Is this a new financial bubble about to burst? What role do apps like Robinhood, influencers like David Portnoy, and government stimulus checks have in this whole story? The answer is complex, but it is undeniable that something has definitely changed, and that something is access.

Watchlist Ronnie Philips,2018-11-09 ****We are the only Stock Journal to offer tracking of emotion on each day!**** The Professional's Stock Watch Journal is a labor of love with an interesting history. For twenty years, I watched my husband track his watch list, buys, sells and emotional moods on scraps of paper, napkins and business cards. While there were plenty of apps available to track these things, none of them ever game him the options that he needed. Most were too robust, and none had any emotional tracking available. Hence, The Professional's Stock Watch Journal was born to capture the things most important to a man who trades for the love of trading, not as a full time job. The Watchlist captures the day, date and up to 20 stocks, along with Entry, Exit and Analysis space for each. It also has open space for capturing notes or thoughts. The Buys page captures the Stock, Entry, Stop and Target for each. Most importantly, each Buys page allows you to capture your emotional mood that day -Bearish, Neutral or Bullish. Use these mood ratings, along with your tracking to look back and reflect on why you made the purchases you did, and learn how your emotions can impact your stock purchases and decisions. Genetic Algorithms and Applications for Stock Trading Optimization Kapoor, Vivek,Dey, Shubhamoy,2021-06-25 Genetic algorithms (GAs) are based on Darwin's theory of natural selection and survival of the fittest. They are designed to competently look for solutions to big and multifaceted problems. Genetic algorithms are wide groups of interrelated events with divided steps. Each step has dissimilarities, which leads to a broad range of connected actions. Genetic algorithms are used to improve trading systems, such as to optimize a trading rule or parameters of a predefined multiple indicator market trading system. Genetic Algorithms and Applications for Stock Trading Optimization is a complete reference source to genetic algorithms that explains how they might be used to find trading strategies, as well as their use in search and optimization. It covers the functions of genetic algorithms internally, computer implementation of pseudo-code of genetic algorithms in C++, technical analysis for stock market forecasting, and research outcomes that apply in the stock trading system. This book is ideal for computer scientists, IT specialists, data scientists, managers, executives, professionals, academicians, researchers, graduate-level programs, research programs, and post-graduate students of engineering and science.
