Spying Software Development in Google Android Fissha
SeyoumTeshome,2017-06-28 Bachelor Thesis from the year 2011 in the subject
Computer Science – IT-Security, Helsinki Metropolia University of Applied
Sciences , language: English, abstract: The main purpose was to study the
concept behind developing spying software. The goal of this project was to
develop a mobile phone tracking application for Google Android phones. The
application was expected to include the use of GPS and Cell-ID to track the
location of a mobile phone. The Google Android SDK was used to develop the
tracking software application. The application was tested on a Google Android
mobile phone. The result showed that the development process of location and
maps-based applications was fast while using Google Android. This was because
of two main reasons. First, Google Android Provided APIs for location-based
services such as GPS and Cell-ID. Second, having Eclipse with ADT plug-in as
the choice to develop the application led to an easy means of debugging and
testing. The tracking application was found important to use since it will
allow users to trace lost phones or to locate lost people. The application
can be developed further by adding a number of features to it such as running
in the background, SMS copying and making a spy call.

digital technology, business transactions and partnerships across borders
have become easier than ever. As part of this shift in the corporate sphere,
managers, executives, and strategists across industries must acclimate
themselves with the challenges and opportunities for conducting business.
Mobile Commerce: Concepts, Methodologies, Tools, and Applications provides a
comprehensive source of advanced academic examinations on the latest
innovations and technologies for businesses. Including innovative studies on
marketing, mobile commerce security, and wireless handheld devices, this
multi-volume book is an ideal source for researchers, scholars, business
executives, professionals, and graduate-level students.

Securing Transactions and Payment Systems for M-Commerce Madan,
Sushila,2016-04-19 Mobile commerce, or M-commerce, is booming as many utilize
their mobile devices to complete transactions ranging from personal shopping
to managing and organizing business operations. The emergence of new
technologies such as money sharing and transactional applications have
revolutionized the way we do business. Wholeheartedly adopted by both the
business world and consumers, mobile commerce has taken its seat at the head
of the mobile app economy. Securing Transactions and Payment Systems for M-
Commerce seeks to present, analyze, and illustrate the challenges and rewards
of developing and producing mobile commerce applications. It will also review
the integral role M-commerce plays in global business. As consumers'
perceptions are taken into account, the authors approach this burgeoning
topic from all perspectives. This reference publication is a valuable
resource for programmers, technology and content developers, students and
instructors in the field of ICT, business professionals, and mobile app
developers.

The Evil Side of the Web AA. VV.,2016-12-02T00:00:00+01:00 There are
various risks tied to the Web. Toxic evils like cybercrimes, cyberbullying,
on-line harassment, aggressive online comments, defamation, hateful speech,
plagiarism, etc. are growing among young people. The search of antidotes to
fight the above issues is becoming a common concern for governments,
educational authorities, teachers, parents and children alike. Literature
stresses on the crucial role of education for combating cyber risks among
young people. There is a general agreement about the responsibility that
schools have in this challenging battle. This book tackles some dark aspects
of the Web, explores them thoughtfully and gives the suggestions of experts
for preventing them.

<u>Love-Bot</u> Billy DeCarlo,2018-06-14 The essence of a robotic scientist's late wife now exists in one of his sentient creations. A firmware flaw has surfaced in an overly ambitious project to mesh android and human brains. The android population on Novae Terrae now have human emotions—and human flaws. Robotics scientist Harley Harris wants a peaceful coexistence between both groups, who share a planet that humans have escaped to during the apocalypse on Earth. The androids, led by a gynoid who schemes for Harley's heart, have their own plans. Will Harley Harris choose the android over his human love interest? Is it really love that she's after? ★★★★★ This is a fascinating futuristic sci-fi that I recommend. ★★★★ The whole concept is all too real to me, and yet draws me to it, like a child covering her eyes at the scary parts, yet peeking through her fingers to see what's happening! ★★★★ Happy reading for those that love a good twist in a story line.

War-Bot Billy DeCarlo,2018-07-31 Hell hath no fury as an android spurned. The remnants of humanity and newly awakened, sentient androids of Novae Terrae have come to an uneasy truce. Robotics scientist Harley Harris has sorted out his relationship issues, leaving behind an angry former partner. Will the peace hold after the androids come to the artificial intelligence-driven conclusion that humans are inferior and unnecessary? Will humanity survive?
