Nutritional Applications in Exercise and Sport Ira Wolinsky, Judy A. Driskell, 2000-09-21 A comprehensive compilation of applied topics, Nutritional Applications in Exercise and Sport discusses issues related to the life cycle, group specific nutritional concerns of athletes, and the particular sport of the athlete. It addresses the physically and medically disabled athlete, athletes addicted to alcohol, tobacco, or marijuana, and those with eating disorders. The book concludes with a discussion of the nutritional knowledge of athletes. In this latest addition to the Nutrition in Exercise and Sport series the editors have taken a different approach. The book focuses on the nutritional applications of exercise and sport rather than the usual treatment of nutrient-specific metabolism. Studies and tables clearly illustrate the concepts and provide quick and easy access to the information you need to put theory into practice. Although technical in nature, and the pedagogical writing style makes the book appropriate for coaches and trainers as well as nutritionists. The editors, well-known experts in their fields, have collected a panel of top-notch nutrition experts – making this book not only comprehensive but also authoritative. In addition to supplying hard-to-find information, Nutritional Applications in Exercise and Sport serves as a companion resource to books that take a nutrient/metabolism specific approach.

Remaking the Male Body Joan Tumblety, 2012-10-04 Remaking the Male Body looks at interwar physical culture as a set of popular practices and as a field of ideas. It takes as its central subject the imagined failure of French manhood that was mapped out in this realm by physical culturist 'experts', often physicians. Their diagnosis of intertwined crises in masculine virility and national vitality was surprisingly widely shared across popular and political culture. Theirs was a hygienist and sometimes overtly eugenicist conception of physical exercise and national strength that suggests the persistence of fin-de-siècle pre-occupations with biological degeneration and regeneration well beyond the First World War. Joan Tumblety traces these patterns of thinking about the male body across a seemingly disparate set of voices, all of whom argued that the physical training of men offered a salve to France's real and imagined woes. In interrogating a range of sources, from get-fit manuals and the popular press, to the mobilising campaigns of popular politics on left and right and official debates about physical education, Tumblety illustrates how the realm of male physical culture was presented as an instrument of social hygiene as well as an instrument of political struggle. In highlighting the purchase of these concerns in the interwar years, the book ultimately sheds light on the roots of Vichy's project for masculine renewal after the military defeat of 1940.
