Stands a Shadow Col Buchanan,2011-11-08 The Heart of the World series is an epic adventure that, through the lens of its vibrant and unique world and engaging characters, asks intriguing questions and illuminates the humanity at the core of both hero and villain. Stands a Shadow is the second book in the series. In Farlander, the first book of the Heart of the World series, readers met Ash, an aging master assassin of the famed order of Roshun, and his apprentice Nico, a boy who always managed to be in the wrong place at the right time. Ash and Nico, one with failing health and the other with little training, were sent on a suicidal mission to fulfill a contract against the favored son of the Holy Matriarch, the ruler of Mann. The assassination of the Matriarch's son maintained the honor and reputation of the Roshun, but further destabilized a nation already beset by strife. For Ash, fulfilling the contract came at an enormous personal cost. Now in Stands a Shadow, driven by grief and anger, Ash embarks on a journey that takes him through the Free Ports and towards the embattled city of Bar-Khos. He arrives at the city as the Holy Matriarch of Mann orders her forces to breach the walls of Bar-Khos and bring it under her control. Renouncing the ways of the Roshun, Ash disguises himself among the Mannian soldiers, determined to go to any lengths to have his revenge against the Matriarch. . . . In Defence of Food Michael Pollan,2008-01-31 'A must-read ... satisfying, rich ... loaded with flavour' Sunday Telegraph This book is a celebration of food. By food, Michael Pollan means real, proper, simple food - not the kind that comes in a packet, or has lists of unpronounceable ingredients, or that makes nutritional claims about how healthy it is. More like the kind of food your great-grandmother would recognize. In Defence of Food is a simple invitation to junk the science, ditch the diet and instead rediscover the joys of eating well. By following a few pieces of advice (Eat at a table - a desk doesn't count. Don't buy food where you'd buy your petrol!), you will enrich your life and your palate, and enlarge your sense of what it means to be healthy and happy. It's time to fall in love with food again. For the past twenty years, Michael Pollan has been writing about the places where the human and natural worlds intersect: food, agriculture, gardens, drugs, and architecture. His most recent book, about the ethics and ecology of eating, is The Omnivore's Dilemma, named one of the ten best books of 2006 by the New York Times and the Washington Post. He is also the author of The Botany of Desire, A Place of My Own and Second Nature.

Crying in H Mart Michelle Zauner,2021-04-20 #1 NEW YORK TIMES BESTSELLER • From the indie rock sensation known as Japanese Breakfast, an unforgettable memoir about family, food, grief, love, and growing up Korean American—"in losing her mother and cooking to bring her back to life, Zauner became herself" (NPR). • CELEBRATING OVER ONE YEAR ON THE NEW YORK TIMES BESTSELLER LIST In this exquisite story of family, food, grief, and endurance, Michelle Zauner proves herself far more than a dazzling singer, songwriter, and guitarist. With humor and heart, she tells of growing up one of the few Asian American kids at her school in Eugene, Oregon; of struggling with her mother's particular, high expectations of her; of a painful adolescence; of treasured months spent in her grandmother's tiny apartment in Seoul, where she and her mother would bond, late at night, over heaping plates of food. As she grew up, moving to the East Coast for college, finding work in the restaurant industry, and performing gigs with her fledgling band--and meeting the man who would become her husband--her Koreanness began to feel ever more distant, even as she found the life she wanted to live. It was her mother's diagnosis of terminal cancer, when Michelle was twenty-five, that forced a reckoning with her identity and brought her to reclaim the gifts of taste, language, and history her mother had given her. Vivacious and plainspoken, lyrical and honest, Zauner's voice is as radiantly alive on the page as it is onstage. Rich with intimate anecdotes that will resonate widely, and complete with family photos, Crying in H Mart is a book to cherish, share, and reread.

