Teaching Music Improvisation with Technology Michael Fein,2017-02-03 Incorporating technology in music classrooms can take the mystery out of improvisation. What music technology does is establish a strong foundation for chord, scale, phrase, ear training, and listening exercises, creating a solid backdrop for student expression. As author and educator Mike Fein shows, technology is a valuable tool that can be used effectively to supplement student practice time while also developing the skills necessary to become a proficient improviser. Complete with notated exercises, accompaniment tracks, and listening resources, this book gives teachers methods to set their students free to make mistakes and to develop their own ear for improvisation at their own pace. Broken down into significant areas of music technology, each chapter focuses on developing a new skill and guides readers to tangible outcomes with the assistance of hands-on activities that can be immediately implemented into the classroom. In addition to these hands-on activities, each chapter provides the reader with an iPad Connection to various iOS applications, which allows teachers and students another, albeit significantly less expensive, medium through which to learn, share, and create art. This book will appeal to music educators of students in grades K-12. It will serve collegiate music education courses secondarily, and will also appeal to those music educators who work with improvisation and technology.

The New Music Industries Diane Hughes, Mark Evans, Guy Morrow, Sarah Keith, 2016-09-27 This research-based book outlines career models for artists, methods of creative engagement, artistic options including individuality and branding, production practices, the realities of being a musician in the new industries, and implications for popular music education. Due to the profound effects of the digitisation of music, the music industries have undergone rapid transformation. The former record label dominated industry has been supplanted by new industries, including digital aggregators, strategists and online platforms. These new music industries now facilitate ‘direct’ access to both artists and their music. While such accessibility and the potential for artist exposure have never been greater, the challenge to stand out or to even navigate a musical career pathway is formidable. A useful resource for musicians and educators, this text highlights the ways in which the new music industries facilitate increased opportunities for 21st Century popular musicians to collaborate, communicate and interact with others interested in their music.

Selling Out Bethany Klein,2020-07-09 The relationship between popular music and consumer brands has never been so cosy. Product placement abounds in music videos, popular music provides the soundtrack to countless commercials, social media platforms offer musicians tools for perpetual promotion, and corporate-sponsored competitions lure aspiring musicians to vie for exposure. Activities that once attracted charges of 'selling out' are now considered savvy, or even ordinary, strategies for artists to be heard and make a living. What forces have encouraged musicians to become willing partners of consumer brands? At what cost? And how do changes in popular music culture reflect broader trends of commercialization? Selling Out traces the evolution of 'selling out' debates in popular music culture and considers what might be lost when the boundary between culture and commerce is dismissed as a relic.

The Rise of the Sharing Economy Kevin Govender, 2021-09-27 Is access the alternative to ownership? In 2011, the sharing economy was dubbed by Time magazine as one of the 'Ten ideas that will change the world' and it has been widely hailed as a major growth sector, by sources ranging from Fortune magazine, to the World Economic Forum, to former President Obama. The sharing economy is a new economic model that focuses on access to assets or resources, instead of ownership. It has exploded in popularity over recent years and has disrupted a significant number of mature industries such as accommodation, automotive, and entertainment. The total value of the global sharing economy is estimated to grow from \$14 billion in 2014 to \$335 billion by 2025. With limited resources, the desire to become more environmentally conscious, the high cost and burdens of ownership, and a rapidly growing population, living increasingly in densely populated cities, consumers are faced with greater challenges and opportunities to fill their consumption needs. People are experiencing a significant value shift with a desire to reconnect with products and services in a more meaningful way, are becoming more cost and environmentally conscious, and are prioritising experience over ownership. An organisation's ability to reimagine and reinvent its business model to offer unique opportunities for humanising technology and developing innovative sharing platforms, such as Uber and Airbnb, would be a game changer for them. While the Fourth Industrial Revolution and COVID-19 pandemic are influencing and changing consumer behaviour, organisations are facing a dilemma that is affecting the future of their profitability, existence, and sustainability. In *The Rise of the Sharing Economy*, Kevin Govender shares his insights and expertise on the evolution of the sharing economy, consumer behaviour, and alternative business models, and empowers consumers to rediscover and realise the enormous benefits of access over ownership, and the potential savings in time, money, space and the opportunity. Access is a cultural and socio-economic phenomenon that is transforming businesses, consumers, the way we live, work, learn, consume, commute and play. Access is the new ownership.
