Google Earth 2017: Learning the Essentials Dale Michelson,2017-08-03 Google Earth is a geographic browser or geobrowser which means that it can access images from satellites, the air, ocean, and other geographical data by using the internet. It represents the Earth as a three-dimensional globe. In simpler terms, it is a computer program that uses satellite imagery to provide a representation of the earth. It was first released on June 11, 2001. Subsequent versions were released thereafter, including the most recent version called Google Earth Update. Google Earth displays satellite imagery of the Earth's surface so that users can view cities, oceans, and pretty much almost all of the earth in 3D, or three dimensions. Users can also add their own data and make them available. There are many other things that users can do with Google Earth, and they will be mentioned further on in the book.

Since its first publication in 2007, The Photographer's Eye has established itself as the essential work on this subject, and a key book for modern photographers, with hundreds of thousands of copies sold. It explores all the traditional approaches to composition and design and, crucially, also covers digital possibilities like stitching and HDR. All-new digital reproduction, not available when the book first came out, gives the author's photography a fresh new look, while retaining the know-how that has given a generation of photographers new purpose.

Jon Rafman Joanne McNeil,Sohrab Mohebbi,2016 Nine Eyes documents screen captures taken from Google Street View. In 2007 Google began adding street views to its maps, photographs taken by a worldwide fleet of hybrid electric automobiles, each one bearing a nine-lensed camera mounted on a rooftop pole. This clothbound volume includes images from The Nine Eyes of Google Street View, an ongoing project by artist, filmmaker and essayist Jon Rafman (born 1981), whose work explores the impact of technology on consciousness. The photographs range from the beautifully symmetrical to the disturbingly violent--each, in some way, an extraordinary moment captured forever through a mapping service. Rafman's project reveals that while the world as presented by Google appears to be truthful and transparent, this way of photographing creates a cultural text like any other, a structured and structuring space whose codes and meaning the artist can assist in constructing and deciphering.
