McGary, Joseph John Graham, 1960 This report contains the biological (including fishing) and oceanographic data collected in the central North Pacific during the July-September 1958 period from the U.S. Bureau of Commercial Fisheries research vessel Hugh M. Smith and the M/V Paragon. The latter made a commercial-scale gill-net survey for albacore under a contract with the Bureau. Scientists and crew aboard the former collected oceanographic, biological, and fishing data to permit a comparison of

People Under Three Sonia Jackson,2004-08-02 People Under Three translates child development theory and research into everyday practice. Focussing on the group day care of very young children, it is designed specifically for those who look after them day by day, as well as policy makers, administrators and the managers of child care services. All the practical ideas in the book have been developed and tested in nurseries and family centres. They include detailed guidance on educational play for babies and toddlers and how to care for children's emotional needs. The book also explores the difficult area of child protection and working with parents and children with a variety of problems. People Under Three is an established text for all those training to work with young children or managing day care facilities. This new edition has been completely updated to take account of the expansion and radical changes which have taken place in child care provision since the book was first published and includes new chapters on assessing the quality of care and short-term and intermittent care.
