Standard Operating Procedure Errol Morris, Philip Gourevitch, 2012-10-31 Standard Operating Procedure is an utterly original collaboration by the writer Philip Gourevitch (We Wish to Inform You that Tomorrow We Will Be Killed With Our Families) and the film-maker Errol Morris (The Thin Blue Line, The Fog of War). They have produced the first full reckoning of what actually happened at Abu Ghraib. Standard Operating Procedure reveals the stories of the American soldiers who took and appeared in the haunting digital snapshots from Abu Ghraib prison that shocked the world – and simultaneously illuminates and alters forever our understanding of those images and the events they depict. Drawing on more than two hundred hours of Errol Morris's startlingly frank and intimate interviews with Americans who served at Abu Ghraib and with some of their Iraqi prisoners, as well as on his own research, Philip Gourevitch has written a relentlessly surprising account of Iraq's occupation from the inside-out – rendering vivid portraits of guards and prisoners ensnared in an appalling breakdown of command authority and moral order. Gourevitch and Morris have crafted a nonfiction morality play that stands to endure as essential reading long after the current war in Iraq passes from the headlines. By taking us deep into the voices and characters of the men and women who lived the horror of Abu Ghraib, the authors force us, whatever our politics, to re-examine the pat explanations in which we have been offered – or sought – refuge, and to see afresh this watershed episode. Instead of a 'few bad apples', we are confronted with disturbingly ordinary young American men and women who have been dropped into something out of Dante's Inferno. This is a book that makes you think, and makes you see – an essential contribution from two of our finest nonfiction artists working at the peak of their powers.

Writing High-quality Standard Operating Procedures Atul Mathur, 2017-05-16 Pharmaceutical, biotechnology, and life-sciences companies rely on standard operating procedures (SOPs) to ensure the quality and safety of their products and services. But in many cases, these documents themselves lack quality. Containing important technical instructions, SOPs are often wordy, confusing, and imprecise, thereby increasing quality and compliance risks for the organization. The problem is not lack of technical knowledge. The professionals who write SOPs are technically sound, but what they lack is sound technical writing skills. An ideal resource for engineering professionals, technical writers, and students alike, Writing High-Quality Standard Operating Procedures: A Practical Guide to Clear, Concise, and Correct SOPs offers a step-by-step roadmap to take your SOP writing skills to the next level. Under the guidance of Atul Mathur, an engineer and a technical writer with over fifteen years of experience, you'll learn to identify the attributes of high-quality SOPs; create right content structure for SOPs; follow a systematic process for writing SOPs; apply best practices in SOP writing; and avoid common errors. Honing your technical writing skills is a pivotal step toward high-quality SOPs.

