**Andrew McAfee,Erik Brynjolfsson**

**Snapchat** Viktoria Schoja, 2016-03-14 Snapchat is a photo messaging application which was developed in 2011 by Evan Spiegel and Bobby Murphy. It is a new way to take pictures or video adding text or drawings over a mobile phone and send them to friends or family with specifications on how long the photo will be available for viewing. User can set a time of 1 to 10 seconds for the viewing. The timer starts to count down the predefined seconds when the recipient opens the message. After the time is up the picture is deleted from the device and cannot be shown to the user anymore. Once the user downloads the app on his phone it is essential to register with username and set a password. Subsequently the app access the contact list on users phone to load friends. Additionally users can add other contacts beyond the existing one manually. Snapchat is a new way of sharing moments with friends on iPhone and Android. The company compares its product with a phone call, where a record of the communication persists, however the actual content of the communication does not. Even though Snapchat launched many products, there is one key feature that they all share, deletion. The app's mascot, which is also used as logo, is called Ghostface Chillah, a name Brown derived from Ghostface Killah of the hip hop group Wu-Tang Clan. Snapchat, Inc. is a privately held, venture capital backed company, headquartered in Venice, California, USA. The application was first launched in July 2011 as a result of Evan Spiegel's projects at Stanford University under the name Picaboo. However, the idea of disappearing pictures did not convince other project participants. In July 2011 Picaboo was renamed and re-launched into Snapchat. The former team, Evan Spiegel, Reggie Brown and Bobby Murphy, focused on usability and technical aspects rather than branding efforts at the beginning in order to reach as many user as possible [...].

*Mobile Tech Report 2015* John R. Roberts, 2015-02-23 If you read technology news, you'll notice it's not just a story of amazing new product introductions, or even that plus copycat product introductions. All the usual aspects of business are there: fierce competition, new contenders, old survivors, great ideas but business failures, mediocre ideas that somehow seem to succeed and prosper. As a reporter, commentator and blogger on mobile technology, I've collected what happened in the industry in 2014 and make predictions on what will and won't happen in 2015. You can read what did happen in the mobile technology in 2014. Often I deliver a comment with the news item and usually there is a link to the web page of the original announcement. This way you can dive into any detail level you desire, read my news feed for the overview or follow the related web link to the longer article. History is moving so fast now that it is all recorded electronically, but I'm surprised no one else has collected it and presented it for consideration. Here is 2013 from the mobile technology industry for your consideration along with my own observations and opinions about where things are headed. It's often overlooked that the technology industry is an industry. By that I mean its main concerns are profit and growth. As consumers we love the new products and unique abilities we are gaining from

technology, but it is a business akin to any other, trying to seduce us to pry money out of our wallets. So I cover the horse race aspect of the business, who's up, who's down. Is that changing? Is that likely to change? The longer implications of what the technology industry is doing are vast and social. We are moving to an always on, always connected society where we can communicate with someone instantly and find an answer to any question quickly. The entire database of human knowledge is now available in the palm of your hand whenever you desire it. Everything is there, the good, the bad, right and wrong, hate and love, music and noise. We are obsessed with technology, not in and of itself, but as a means to an end. Technology is the means to satisfy our curiosity or even our desire for self-expression. We are taking photos machine gun-style with our smartphones and choose the few to share. As humans we are gathering ever more data about ourselves and sharing more about ourselves than we probably thought possible. Bill Gates was once asked why the computer industry had generated so much improvement in its products over a relatively few years. He gave some boring answer about Moore's Law, but the real answer is that computers are in their teenage years. They are growing and growing. They will not always do so. So too the technology industry is in a state of rapid change. I see the shift to smaller devices as a new paradigm, smashing some businesses and growing others into giants. Their stories are here in the news. In short here are predictions for what won't and will happen in 2015 for the mobile technology industry, breakdowns of marketshare figures on the horse race aspect of the business, chapters on Apple, Samsung, Google, Microsoft, Nokia, Blackberry, Amazon, Yahoo, news about social media giants Facebook, Twitter, Google+, LinkedIn, Foursquare, SnapChat and the carriers themselves Verizon, AT&T, Sprint and T-Mobile. You can also review my 2014 mobile predictions and see my track record on predictions. Finally there are some essays on how all this mobile tech is figuring into our lives. I've divided the news into the subjects it covers, but

also put in the appendix all the news as it came out in chronological ordering. You can read the firehose of events in the appendix, or just read about one topic at a time in the earlier chapters.

**Video Marketing Made Simple For Business Owners** Raymond Wayne, 2020-09-18 Video Marketing is literally on fire! Embrace the Power and Potential of Video Marketing And use this medium to catapult your web business to the next level. Check out on “ Video Marketing Made Simple For Business Owners ” Finally, you have this once in lifetime opportunity to get your hands on the video marketing tools & Strategies that are generating million dollar revenues . Businesses invest a lot of time determining who their target demographic is, and for good reason. When a business knows which demographic is buying and using their product, it’s going to be easier to market to that demographic. Middle-aged women are going to respond to ads differently than millennials; and what one group finds engaging and interesting, another may not. So it’s important for businesses to understand what demographic they are targeting so they get the marketing just right for them. But, businesses don’t have to go to such trouble when they’re using video marketing because video marketing reaches every demographic and is interesting to every demographic. And this is because men and women, and people of every age, love video. As long as it’s interesting and creative, people will like a video regardless of their background or history. This can be a bonus for businesses that know who their demographic is, simply because more people will share it and like it, even if they don’t make up part of the business’ demographic. But it’s also especially good news for businesses with a shifting demographic, or for those that don’t know how makes up their demographic. That happens sometimes when a business changes directions or changes their product or service slightly, and then they have to start back at square one with their marketing efforts. But when a business has already created videos as part of their marketing plan, they don’t have to change a thing because

those videos will already be suitable for every demographic. Imagine one type of marketing that appeals to every single demographic. It seems too good to be true, but it's not. That type of marketing is video marketing, and reaching every demographic is just one very good reason why every business should be investing in it.

