Eddie Stobart Martin Roach, 2013-09-30 From humble beginnings in a Cumbrian farmyard over forty years ago, the Eddie Stobart fleet has found a big parking place in the nation's heart, loved as much for its 2,200 immaculate green and red trucks, each emblazoned with a girl's name on the front, as for its famous army of dedicated Stobart Spotters who try to find each one. Buckle up with the Stobart drivers, and join them on a week in the life of a massive delivery, from paperwork to pallet. Learn what it's like to be sat in the driver seat of a Stobart truck - the noises, visibility, clutch control, gears, steering - and discover the sheer size and power of these machines. Illustrated throughout with amazing photographs, and featuring first-hand stories of incredible journeys from the intrepid truckers, as well as astonishing facts and stats and the history of the fleet, this is truly an irresistible book for Stobart fans of all ages.

Fighter Aircraft Maneuver Limiting Using MPC: Theory and Application Daniel Simon, 2017-09-12 Flight control design for modern fighter aircraft is a challenging task. Aircraft are dynamical systems, which naturally contain a variety of constraints and nonlinearities such as, e.g., maximum permissible load factor, angle of attack and control surface deflections. Taking these limitations into account in the design of control systems is becoming increasingly important as the performance and complexity of the aircraft is constantly increasing. The aeronautical industry has traditionally applied feedforward, anti-windup or similar techniques and different ad hoc engineering solutions to handle constraints on the aircraft. However these approaches often rely on engineering experience and insight rather than a theoretical foundation, and can often require a tremendous amount of time to tune. In this thesis we investigate model predictive control as an alternative design tool to handle the constraints that arises in the flight control design. We derive a simple reference tracking MPC algorithm for linear systems that build on the dual mode formulation with guaranteed stability and low complexity suitable for implementation in real time safety critical systems. To reduce the computational burden of nonlinear model predictive control we propose a method to handle the nonlinear constraints, using a set of dynamically generated local inner polytopic approximations. The main benefit of the proposed method is that while computationally cheap it still can guarantee recursive feasibility and convergence. An alternative to deriving MPC algorithms with guaranteed stability properties is to analyze the closed loop stability, post design. Here we focus on deriving a tool based on Mixed Integer Linear Programming for analysis of the closed loop stability and robust stability of linear systems controlled with MPC controllers. To test the performance of model predictive control for a real world example we design and implement a standard MPC controller in the development simulator for the JAS 39 Gripen aircraft at Saab Aeronautics. This part of the thesis focuses on practical and tuning aspects of designing MPC controllers for fighter aircraft. Finally we have compared the MPC design with an alternative approach to maneuver limiting using a command governor.

Data Disclosure Moritz Hennemann, Kai von Lewinski, Daniela Wawra, Thomas Widjaja, 2023-04-26 Data has become a key factor for the competitiveness of private and state actors alike. Personal data in particular fuels manifold corresponding data ecosystems - in many cases based on the disclosure decision of an individual. This volume presents the proceedings of the bidt Vectors of Data Disclosure conference held in Munich 2022. The contributions give comparative insights into the data disclosure process - combining perspectives of law, cultural studies, and business information systems. The authors thereby tackle the question in which way regulation and cultural settings shape (or do not shape) respective decisions in different parts of the world. The volume also includes interim results of the corresponding bidt research project - including in-depth reports covering the regulatory and cultural dimensions of data disclosure in eight different countries / regions

worldwide, a business information systems model of the disclosure decision process, and empirical studies. The volume thereby lays the ground for interdisciplinary informed policy decisions and gives guidance to stakeholders.

Reusable Elastomeric Respirators in Health Care National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Sciences Policy, Committee on the Use of Elastomeric Respirators in Health Care, 2019-04-15 Protecting the health and safety of health care workers is vital to the health of each of us. Preparing for and responding to a future influenza pandemic or to a sustained outbreak of an airborne transmissible disease requires a high-level commitment to respiratory protection for health care workers across the wide range of settings in which they work and the jobs that they perform. Keeping health care workers healthy is an ethical commitment both in terms of addressing the occupational risks faced by health care workers and of providing for the continuity of patient care and services needed to maintain the health of individuals and communities. During a public health emergency, challenges will arise concerning the availability of respiratory protective devices (i.e., respirators). Reusable respirators (specifically, reusable half-facepiece elastomeric respirators) are the standard respiratory protection device used in many industries, and they provide an option for use in health care that has to date not been fully explored. The durability and reusability of elastomeric respirators make them desirable for stockpiling for emergencies, where the need for large volumes of respirators can be anticipated. However, they are used infrequently in health care. Reusable Elastomeric Respirators in Health Care explores the potential for the use of elastomeric respirators in the U.S. health care system with a focus on the economic, policy, and implementation challenges and opportunities. This report examines the practicability of elastomeric use in health care on a routine basis and during an influenza pandemic or other large aerosol-transmissible outbreak, when demand for respiratory protective devices by U.S. health care personnel may be larger than domestic supplies. The report also addresses the issues regarding emergency stockpile management of elastomeric respiratory protective devices.

road transport industry for more than 40 years, gaining 'hands'on' road haulage and logistics experience and a detailed knowledge of UK and EU transport law. He is the author of The Transport Manager's and Operator's Handbook now in it's 31st year of publication, and has written many other books, guides, study manuals and magazine articles on transport and logistics. He is an active member for the Chartered Institute of Logistics and Transport and is Champion of the Institute's Freight Transport Special Interest Group. He is also a Liveryman of the Worshipful Company of Carmen and a Freeman of the City of London. Freight transport and logistics operations have become so technically sophisticated that a whole language of generic terms, jargon, abbreviations and managements to say nothing of the legal terms and definitions, has been generated. Vehicle manufacturers now strive to find new terms to describe technical achievements and new products, while legislators give such long titles to new regulations that they have to be identified with acronyms. Furthermore, recent developments in logistics and supply chain concepts have spawned a plethora of management concepts and new IT terms, initials and acronyms. The aim of this dictionary is to identify these terms and, in clear unambiguous English, provide accurate descriptions and definitions. With some 3,000 terms and abbreviations and acronyms included this is the most comprehensive dictionary of its type currently available. It will prove invaluable to readers from all sectors and at all levels from students and junior staff to top management, all of whom may need to source the meaning or relevance of industry terms not generally found in standard English language dictionaries.