Army Tactical Standard Operating Procedures (ATP 3-90. 90) Department Army,2012-09-28 Army Techniques Publication (ATP) 3-90.90 facilitates development of standard operating procedures (SOPs) in order to enhance efficiency and adaptability across the force. ATP 3-90.90 achieves this purpose through linking to a milWiki portal under the milSuite uniform resource locator (URL) containing guidance for tactical SOPs and unclassified examples of SOPs for reference. The SOP portal provides a baseline for developing new SOPs quickly and a forum for improving existing SOPs. The portal presents best practices consistent with doctrinal principles. The Combined Arms Doctrine Directorate established the SOP portal in 2009. The authors attempted to align the original information with pertinent doctrine and regulations. Where the portal's contents differ from current doctrine and regulations, the latter take precedence. The information in the SOP portal is not authoritative doctrine. The examples in the portal do not provide ready-to-use SOPs for Army units. Soldiers developing SOPs for their units are encouraged to apply critical thinking while referring to the models and other resources to aid their own content development. At a minimum, portal users must be familiar with this ATP, Field Manuals (FM)s 5-0 and 6-99.2; Army Regulations (AR)s 25-1, 34-4, and 380-5; and Department of the Army Pamphlet (DA Pam) 25-403. Soldiers are encouraged to use the portal to collaborate, to improve the portal's contents, and to upload new SOP examples. The SOP portal is secure and requires an Army Knowledge Online or Defense Knowledge Online login. The portal's contents are unclassified. Neither this manual nor the SOP portal is intended to regulate the appearance or content of unit SOPs. This ATP uses joint terms where applicable. When formal military terms are identified in the text of this ATP, the terms are italicized and the number of the proponent manual follows the definition. A standard operating procedure is a set of instructions covering those features of operations which lend themselves to a definite or standardized procedure without loss of effectiveness. The procedure is applicable unless ordered otherwise (JP 3-31). A SOP is both standing and standard: it instructs how to perform a prescribed and accepted process established for completing a task. Features of operations that lend themselves to standardization are common and usually detailed processes performed often and requiring minimal variation each time. Well-written and properly used unit tactical SOPs enhance effective execution of tasks; the benefits of SOPs are numerous. They reduce training time, the loss of unwritten information, the commission of errors, the omission of essential steps or processes, and the time required for completion of tasks. This does not mean, however, that carrying out SOPs never requires thought or that SOPs should never change. Indeed, tactical units must change some operating procedures as rapidly as operational environments and missions change. The SOP portal helps units avoid an unnecessary loss of effectiveness that could occur by maintaining unthinking dependence on outdated written procedures. The portal also helps units avoid a loss of effectiveness that could occur when units delay writing down processes that need to become standardized. The doctrine in this manual provides techniques for developing unit tactical SOPs. Units throughout the Army can take advantage of technology to obtain guidance, collaborate in real time, and find information quickly. This manual and the SOP portal are intended to enhance operational adaptability Army-wide. In the short term, the information in the SOP portal will help units establish or improve SOPs more rapidly. In the long term, the intention is that more and more units will build SOPs using the portal and the doctrine in this manual. SOPs throughout the Army should increase in similarity as the combination of doctrinal guidance and Army-wide milWiki collaboration facilitates consensus.

Chemical Laboratory Safety and Security National Academies of Sciences, Engineering, and Medicine,Division on Earth and Life Studies,Board on Chemical Sciences and Technology,Committee on Chemical Management Toolkit Expansion: Standard Operating Procedures,2016-08-07 The U.S. Department of State charged the Academies with the task of producing a protocol for development of standard operating procedures (SOPs) that would serve as a complement to the Chemical Laboratory Safety and Security: A Guide to Prudent Chemical Management and be included with the other materials in the 2010 toolkit. To accomplish this task, a committee with experience and knowledge in good chemical safety and security practices in academic and industrial laboratories with awareness of international standards and regulations was formed. The hope is that this toolkit expansion product will enhance the use of the previous reference book and the accompanying toolkit, especially in developing countries where safety resources are scarce and experience of operators and end-users may be limited.

Built to Sell John Warrillow,2012-12-24 Run your company. Don't let it run you. Most business owners started their company because they wanted more freedom—to work on their own schedules, make the kind of money they deserve, and eventually retire on the fruits of their labor. Unfortunately, according to John Warrillow, most owners find that stepping out of the picture is extremely difficult because their business relies too heavily on their personal involvement. Without them, their company—no matter how big or profitable—is essentially worthless. But the good news is that entrepreneurs can take specific steps—no matter what stage a business is in—to create a valuable, sellable company. Warrillow shows exactly what it takes to create a solid business that can thrive long into the future.

Standard Operating Procedures (SOPs) for ensuring Safety & other Working Conditions at Construction Site Kamal Kulshrestha,2023-12-12 The main aim of SOP is to educate the employees and customers about the right way of executing a certain process. SOPs will be present everywhere within the organization, no matter how big or small it may be. Larger organizations would have more SOPs. It is a good practice to bring the culture of documenting routine tasks in the organization so that knowledge is not limited to a single resource or a team. With proper documentation in place, employees can simply refer to an SOP for required information.