*Machine, Platform, Crowd: Harnessing Our Digital Future* Andrew McAfee, Erik Brynjolfsson, 2017-06-27 "A clear and crisply written account of machine intelligence, big data and the sharing economy. But McAfee and Brynjolfsson also wisely acknowledge the limitations of their futurology and avoid over-simplification." —Financial Times In *The Second Machine Age*, Andrew McAfee and Erik Brynjolfsson predicted some of the far-reaching effects of digital technologies on our lives and businesses. Now they've written a guide to help readers make the most of our collective future. *Machine | Platform | Crowd* outlines the opportunities and challenges inherent in the science fiction technologies that have come to life in recent years, like self-driving cars and 3D printers, online platforms for renting outfits and scheduling workouts, or crowd-sourced medical research and financial instruments.

Digital Wars Charles Arthur, 2014-05-03 The first time that Apple, Google and Microsoft found themselves sharing the same digital space was 1998. They were radically different companies and they would subsequently fight a series of pitched battles for control of different parts of the digital landscape. They could not know of the battles to come. But they would be world-changing. This new edition of Digital Wars looks at each of these battles in turn. Accessible and comprehensive, it analyses the very different cultures of the three companies and assesses exactly who are the victors on each front. Thoroughly updated to include information on the latest developments and rising competitors Samsung, it also include a completely new chapter on how China moved from being the assembly plant for music players and smartphones, to becoming the world's biggest smartphone

business.

Snap and Share Adam Furgang, 2014-12-15 They say a picture is worth a thousand words. If that's true, then what are a thousand pictures worth? Today, with the use of mobile smartphones and similar devices containing miniaturized cameras, snapping and sharing photos has never been easier—or more commonplace. Playing around with photo and video apps like Instagram, Vine, Flickr, and Snapchat has become a natural part of teenage life. But along with the fun comes responsibility. This volume guides readers through simple steps for using photo and video apps and offers ideas for unleashing creativity. It also addresses the potential risks of using these apps, such as cyberbullying, and suggests a code of conduct that should be enforced whenever anyone snaps and shares.

*Counseling and Coaching in Times of Crisis and Transition* Laura Nota, Salvatore Soresi, 2017-08-10 Counseling and Coaching in Times of Crisis and Transition explores how threats and challenges caused by rapid social and technological changes require counselors and coaches to rethink their usual ways of working, and, in some cases, even abandon their traditional theoretical anchors. The authors of this forward-thinking book argue that practitioners who aim to help others strengthen their resources can no longer afford to wait for clients in their offices or offer them protected, objective and neutral professional relationships. Contributors from around the world argue that there is a real need for new counseling and coaching actions to be delivered in different contexts: counselors and coaches should be able to use heterogeneous languages and interventions, as well as numerous relationship modalities and activities in order to streamline the support that they offer to people in sectors as diverse as health and well-being, life and career design, prevention and community inclusion, work inclusion, and schools. The book provides an evidence-based framework, with numerous counseling and coaching examples that are capable of promoting people's strengths, whether this be face-to-

face, in groups, or online. This book will appeal to academics, researchers and postgraduate students in the fields of counseling and coaching, as well as those with an interest in psychological, social and educational science. It should also be essential reading for practitioners and policymakers in a diverse range of contexts, including those working on intervention and support for vulnerable people, non-traditional and disadvantaged students, and people with disabilities.

*Online around the World* Laura M. Steckman, Marilyn J. Andrews, 2017-05-24 Covering more than 80 countries around the world, this book provides a compelling, contemporary snapshot of how people in other countries are using the Internet, social media, and mobile apps. How do people in other countries use the social media platform Facebook differently than Americans do? What topics are discussed on the largest online forum—one in Indonesia, with more than seven million registered users? Why does Mongolia rate in the top-ten countries worldwide for peak Internet speeds? Readers of *Online around the World: A Geographic Encyclopedia of the Internet, Social Media, and Mobile Apps* will discover the answers to these questions and learn about people's Internet and social media preferences on six continents—outside of the online community of users within the United States. The book begins with an overview of the Internet, social media platforms, and mobile apps that chronologically examines the development of technological innovations that have made the Internet

what it is today. The country-specific entries that follow the overview provide demographic information and describe specific events influenced by online communications, allowing readers to better appreciate the incredible power of online interactions across otherwise-unconnected individuals and the realities and peculiarities of how people communicate in today's fast-paced, globalized, and high-technology environment. This encyclopedia presents social media and the Internet in new light, identifying how the use of language and the specific application of human culture impacts emerging technologies and communications, dramatically affecting everything from politics to social activism, education, and censorship.