Achieving the Sustainable Development Goals Through Sustainable Food Systems Riccardo Valentini,John L. Sievenpiper,Marta Antonelli,Katarzyna Dembska,2019-10-10 This publication offers a systemic analysis of sustainability in the food system, taking as its framework the Sustainable Development Goals of the 2030 Agenda of the United Nations. Targeted chapters from experts in the field cover main challenges in the food system and propose methods for achieving long term sustainability. Authors focus on how sustainability can be achieved along the whole food chain and in different contexts. Timely issues such as food security, climate change and migration and sustainable agriculture are discussed in depth. The volume is unique in its multidisciplinary and multi-stakeholder approach. Chapter authors come from a variety of backgrounds, and authors include academic professors, members of CSO and other international organizations, and policy makers. This plurality allows for a nuanced analysis of sustainability goals and practices from a variety of perspectives, making the book useful to a wide range of readers working in different areas related to sustainability and food production. The book is targeted towards the academic community and practitioners in the policy, international cooperation, nutrition, geography, and social sciences fields. Professors teaching in nutrition, food technology, food sociology, geography, global economics, food systems, agriculture and agronomy, and political science and international cooperation may find this to be a useful supplemental text in their courses.

Stand Together or Starve Alone Mark Winne,2017-11-16 The United States-one of the world's wealthiest and resource-richest nations-has multiple food-related problems: declining food quality due to industrialization of its production, obesity across all age groups, and a surprisingly large number of households suffering from food insecurity. These issues threaten to shorten the lives of many and significantly reduce the quality of life for millions of others. This book explores the root causes of food-related problems in the 20th and 21st centuries and explains why collective impact-the social form of working together for a common goal-needs to be employed to reach a successful resolution to hunger, obesity, and the challenges of the industrial food system. Authored by Mark Winne, a 45-year food activist, the book begins with background information about the evolution of the U.S. food movement since the 1960s that documents its incredible growth and variety of interests, organizations, and sectors. The subsequent sections demonstrate how these divergent interests have created a lack of unity and deterred real change and improvement. Through examples from specific cities and states as well as a discussion of group dynamics and coalition-building methods, readers come away with an understanding of a complicated topic and

grasp the potential of a number of strategies for creating more cohesion within the food movement-and realizing meaningful improvements in our food system for current and future generations.

The New Cultures of Food Martin K. Hingley, 2016-03-03 Food is an extraordinary expression of culture; the assortment of flavours, smells, colours and appearance match the diversity of the cultures from which they come and provide very visible evidence of the migration of populations and of the growing multiculturalism of many countries. Adam Lindgreen and Martin K. Hingley draw on research into European, Latin American and (Near and Far) Eastern markets to provide a comprehensive collection of original, cutting-edge research on the opportunities that the changing landscapes of ethnic, religious and cultural populations present for businesses and marketers. The New Cultures of Food uses the perspective of food culture to explore the role of food as a social agent and attitudes to new foodstuffs amongst indigenous populations and to indigenous food amongst immigrant communities. Opportunities and routes to market for exploiting growing demand for ethnic food are also investigated. This is an important book for food and consumer businesses, policy makers and researchers seeking to understand changing global markets and the significance of food as an indicator of social and religious attitude, diet and ethnic identity.

Megatrends in Food and Agriculture Helmut Traitler, Michel J. F. Dubois, Keith Heikes, Vincent Petiard, David Zilberman, 2018-02-05 Highlights and examines the growing convergence between the food and agricultural industries—the technological, environmental, and consumer-related drivers of this change, and the potential outcomes. This is the first book of its kind to connect food and the food industry with agriculture, water resources, and water management in a detailed and thorough way. It brings together a small community of expert authors to address the future of the food industry, agriculture (both for plants and animals), and water—and its role in a world of increasing demands on resources. The book begins by highlighting the role of agriculture in today's food industry from a historical perspective—showing how it has grown over the years. It goes on to examine water management; new ways of plant breeding not only based on genetic modification pathways; and the attention between major crops (soy, corn, wheat) and so-called orphan crops (coffee, cocoa, tropical fruits). The book then turns towards the future of the food industry and analyzes major food trends, the new food, and enough food; discusses possible new business models for the future food industry; and analyzes the impact that the internet of everything will have on agriculture and the food industry. Finally, *Megatrends in Food and Agriculture: Technology, Water Use and Nutrition* offers scenarios about how agriculture, food, and the food industry might undergo some radical transformations. Assesses the evolution of food production and how we arrived at today's landscape. Focuses on key areas of change, driven by both innovation and challenges such as new technologies, the demand for better nutrition, and the management of dwindling resources. Highlights the role of better-informed consumers who demand transparency and accountability from producers. Is written by industry insiders and academic experts. *Megatrends in Food and Agriculture: Technology, Water Use and Nutrition* is an important resource for food and agriculture industry professionals, including scientists and technicians as well as decision makers, in management, marketing, sales, and regulatory areas, as well as related NGOs.
