"Clarke and Baxter have mastered the art of saving the world in blockbuster style."—Entertainment Weekly Returned to the Earth of 2037 by the mysterious and powerful Firstborn, Bisesa Dutt is haunted by memories of her five years spent on the strange alternate Earth called Mir, a jigsaw-puzzle world made up of lands and people cut out of different eras of Earth's history. Why did the Firstborn create Mir? Why was Bisesa taken there and then brought back just a day after her disappearance? Bisesa's questions are answered when scientists discover an unnatural anomaly in the sun's core—evidence of alien intervention more than two thousand years ago. Now plans set in motion by inscrutable observers light-years away are coming to fruition in a sunstorm designed to eradicate all life on Earth in a bombardment of radiation. As the apocalypse looms, religious and political differences on Earth threaten to undermine every countereffort. And all the while, the Firstborn are watching. . . . Praise for Sunstorm "An absolute must for science fiction fans."—All Things Considered, NPR "Enthralling . . . highly satisfying."—The New York Times Book Review "Will keep readers turning pages."—Publishers Weekly

Sunstorm Milo L. Thompson, 2017-05-18 The heat wave came on without warning. Temperatures rose without letup. Telephone lines sagged and broke. Concrete highways split apart. Asphalt

became like quicksand. Cars stalled. Trucks couldn't start. Rail lines buckled. Air flights were cancelled. Everyone searched for some place -- any place -- to get out of the ever-increasing heat. A few found shelter in a hospital which thankfully had a generator that was still working. But quickly they ran out of food. The water became undrinkable. Then the generator stalled. But there had to be some way to survive in heat rising beyond what any human can endure.

Firstborn Arthur C. Clarke, Stephen Baxter, 2008-10-28 The Firstborn--the mysterious race of aliens who first became known to science fiction fans as the builders of the iconic black monolith in 2001: A Space Odyssey--have inhabited legendary master of science fiction Sir Arthur C. Clarke's writing for decades. With *Time's Eye* and *Sunstorm*, the first two books in their acclaimed Time Odyssey series, Clarke and his brilliant co-author Stephen Baxter imagined a near-future in which the Firstborn seek to stop the advance of human civilization by employing a technology indistinguishable from magic. Their first act was the Discontinuity, in which Earth was carved into sections from different eras of history, restitched into a patchwork world, and renamed Mir. Mir's inhabitants included such notables as Alexander the Great, Genghis Khan, and United Nations peacekeeper Bisesa Dutt. For reasons unknown to her, Bisesa entered into communication with an alien artifact of inscrutable purpose and godlike power--a power that eventually returned her to Earth. There, she played an instrumental role in humanity's race against time to stop a doomsday event: a massive solar storm triggered by the alien Firstborn designed to eradicate all life from the planet. That fate was averted at an inconceivable price. Now, twenty-seven years later, the Firstborn are back. This time, they are pulling no punches: They have sent a "quantum bomb." Speeding toward Earth, it is a device that human scientists can barely comprehend, that cannot be stopped or destroyed--and one that will obliterate Earth. Bisesa's desperate quest for answers sends her first to Mars

and then to Mir, which is itself threatened with extinction. The end seems inevitable. But as shocking new insights emerge into the nature of the Firstborn and their chilling plans for mankind, an unexpected ally appears from light-years away.

The Savage Altar Asa Larsson,2008-02-07 'A breath of fresh cold air . . . a dangerous edge to gladden fans of Lisbeth Salander' Boyd Tonkin The first in the Rebecka Martinsson series from the million-book bestselling author, for fans of Stieg Larsson, *The Bridge* and *The Killing* TV series. A church in the glittering frozen wastes of northern Sweden. Inside, a sacrifice: the body of a man - slashed to pieces, hands severed, eyes gouged out. Can Rebecka dig beneath the surface of the community that she once fled, and find the truth? 'A chilling plot knee-deep in blood-spattered snow' Jim Kelly 'A labyrinthine conspiracy, superlative storytelling'

