Fu Chiu, Chao-Fu Hong, Ngoc-Thanh Nguyen, 2011-08-04 The book consists of 31 chapters in which the authors deal with multiple aspects of modeling, utilization and implementation of semantic methods for knowledge management and communication in the context of human centered computing. It is assumed that the modern human centered computing requires the intensive application of these methods as well as effective integration with multiple techniques of computational collective intelligence. The book is organized in four parts devoted to the presentation of utilization of knowledge processing in agent and multiagent systems, application of computational collective intelligence to knowledge management, models for collectives of intelligent agents, and models and environments tailored directly to human-centered computing. All chapters in the book discuss theoretical and practical issues related to various models and aspects of computational techniques for semantic methods, which are currently studied and developed in many academic and industry centers over the world. The editors hope that the book can be useful for graduate and PhD students of computer science, as well as for mature academics, researchers and practitioners interested in developing of modern methods for representation, processing and distribution of knowledge in the context of human centered computing and by means of computer based information systems. It is the hope of the editors that readers of this volume can find in all chosen chapters many inspiring

ideas and influential practical examples, as well as use them in their current and future work.

2015 Worldwide Supply Chain Analysis: Notebook PC, Tablet, LCD TV and LCD TV Panel MIC Research Team,2016-08-01 Global notebook PC market has been challenged since 2012, and the prevalence of smart handheld devices continues to put a dent in the notebook PC market in 2015. Meanwhile, after four years of rapid growth, development of the worldwide tablet market slowed down in 2014, with mature markets of the United States and Western Europe reaching a saturation point. By contrast, LCD TV shipments managed to grow slightly in 2014, thanks to the 2014 FIFA World Cup. This book presents an overview of component supply chains of notebook PC, tablet, LCD TV and LCD TV panel, examines product development trends, and analyzes the strategies of branded vendors as well as contract makers.

Cross-Cultural Design P.L.Patrick Rau,2014-06-02 This volume constitutes the refereed proceedings of the 6th International Conference on Cross-Cultural Design, CCD 2014, held as part of the 16th International Conference on Human-Computer Interaction, HCI International 2014, held in Heraklion, Crete, Greece, jointly with 13 other thematically similar conferences. The total of 1476 papers and 220 posters presented at the HCII 2014 conferences was carefully reviewed and selected from numerous submissions. The papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. They thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The 76 papers included in this volume deal with the following topics: cross-cultural product and service design; cross-cultural issues in interaction; social aspects and implications of cross-cultural design; cross-cultural issues in e-commerce, marketing and branding; cross-cultural design for knowledge sharing and learning; cross-cultural design for the smart city and cross-cultural design for creativity.

The Internet of Things Michael Miller,2015 The old Internet typically connected personal computers. But a radically new Internet is emerging. Some call it an Internet of Things (IoT) or Internet of Everything (IoE). The IoT won't just connect people: it'll connect smart homes, appliances, cars, aircraft (a.k.a. drones)... offices, factories, cities... the world. By some estimates, the IoE will explode into a \$19 trillion market in just a few years. If that happens... when that happens... it will transform your life. ¿ You need to know what's coming. But, until now, most guides to the Internet of Everything have been written for technical experts. Now, the world's #1 author of beginning technology books has written the perfect introduction for every consumer and citizen. In *The Internet of Things*, Michael Miller reveals how a new generation of autonomously connected smart devices is emerging, and how it will enable people and devices to do more things, more intelligently, and more rapidly. ¿ Miller demystifies every type of smart device, both current and future. Each chapter ends with a special ...and You section, offering up-to-the-minute advice for using today's IoE technologies or preparing for tomorrow's. ¿ You'll also discover the potential downsides and risks associated with intelligent, automatic interaction. When all your devices can communicate with each other (and with the companies that sell and monitor them), how private is your private life? Do the benefits outweigh the risks? And what does a connected world do when the connections suddenly go down? Packed with scenarios and insider interviews,*The Internet of Things* makes our future utterly, vividly real.
