*Discourse and Crisis* Antoon De Rycker, Zuraidah Mohd Don, 2013-12-15 *Discourse and Crisis: Critical perspectives* brings together an exciting collection of studies into crisis as text and context, as unfolding process and unresolved problem. Crisis is viewed as a complex phenomenon that – in its prevalence, disruptiveness and (appearance of) inevitability – is both socially produced and discursively constituted. The book offers multiple critical perspectives: in-depth linguistically informed analyses of the discourses of power and collaboration implicated in crisis construal and recovery; detailed examination of the critical role that language plays during the crisis life-cycle; and further problematization of the semiotic-material complexity of crisis and its usefulness as an analytical concept. The research focus is on the discursive and interactive mediation of crisis in organizational, political and media texts. The volume contains contributions from across the world, offering a polyphonic overview of 'discourse and crisis' research. This impressive volume will be useful to researchers and academics working on the intersection of crisis, language and communication. It is also of

interest to practitioners in organizational management, politics and policy, and media.

**Lebanon and the Arab Uprisings** Maximilian

Felsch, Martin Wählich, 2016-06-23 The Arab uprisings have put Lebanon under increased strain. While the revolutions in Tunisia and Egypt caused limited reverberations, the war in Syria echoed in the fine-tuned political and confessional balance of Lebanon. Over one million refugees, equal to one-quarter of Lebanon's population, have moved in from Syria. The country's economy and its already weak public infrastructure have been impacted heavily. Hizbullah's engagement in Syria has posed questions about Lebanon's disassociation policy. Terrorist attacks by ISIL and the growing risk of radicalization across the confessional spectrum have left the country at unease. However, Lebanon's political elites have vowed to shield the country from regional turbulences. Lebanon recently saw a series of demonstrations because of the inability of the government to manage the garbage crisis, but it has been far from witnessing a large-scale citizen uprising similar to the 2005 Cedar Revolution or the revolts next door. This book provides a comprehensive overview of the current situation in Lebanon, and a detailed assessment of the difficulties which the country is currently facing.

**Knowledge Production in the Arab World** Sari

Hanafi, Rigas Arvanitis, 2015-12-22 Over recent decades we have witnessed the globalization of research. However, this has yet to translate into

a worldwide scientific network, across which competencies and resources can flow freely. Arab countries have strived to join this globalized world and become a 'knowledge economy,' yet little time has been invested in the region's fragmented scientific institutions; institutions that should provide opportunities for individuals to step out on the global stage. Knowledge Production in the Arab World investigates research practices in the Arab world, using multiple case studies from the region with particular focus on Lebanon and Jordan. It depicts the Janus-like face of Arab research, poised between the negative and the positive and faced with two potentially opposing strands; local relevance alongside its internationalization. The book critically assesses the role and dynamics of research and poses questions that are crucial to further our understanding of the very particular case of knowledge production in the Arab region. The book explores research's relevance and whom it serves, as well as the methodological flaws behind academic rankings and the meaning and application of key concepts such as knowledge society/economy. Providing a detailed and comprehensive examination of knowledge production in the Arab world, this book is of interest to students, scholars and policy makers working on the issues of research practices and status of science in contemporary developing countries.

Jaghmīnī's Mulakhkhaṣ Sally P. Ragep, 2018-07-12

This book provides the only critical edition and English translation of Maḥmūd al-Jaghmīnī's al-Mulakhkhaṣ fī al-hay'a al-basīṭa, the most widely circulated Arabic treatise on Ptolemaic astronomy ever written. Composed in the early 13th century, this introductory textbook played a crucial role in the teaching, dissemination, and institutional instruction of Islamic astronomy well into the 19th century (and beyond). Establishing the base text is a fundamental prerequisite for gaining insights into what was considered an elementary astronomical textbook in Islam and also for understanding the extensive commentary tradition that built upon it. Within this volume, the Mulakhkhaṣ is situated within the broader context of the genre of literature termed 'ilm al-hay'a, which has become the subject of intensive research over the past 25 years. In so doing, it provides a survey of summary accounts of theoretical astronomy of Jaghmīnī's predecessors, both Ancient and Islamic, which could have served as potential sources for the Mulakhkhaṣ. Jaghmīnī's dates (which until now remained unsettled) are established, and it is definitively shown that he composed not only the Mulakhkhaṣ but also other scientific treatises, including the popular medical treatise al-Qānūnča, during a period that has been deemed one of scientific decline and stagnation in Islamic lands. The book will be of particular interest to scholars engaged in the study of Islamic theoretical astronomy, but is

accessible to a general readership interested in learning what constituted an introduction to Ptolemaic astronomy in Islamic lands.

pyschiatric  
tales by darryl  
cunningham is a  
graphic novel  
of him telling  
stories about  
mental illness  
he used to work  
as an assistant  
on a  
psychiatric  
ward for many  
years and is  
also a  
cartoonist so  
he made this  
book to take  
away the  
ignorance on  
mental illness  
and show how it  
can affect  
people
