Cooperation in the European Mountains: The Caucasus Martin F. Price,1999 Cooperation at the scale of entire mountain ranges, whether through formal agreements or regional institutions, is widely acknowledged to be desirable. The Caucasus, generally better known for conflict than cooperation, is a major centre of biological, landscape, and cultural diversity. Appropriate mechanisms to maintain and foster these various types of diversity - which are intricately linked - are urgently needed and as first step, this report gives an overview of the region and details of existing structures for cooperation at all levels.

Candy Girl Diablo Cody,2005-12-29 Decreed by David Letterman (tongue in cheek) on CBS TV's The Late Show to be the pick of "Dave's Book Club 2006," Candy Girl is the story of a young writer who dared to bare it all as a stripper. At the age of twenty-four, Diablo Cody decided there had to be more to life than typing copy at an ad agency. She soon managed to find inspiration from a most unlikely source— amateur night at the seedy Skyway Lounge. While she doesn't take home the prize that night, Diablo discovers to her surprise the act of stripping is an absolute thrill. This is Diablo's captivating fish-out-of-water story of her yearlong walk on the wild side, from quiet gentlemen's clubs to multilevel sex palaces and glassed-in peep shows. In witty prose she gives readers a behind-the-scenes look at this industry through a writer's keen eye, chronicling her descent into the skin trade and the effect it had on her self-image and her relationship with her now husband.

The Ecology of Marine Fishes Dr. Larry G. Allen,Dr. Michael H. Horn,2006-02-15 Marine fishes have been intensively studied, and some of the fundamental ideas in the science of marine ecology have emerged from the body of knowledge derived from this diverse group of organisms. This unique, authoritative, and accessible reference, compiled by 35 luminary ecologists, evolutionary biologists, and ichthyologists, provides a synthesis and interpretation of the large, often daunting, body of information on the ecology of marine fishes. The focus is on the fauna of the eastern Pacific, especially the fishes of the California coast, a group among the most diverse and best studied of all marine ecosystems. A generously illustrated and comprehensive source of information, this volume will also be an important launching pad for future research and will shed new light on the study of marine fish ecology worldwide. The contributors touch on many fields in biology, including physiology, development, genetics, behavior, ecology, and evolution. The book includes sections on the history of research, both published and unpublished data, sections on collecting techniques, and references to important earlier studies.

Parks for Life ,1994 This plan sets out the policies and actions needed to ensure an adequate, effective and well-managed network of protected areas in Europe. It outlines how potential areas should be integrated with other sectors, such as agriculture, forestry and tourism; sets out priorities at European, sub-regional and national level; proposes actions to strengthen the legal framework, planning and management of Europe's protected areas, and explains how to create the public support necessary for success. Over 200 individuals and institutions have contributed to what has become IUCN's largest-ever exercise in regional collaboration between government agencies, NGOs and the individual staff of protected areas.

Beautiful Bastard Christina Lauren,2013-02-12 An ambitious intern. A perfectionist executive. And a whole lot of name calling. Discover the story that garnered more than two million reads online. Whip-smart, hardworking, and on her way to an MBA, Chloe Mills has only one problem: her boss, Bennett Ryan. He's exacting, blunt, inconsiderate—and completely irresistible. A Beautiful Bastard. Bennett has returned to Chicago from France to take a vital role in his family's massive media business. He never expected that the assistant who'd been helping him from abroad was the gorgeous, innocently provocative—completely infuriating—creature he now has to see every day. Despite the rumors, he's never been one for a workplace hookup. But Chloe's so tempting he's willing to bend the rules—or outright smash them—if it means he can have her. All over the office As their appetites for one another increase to a breaking point, Bennett and Chloe must decide exactly what they're willing to lose in order to win each other. Originally only available online as The Office by tby789—and garnering over 2 million reads on fanfiction sites—Beautiful Bastard has been extensively updated for re-release.

Intertidal Fishes Michael H. Horn,Karen L.M Martin,Michael A. Chotkowski,1998-11-03 Intertidal Fishes describes the fishes inhabiting the narrow strip of habitat between the high and low tide marks along the rocky coastlines of the world. It analyzes the specialized traits of these fishes that have adapted to living in the dynamic and challenging space where they are alternately exposed to the air and submerged in water with the ebb and flow of the tides. This book provides a comprehensive account of fishes largely overlooked in many previous studies of intertidal organisms and emphasizes how they differ from fishes living in other deeper-water habitats. Coverage includes air breathing, movements and homing, sensory systems, spawning and parental care, feeding habits, community structure, systematic relationships, distribution patterns, and the fossil record in the intertidal zone. Written by an international team of 21 experts on intertidal fish biology Worldwide coverage of intertidal fishes Comprehensive phylogenetic listing of all fish families with intertidal members Global biogeographic analysis involving over 700 species from 86 sites Outlines field and laboratory methods pertinent to studying intertidal fishes Thorough ecological coverage with chapters on vertical distribution, movements and homing, reproduction, feeding, and community structure Covers the physiology of aerial and aquatic respiration, osmoregulation, and sensory systems
