The Executive Function Guidebook Roberta Strosnider,Valerie Saxton Sharpe,2019-03-22 Teach some of the most important skills your students will ever need! Please, try harder. Please, pay attention. Please, behave. Most students want to do what it takes to succeed, but sometimes that's easier said than done. Executive function skills such as self-regulation, focus, planning, and time management must be taught, and they take practice. When you work on them in class, you give students the tools they need to not only learn but also monitor themselves. Teaching executive function skills in your classroom doesn't have to be difficult. This unique guidebook—designed with busy teachers in mind—introduces a flexible seven-step model that incorporates Universal Design for Learning (UDL) principles and the use of metacognition. Features include Descriptions of each skill and its impact on learning Examples of instructional steps to assist students as they set goals and work to achieve success. Strategies coded by competency and age/grade level Authentic snapshots and think about sections Templates for personalized goal-setting, data collection, and success plans Accompanying strategy cards Whether you teach kindergarten, high school, or anything in between, you can make executive function training part of your teaching. As students' proficiencies improve, you will see their confidence and capability increase—setting the stage for their success in school and in life.

Innovations in Mechatronics Engineering José Machado,Filomena Soares,Justyna Trojanowska,Sahin Yildirim,2021-06-15 This book covers a variety of topics in the field of mechatronics engineering, with a special focus on innovative control and automation concepts for applications in a wide range of field, including industrial production, medicine and rehabilitation, education and transport. Based on a set of papers presented at the 1st International Conference “Innovation in Engineering”, ICIE, held in Guimarães, Portugal, on June 28-30, 2021, the chapters report on cutting-edge control algorithms for mobile robots and robot manipulators, innovative industrial monitoring strategies for industrial process, improved production systems for smart manufacturing, and discusses important issues related to user experience, training and education, as well as national developments in

the field of mechatronics . This volume, which belongs to a three-volume set, provides engineering researchers and professionals with a timely overview and extensive information on trends and technologies behind the future developments of mechatronics systems in the era of Industry 4.0.

Special and Gifted Education: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources,2016-04-25 Diverse learners with exceptional needs require a specialized curriculum that will help them to develop socially and intellectually in a way that traditional pedagogical practice is unable to fulfill. As educational technologies and theoretical approaches to learning continue to advance, so do the opportunities for exceptional children. *Special and Gifted Education: Concepts, Methodologies, Tools, and Applications* is an exhaustive compilation of emerging research, theoretical concepts, and real-world examples of the ways in which the education of special needs and exceptional children is evolving. Emphasizing pedagogical innovation and new ways of looking at contemporary educational practice, this multi-volume reference work is ideal for inclusion in academic libraries for use by pre-service and in-service teachers, graduate-level students, researchers, and educational software designers and developers.

Recent Advances in Assistive Technologies to Support Children with Developmental Disorders Silton, Nava R.,2015-05-31 The greatest advantage of modern technology is its ability to improve the lives of all. In particular, new technologies have the potential to greatly mitigate cognitive, motor, and social impairments stemming from genetic or environmental factors. *Recent Advances in Assistive Technologies to Support Children with Developmental Disorders* raises awareness of disabled children and what can be done to help them grow and develop alongside their peers. Bringing together personal experiences with academic investigation, this book is an essential reference for doctors, pediatricians, pre- and primary school educators, and scientists working to enhance the impact assistive technologies have on the youngest members of society.

Advances in Usability, User Experience, Wearable and Assistive Technology Tareq Ahram,Christianne Falcão,2020-07-01 This book addresses emerging issues in usability, interface design, human-computer interaction, user experience and assistive technology. It highlights research aimed at understanding human interactions with products, services and systems and focuses on finding effective approaches for improving the user experience. It also discusses key issues in designing and providing assistive devices and services for individuals with disabilities or impairment, offering them support with mobility, communication, positioning, environmental control and daily living. The book covers modeling as well as innovative design concepts, with a special emphasis on user-centered design, and design for specific populations, particularly the elderly. Further topics include virtual reality, digital environments, gaming, heuristic evaluation and forms of device interface feedback (e.g. visual and haptic). Based on the AHFE 2020 Virtual Conference on Usability and User Experience, the AHFE 2020 Virtual Conference on Human Factors and Assistive Technology, the AHFE Virtual Conference on Human Factors and Wearable Technologies, and the AHFE 2020 Virtual Conference on Virtual Environments and Game Design, held on July 16–20, 2020, it provides academics and professionals with an extensive source of information and a timely guide to tools, applications and future challenges in these fields.

Special Education in Contemporary Society Richard M. Gargiulo,Emily C. Bouck,2019-12-05 Special Education in Contemporary

Society: An Introduction to Exceptionality, Seventh Edition offers a comprehensive, engaging, and readable introduction to the dynamic field of special education. Grounded in research and updated to reflect the most current thinking and standards of the field, this book provides readers with the knowledge, skills, attitudes, and beliefs that are crucial to constructing learning environments that allow all students to reach their full potential. Authors Richard M. Gargiulo and Emily C. Bouck encourage a deep awareness and understanding of the “human” side of special education, providing readers with a look into the lives of exceptional students and their families, as well as the teachers that work with exceptional persons throughout their lives.

Assistive Technology Emily C. Bouck, 2015-12-31 Succinct, yet comprehensive, Assistive Technology is designed to help educators better understand assistive technology and how it can support students with disabilities from early childhood through the transition into adulthood. This practical book is organized around the purpose of technology and the support it can provide rather than a student’s disability categorization. Grounded in research and filled with engaging case studies and activities, author Emily C. Bouck offers an unbiased depiction of the advantages and limitations of technology. Readers are exposed to a full range of assistive technology including up-to-date coverage of low- and high-technology, as well as free and for-purchase options that can be used to support students with disabilities.

