The Space Shuttle Decision T. A. Heppenheimer, 1999 Long before the NASA was the throes of planning for the Apollo voyages to the Moon, many people had seen the need for a vehicle that could access space routinely. The idea of a reusable space shuttle dates at least to the theoretical rocketplane studies of the 1930s, but by the 1950s it had become an integral part of a master plan for space exploration. The goal of efficient access to space in a heavy-lift booster prompted NASA's commitment to the space shuttle as the vehicle to continue human space flight. By the mid-1960s, NASA engineers concluded that the necessary technology was within reach to enable the creation of a reusable winged space vehicle that could haul scientific and applications satellites of all types into orbit for all users. President Richard M. Nixon approved the effort to build the shuttle in 1972 and the first orbital flight took place in 1981. Although the development program was risky, a talented group of scientists and engineers worked to create this unique space vehicle and their efforts were largely successful. Since 1981, the various orbiters -Atlantis, Columbia, Discovery, Endeavour, and Challenger (lost in 1986 during the only Space Shuttle accident)- have made early 100 flights into space. Through 1998, the space shuttle has carried more than 800 major scientific and technological payloads into orbit and its astronaut crews have conducted more than 50 extravehicular activities, including repairing satellites and the initial building of the International Space Station. The shuttle remains the only vehicle in the world with the dual ability to deliver and return large payloads to and from orbit, and is also the world's most reliable launch system. The design, now almost three decades old, is still state-of-the-art in many areas, including computerized flight control, airframe design, electrical power systems, thermal protection system, and main engines. This significant new study of the decision to build the space shuttle explains the shuttle's origin and early development. In addition to internal NASA discussions, this work details the debates in the late 1960s and early 1970s among policymakers in Congress, the Air Force, and the Office of Management and Budget over the roles and technical designs of the shuttle. Examining the interplay of these organizations with sometimes conflicting goals, the author not only explains how the world's premier space launch vehicle came into being, but also how politics can interact with science, technology, national security, and economics in national government.

See You in the Cosmos Jack Cheng, 2017-02-28 "I haven't read anything that has moved me this much since Wonder." —Jennifer Niven, author of All the Bright Places A space-obsessed boy and his dog, Carl Sagan, take a journey toward family, love, hope, and awe in this funny and moving novel for fans of Counting by 7s, Walk Two Moons, and The Curious Incident of the Dog in the Night-Time. 11-year-old Alex Petroski loves space and rockets, his mom, his brother, and his dog Carl Sagan—named for his hero, the real-life astronomer. All he wants is to launch his golden iPod into space the way Carl Sagan (the man, not the dog) launched his Golden Record on the Voyager spacecraft in 1977. From Colorado to New Mexico, Las Vegas to L.A., Alex records a journey on his iPod to show other lifeforms what life on earth, his earth, is like. But his destination keeps changing. And the funny, lost, remarkable people he meets along the way can only partially prepare him for the secrets he'll uncover—from the truth about his long-dead dad to the fact that, for a kid with a troubled mom and a mostly not-around brother, he has way more family than he ever knew. Jack Cheng's debut is full of joy, optimism, determination, and unbelievable heart. To read the first page is to fall in love with Alex and his view of our big, beautiful, complicated world. To read the last is to know he and his story will stay with you a long, long time. Stellar. —Entertainment Weekly "Life-embracing." —The Wall Street Journal Works beautifully. —The New York Times Book Review "Irresistible." —The Chicago Tribune "The best I've read in a long, long time." —Holly Goldberg Sloan, author of Counting by 7s "Riveting, inspiring, and sometimes hilarious." —Kirkus, starred review "A propulsive stream-of-conscious dive." —Publishers Weekly, starred review "A gift—a miracle." —Paul Griffin, author When Friendship Followed Me Home "Exuberant." —Booklist Full of the real kind of magic. —Ally Condie, author of Matched Absorbing, irresistible. —Common Sense Media "Incredible." —BookRiot Full of innocence and unwavering optimism. —SLC Inspiring. —Time for Kids "Powerfully affirms our human capacity for grace and love and understanding." —Gary D. Schmidt, author of Okay for Now

A Cosmic Kind of Love Samantha Young, 2022-10-18 One of Amazon's Best Romances of October! Space is the last thing an event planner and an astronaut need in this charming new romantic comedy from New York Times bestselling author Samantha Young. When event planner Hallie Goodman receives party-inspiration material from the bride of her latest wedding project, the last thing she expects to find is a collection of digital videos from Darcy's ex-boyfriend. Hallie knows it's wrong to keep watching these personal videos, but this guy is cute, funny, and an astronaut on the International Space Station to boot. She's only human. And it's not long until she starts sending e-mails and video diaries to his discontinued NASA address. Since they're bouncing back, there's no way anyone will ever be able to see them...right? Christopher Ortiz is readjusting to life on earth and being constantly in the shadow of his deceased older brother. When a friend from NASA's IT department forwards him the e-mails and video messages Hallie has sent, he can't help but notice how much her sense of humor and pink hair make his heart race. Separated by screens, Hallie and Chris are falling in love with each other, one transmission at a time. But can they make their star-crossed romance work when they each learn the other's baggage?

AU-18 Space Primer Air Command Staff College,2012-08-01 The US National Space Policy released by the president in 2006 states that the US government should develop space professionals. As an integral part of that endeavor, AU-18, Space Primer, provides to the joint war fighter an unclassified resource for understanding the capabilities, organizations, and operations of space forces. This primer is a useful tool both for individuals who are not space aware-unacquainted with space capabilities, organizations, and operations-and for those who are space aware, especially individuals associated with the space community, but not familiar with space capabilities, organizations, and operations outside their particular areas of expertise. It is your guide and your invitation to all the excitement and opportunity of space. Last published in 1993, this updated version of the Space Primer has been made possible by combined efforts of the Air Command and Staff College's academic year 2008 Joints spacemindedness and Operational Space research seminars, as well as select members of the academic year 2009 Advanced Space research seminar. One Fine Day in the Middle of the Night Christopher Brookmyre,2012-05-01 “Pulp Fiction meets And Then There Were None” in this comic mystery set during a high school reunion off the coast of Scotland (Booklist). Gavin Hutchison has a plan to create a unique “floating holiday experience” on a converted North Sea oil rig. It’ll be a haven for tourists who want a vacation without the hassle of actually going anywhere. And what better way to test out his venture than to host a fifteen-year high school reunion, the biggest social event of his life? Believe it or not, the plan goes all wrong. Not only does no one remember Gavin, but his wife has discovered his philandering ways and plans to ditch him with a very public announcement in front of his assembled guests. That includes the uninvited ones, like a band of party-crashing mercenaries who are about to bring out the very worst in these very old friends. “Champagne bottles morph into defensive weapons” in prize-winning author Christopher Brookmyre’s comedy of betrayal, blackmail, revenge, and survival (Hartford Courant). “Furiously paced and wonderfully absurd, with more one-liners than a Colombian coke dealer.” —Maxim “Broad humor . . . and breakneck plotting.” —The New York Times Book Review
