Say It with Sound Dorinne S Davis, 2017-03 Say It With Sound: Hum, Harmonize and Heal introduces Ototoning as an innovative self-healing technique. Dorinne Davis discusses this new method and how it can be used to help you become a more well-adjusted, stable and stronger person. She further explains the practice, value and benefits of Ototoning to achieve your personal harmonic sound balance. As we recognize the connection between the voice and ear, we support the brain to work as the conductor for maintaining the body's song. With a few simple skills you can learn how to Hum, Harmonize, and Heal yourself throughout your day simply if you Say It With Sound. Ms. Davis helps

us interpret the clues and answers that lay within us, as we learn how to uncover that personal spontaneous sound in order to help rebalance the body. This book also includes how Ototoning may be applied to help with various diagnoses faced by many today such as depression, anxiety, ADHD and autism. In this book Davis shows us how to get the body singing its own sound in harmony not only with oneself, but also with those around you. Your body will sing its own song and can accomplish this by Saying It With Sound. Davis teaches us how to use the voice; as the tool to make change and improve oneself. She explains how to feel it through the body and soul. Davis encourages us to get the whole body vibrating and to feel the experience, as she discusses how a person can hum, harmonize and heal. When she proposes that we Say It With Sound, she simplifies that a person can use the voice, expressing oneself and spreading that sound through the body in order to feel energized or more importantly to begin the process of self-healing. Davis goes on to explain how this can only be accomplished if used within the newly identified tri-fold subtle energy system called the Voice-Ear-Brain Connection. You can begin the process of self-healing by using your voice and saying it with sound. You are vocalizing with the sounds produced by your voice as a hum. You say it with sound by humming and harmonizing to your whole body supporting your body towards self-healing. A specific sound is identified from your ear. You produce that sound with your voice in a specific way that is similar to a humming sound. This technique is called Ototoning--toning the sound the ear identifies that the body wants recycled back to it. You do this with your voice with a humming-like sound. How does this happen? How was the concept developed? Where does it come from? Is it for everyone? When can the process be helpful? Who can use it? And why say that sound is

the key? The book discusses what sound is, what the voice is within this process, why humming is part of the process, how breathing is important and ends with the introduction of Ototoning as a technique. The last chapter will be how this process can be applied to many of life's challenges. Enjoy learning how you can use your body's song and sound to help you feel better, overcome obstacles, and maintain your health and wellness. Share in the experience of using your voice to regenerate, recycle, and revitalize your energy and body function.
