Christian Pilgrimage, Landscape and Heritage

Avril Maddrell, Veronica della Dora, Alessandro Scafi, Heather Walton, 2014-12-05 This volume provides a theoretically and empirically-grounded study of the significance of landscape in the experience of Christian pilgrimage across different denominations and its intersection with cultural heritage and tourism. The book focuses on pilgrimages to Meteora (Greece), Subiaco (Italy) and the Isle of Man. These are each sites of scenic beauty that boast a rich heritage associated respectively to Greek Orthodox, Roman Catholic and Ecumenical/ Protestant denominations. The study discusses different Christian theologies, practices and perspectives on the nature and the purpose of pilgrimage in these traditions. It draws on participant experiential accounts, archival research, and interviews with clergy, laity and local stakeholders. Special attention is paid to the themes of sacred space and practice, aesthetics, mobilities, embodiment and performance, emotional geographies, theology, cultural heritage, consumption and commodification, and the pilgrim-tourist continuum.

Fundamentals of Algebraic Specification 2

Hartmut Ehrig, Bernd Mahr, 1989-12-28 Since the early seventies concepts of specification have become central in the whole area of computer

science. Especially algebraic specification techniques for abstract data types and software systems have gained considerable importance in recent years. They have not only played a central role in the theory of data type specification, but meanwhile have had a remarkable influence on programming language design, system architectures, and software tools and environments. The fundamentals of algebraic specification lay a basis for teaching, research, and development in all those fields of computer science where algebraic techniques are the subject or are used with advantage on a conceptual level. Such a basis, however, we do not regard to be a synopsis of all the different approaches and achievements but rather a consistently developed theory. Such a theory should mainly emphasize elaboration of basic concepts from one point of view and, in a rigorous way, reach the state of the art in the field. We understand fundamentals in this context as: 1. Fundamentals in the sense of a carefully motivated introduction to algebraic specification, which is understandable for computer scientists and mathematicians. 2. Fundamentals in the sense of mathematical theories which are the basis for precise definitions, constructions, results, and correctness proofs. 3. Fundamentals in the sense of concepts from computer science, which are introduced on a conceptual level and formalized in mathematical terms.

Fundamentals of Algebraic Specification 1

Hartmut Ehrig, Bernd Mahr, 2012-12-06 The aim of this book is to present fundamentals of algebraic specifications with respect to the following three

aspects: fundamentals in the sense of a carefully motivated introduction to algebraic specifications, which is easy to understand for computer scientists and mathematicians; fundamentals in the sense of mathematical theories which are the basis for precise definitions, constructions, results, and correctness proofs; and fundamentals in the sense of concepts, which are introduced on a conceptual level and formalized in mathematical terms. The book is equally suitable as a text book for graduate courses and as a reference for researchers and system developers.