Interdisciplinary Approaches to Altering Neurodevelopmental Disorders Wadhwa, Tanu, Kakkar, Deepti, 2020-03-13 Disorder-assistive and neurotechnological devices are experiencing a boom in the global market. Mounting evidence suggests that approaches based on several different domains should move towards the goal of early diagnosis of individuals affected by neurodevelopmental disorders. Using an interdisciplinary and collaborative approach in diagnosis and support can resolve many hurdles such as lack of awareness, transport, and financial burdens by being made available to individuals at the onset of symptoms. *Interdisciplinary Approaches to Altering Neurodevelopmental Disorders* is a pivotal reference source that explores neurodevelopmental disorders and a diverse array of diagnostic tools and therapies assisted by neurotechnological devices. While covering a wide range of topics including individual-centered design, artificial intelligence, and multifaceted therapies, this book is ideally designed for neuroscientists, medical practitioners, clinical psychologists, special educators, counselors, therapists, researchers, academicians, and students.

Disability Informatics and Web Accessibility for Motor Limitations Kouroupetroglou, Georgios, 2013-08-31 As technology becomes an increasingly vital aspect of modern social interaction, the field of disability informatics and web accessibility has made significant progress in consolidating theoretical approaches and exploring new application domains for those with motor and cognitive disabilities. *Disability Informatics and Web Accessibility for Motor Limitations* explores the principles, methods, and advanced technological solutions in the use of assistive technologies to enable users with motor limitations. This book is essential for academia, industry, and various professionals in fields such as web application designers, rehabilitation scientists, ergonomists, and teachers in inclusive and special education. This publication is integrated with its pair book *Assistive Technologies and Computer Access for Motor Disabilities*.

Quantum Secrets of Creating a Quality Life for Learners with Autism Laura A. Riffel, Ph.D., Jessica R. Eggleston, Ed.D., 2018-09-22 *Quantum Secrets of Creating a Quality Life for Learners with Autism* is based on years of teaching students with autism and most importantly, living with an adult who happened to have autism, bi-polar condition, obsessive compulsive disorder, intellectual

disabilities, and mild cerebral palsy. Jay was their most prolific teacher. He lived with the Riffel family for a decade and would still be residing with them had he not suffered a massive heart attack on January 7, 2009. Using the secrets learned from looking at a life backwards, Dr. Riffel will share what led to his incredible life and help you create that life for your own learners with autism. This book is to be used in conjunction with a seminar given by Dr. Riffel. She will actually share hands-on strategies you can take back and use the next day after attending this one day conference. Learn how to help a learner with autism achieve a dignified life.

Assistive Technologies for Assessment and Recovery of Neurological Impairments Stasolla, Fabrizio, 2021-10-22 People with neurological disorders may experience significant problems, isolation, detachment, and passivity while dealing with environmental requests. They constantly rely on caregivers and family assistance, which can create negative outcomes on their quality of life. An emerging way to overcome these issues is assistive technology-based interventions (AT). AT-based programs are designed to fill the gap between human/individual capacities or skills and environmental requests. These technologies can also bring about independence and self-determination and provide people with neurological disorders an active role, positive participation, and an enhanced status in being able to achieve functional daily activities by reducing the roles of their families and caregivers. The positive impacts of this technology are an important area of research, and its usage for neurological disorders is critical for the assessment and recovery of patients. Assistive Technologies for Assessment and Recovery of Neurological Impairments explores the use of AT-based programs for promoting independence and self-determination of individuals with neurological disorders. The chapters discuss AT-based interventions in detail with the specific technologies that are being used, the positive effects on patients, and evidence-based practices. This book also focuses on specific technologies such as virtual reality (VR) setups and augmented reality (AR) as valid ecological environments for patients that ensure methodological control and behavioral tracking for both assessment and rehabilitation purposes. This book is essential for occupational therapists, speech therapists, physiotherapists, neurologists, caregivers, psychologists, practitioners, medical professionals, medical technologists, IT consultants, academicians, and students interested in assistive technology interventions for people with neurological impairments.

Including Families of Children with Special Needs Carrie Scott Banks, Sandra Feinberg, Barbara A. Jordan, Kathleen Deerr, Michelle Langa, 2013 More than 6.5 million children in the US receive special education services; in any given community, approximately one child out of every six will get speech therapy, go to counseling, attend classes exclusively with other children with disabilities, or receive some other service that allows him or her to learn. This new revised edition is a step-by-step guide to serving children and youth with disabilities as well as the family members, caregivers, and other people involved in their lives. The authors show how staff can enable full use of the library's resources by integrating the methods of educators, medical and psychological therapists, social workers, librarians, parents, and other caregivers. Widening the scope to address the needs of teens as well as

preschool and school-age children, this edition also discusses the needs of Spanish-speaking children with disabilities and their families, looking at cultural competency as well as Spanish-language resources. Enhanced with checklists, stories based on real experiences, descriptions of model programs and resources, and an overview of appropriate internet sites and services, this how-to gives thorough consideration to Partnering and collaborating with parents and other professionals Developing special collections and resources Assessing competencies and skills Principles underlying family-centered services and resource-based practices The interrelationship of early intervention, special education, and library service This manual will prove valuable not only to children's services librarians, outreach librarians, and library administrators, but also early intervention and family support professionals, early childhood and special educators, childcare workers, daycare and after school program providers, and policymakers.
