Radium of the Word Craig Dworkin,2020-12-09 With fresh insight and contemporary relevance, Radium of the Word argues that a study of the form of language yields meanings otherwise inaccessible through ordinary reading strategies. Attending to the forms of words rather than to their denotations, Craig Dworkin traces hidden networks across the surface of texts, examining how typography, and even individual letters and marks of punctuation, can reveal patterns that are significant without being symbolic—fully meaningful without communicating any preordained message. Radium of the Word takes its title from Mina Loy's poem for Gertrude Stein, which hails her as the Madame "Curie / of the laboratory / of vocabulary." In this spirit, Dworkin considers prose as a dynamic literary form, characterized by experimentation. Dworkin draws on examples from writers as diverse as Lyn Hejinian, William Faulkner, and Joseph Roth. He takes up the status of the proper name in Modernism, with examples from Stein, Loy, and Guillaume Apollinaire, and he offers in-depth analyses of individual authors from the counter-canon of the avant-garde, including P. Inman, Russell Atkins, N. H. Pritchard, and Andy Warhol. The result is an inspiring intervention in contemporary poetics.

California Forests and Woodlands Verna R. Johnston,1996-06-16 From majestic Redwoods to ancient Western Bristlecone Pines, California's trees have long inspired artists, poets, naturalists—and real estate developers. Verna Johnston's splendid book, illustrated with her superb color photographs and Carla Simmons's detailed black-and-white drawings, now offers an unparalleled view of the Golden State's world-renowned forests and woodlands. In clear, vivid prose, Johnston introduces each of the state's dominant forest types. She describes the unique characteristics of the trees and the interrelationships of the plants and animals living among them, and she analyzes how fire, flood, fungi, weather, soil, and humans have affected the forest ecology. The world of forest and woodland animals comes alive in these pages—the mating games, predation patterns, communal life, and the microscopic environment of invertebrates and fungi are all here. Johnston also presents a sobering view of the environmental hazards that threaten the state's trees: acid snow, ozone, blister rust, over-logging. Noting the interconnectedness of the diverse life forms within tree regions, she suggests possible answers to the problems currently plaguing these areas. Enriched by the observations of early naturalists and Johnston's many years of fieldwork, this is a book that will be welcomed by all who care about California's treasured forests and woodlands.

Edward Abbey James M. Cahalan,2022-08-09 "The best biography ever about Ed. Cahalan's meticulous research and thoughtful interviews have made this book the authoritative source for Abbey scholars and fans alike." —Doug Peacock, author, environmentalist activist and explorer, and the inspiration for Hayduke in The Monkey Wrench Gang He was a hero to environmentalists and the patron saint of monkeywrenchers, a man in love with desert solitude. A supposed misogynist, ornery and contentious, he nevertheless counted women among his closest friends and admirers. He attracted a cult following, but he was often uncomfortable with it. He was a writer who wandered far from Home without really starting out there. James Cahalan has written a definitive biography of a contemporary literary icon whose life was a web of contradictions. Edward Abbey: A Life sets the record straight on Cactus Ed, giving readers a fuller, more human Abbey than most have ever known. It separates fact from fiction, showing that much of the myth surrounding Abbey—such as his birth in Home, Pennsylvania, and later residence in Oracle, Arizona—was self-created and self-perpetuated. It also shows that Abbey cultivated a persona both in his books and as a public speaker that contradicted his true nature: publicly racy and sardonic, he was privately reserved and somber. Cahalan studied all of Abbey's works and private papers and interviewed many people who knew him—including the models for characters in The Brave Cowboy and The Monkey Wrench Gang—to create the most complete picture to date of the writer's life. He examines Abbey's childhood roots in the East and his love affair with the West, his personal relationships and

tempestuous marriages, and his myriad jobs in continually shifting locations—including sixteen national parks and forests. He also explores Abbey's writing process, his broad intellectual interests, and the philosophical roots of his politics. For Abbey fans who assume that his honest novel, *The Fool's Progress*, was factual or that his public statements were entirely off the cuff, Cahalan's evenhanded treatment will be an eye-opener. More than a biography, *Edward Abbey: A Life* is a corrective that shows that he was neither simply a countercultural cowboy hero nor an unprincipled troublemaker, but instead a complex and multifaceted person whose legacy has only begun to be appreciated. The book contains 30 photographs, capturing scenes ranging from Abbey's childhood to his burial site.

Interfaces and Interface Conditions Andreas Späth,2007-01-01 The volume contains articles that focus on the interface between linguistic and conceptual knowledge. The issues addressed in the volume include the preconditions of every level of the language system that are required for the transformation of linguistic information into conceptual representations. In accordance with Chomsky's Minimalist language model, the language system is embedded into the performative systems where language is a part of the cognitive competence of human beings, i.e. system of articulation and perception (A/P) and the conceptual-intentional system (C/I). During the formation of linguistic structures, every performative system obtains well-formed representations as its input information. The articles of the volume show how interface conditions determine the linguistic representations on each level of the linguistic system. Interface conditions result in requirements for the ordering of linguistic elements. The syntactic transformation achieves a point, where the linguistic structure formation branches to two distinct representational levels. Both levels deliver instructions for the systems of performance A/P and C/I. Linearization takes place on the syntactic surface of a sentence. The linearization of linguistic elements is manifest at the derivational point of Spell-out and also on the level of the phonological form (PF). This means that on the one hand, linearization is relevant to the phonetic aspect of linguistic expressions, and on the other hand, the interpretation of linguistic utterances is based on hierarchical structures. On the level of Logical Form (LF) all operations apply which don't have any influence on the linear order in overt syntax. In addition they affect the generation of hierarchical structures. The structure obtained on LF is the representational format of the semantic form of a sentence.
