How to Cope with Snoring - Easy Ways to Cure and Manage Sleep Apnea John Davidson,Deep J. Singh,2013-05-15 How to Cope with Snoring Easy Ways To Cure and Manage Sleep Apnea Table of Contents Introduction – Knowing More about Snoring Causes of Snoring How to Prevent Snoring Possible Causes of Sleep Apnea Cures for Sleep Apnea Snoring – When to See A Doctor Effects of Snoring On a Relationship Conclusion Introduction – Knowing More about Snoring Ask anybody who has had a sleepless night for a couple of days this question – How does he feel? He's going to answer you into a completely irritated manner that he's totally exhausted and he really does not have any time to pay any attention to your fool statements or answer your futile questions. That sort of short tempered and moody unpredictability is one of the most easily recognizable side effects of somebody who has not managed to get his full quota of eight hours of uninterrupted pleasant sleep. And one of the causes of these sleepless nights is the continuous sound of someone in the vicinity or in the room, happily asleep and snoring. Just imagine that it is 2 o'clock in the morning and you are staring at the ceiling, or at the alarm clock. You have tried stuffing your ears with cotton and even your pillow cannot muffle the sound of snoring reverberating through the room. Did you know that 30% of the people in their 30's and 40's out there snore? 59% of the people when asked admitted that their partners snored. 59% of the partners immediately replied indignantly that they did not snore! But it is true; and snoring is one of the reasons why so many people suffer from sleepless nights and doctors are looking for ways and means in which the snoring sound can be moderated or stopped.

**Snoring and Sleep Apnea - Easy Ways To Stop Snoring** Frank Fletcher, 2020-12-07 Just about everyone snores occasionally, and it's usually not something to worry about. Snoring happens when you can't move air freely through your nose and throat during sleep. This makes the surrounding tissues vibrate, which produces the familiar snoring sound. People who snore often have too much throat and nasal tissue or floppy tissue that is more prone to vibrate. The position of your tongue can also get in the way of smooth breathing. If you regularly snore at night it can disrupt the quality of your sleep-leading to daytime fatigue, irritability, and increased health problems. And if your snoring keeps your partner awake, it can create major relationship problems too. Thankfully, sleeping in separate bedrooms isn't the only remedy for snoring. There are many effective solutions that can help both you and your partner sleep better at night and overcome the relationship problems caused when one person snores. Since people snore for different reasons, it's important to understand the causes behind your snoring. Once you understand why you snore, you can find the right solutions to a quieter, deeper sleep-for both you and your partner.