One Sun Storm Endi Bogue Hartigan, 2008 Winner of the 2008 Colorado Prize for Poetry Published by the Center for Literary Publishing at Colorado State University Endi Bogue Hartigan's poems are enveloping: one is immersed in experiences of ice drifts, orange peels, and the striving toward a clarity (Let us be clear, one poem reiterates) that crystallizes and then evaporates. Subjects and objects are beautifully combined and confused through repetitions both musical and mysterious; each separate thing helps to form the existence of another. A reader is drawn into a process of thinking - a kind of sifting and sorting - ambitious for the large world that is always beyond one's grasp. *One Sun Storm* is not a mere collection, but a total project in which each poem is part of the whole. The passing by of the pieces of this created world engenders gratitude and awe. - Martha Ronk, final judge and author of *Vertigo, In a Landscape of Having to Repeat, and Why/Why Not*

Time's Eye Arthur C. Clarke, Stephen Baxter, 2010-06-10 A stunning new companion series to 2001 A SPACE ODYSSEY from the world's most important SF writer and his acknowledged heir 1885, the North West Frontier. Rudyard Kipling is witness to a bizarre encounter between the British army and what appears to be an impossibly advanced piece of Russian technology. And then to a terrifying intervention by a helicopter from 2037. Before the full impact of this extraordinary event has even begun to sink in, Kipling, his friends and the helicopter crew stumble across Alexander the Great's army. Mankind's time odyssey has begun. It is a journey that will see Alexander avoid his premature death and carve out an Empire that expands from Carthage to China, beating the time-slipped army of Ghenghis Khan in a battle outside the ruins of Babylon in the process. And it will present mankind with two devastating truths. Aliens are amongst us and have been manipulating our past and our future. And that future extends only

as far as 2037, for that is the date Earth will be destroyed. This is SF that spans countless centuries and carries cutting edge ideas on time travel and alien intervention. It shows two of the genre's masters at their groundbreaking best.

The Blood Spilt Asa Larsson, 2007-01-30 It's midsummer in Sweden—when the light lingers through dawn and a long, isolating winter finally comes to an end. In this magical time, a brutal killer has chosen to strike. A female priest—who made enemies and acolytes in equal number—has been found hanging in her church. And a big-city lawyer quite acquainted with death enters the scene as police and parishioners try to pick up the pieces.... Not long ago, attorney Rebecka Martinsson had to kill three men in order to stop an eerily similar murder spree—one that also involved a priest. Now she is back in Kiruna, the region of her birth, while a determined policewoman gnaws on the case and people who loved or loathed the victim mourn or revel in her demise. The further Rebecka is drawn into the mystery—a mystery that will soon take another victim—the more the dead woman's world clutches her: a world of hurt and healing, sin and sexuality, and, above all, of sacrifice. In prose that is both lyrical and visceral, Åsa Larsson has crafted a novel of pure entertainment, a taut, atmospheric mystery that will hold you in thrall until the last, unforgettable page is turned

Novajocks Kirby Ulrey, 2006-07-03 AS IF RACING WASN'T DANGEROUS ENOUGH Derrick Matthews is among the select few aerocar racers eligible to participate in the North American Championship Circuit, touted as the Nextel Cup of aerocar racing. consortium of shady corporations plan to use the NACC as a bargaining counter to gain control of the fledgling fusion industry. All he wants is to be left alone on his Montana acreage to pursue his dream of being a beekeeper. But when his old mentor convinces him to help retrieve a stolen solar panel, he thinks it will be a simple job. But the moment he sets eyes on Marie, he knows their assignment is all kinds of wrong. Together, they escape. Chased by a businessman with unlimited resources, a gunman and a corrupt police force, they are thrust into the frozen Montana landscape. Midnight, Water City Chris McKinney, 2021-07-13 Hawai'i author Chris McKinney's first entry in a brilliant new sci-fi noir trilogy explores the sordid past of a murdered scientist, deified in death, through the eyes of a man who once committed unspeakable crimes for her. Year 2142: Earth is forty years past a near-collision with the asteroid Sessho-seki. Akira Kimura, the scientist responsible for eliminating the threat, has reached heights of celebrity approaching deification. But now, Akira feels her safety is under threat, so after years without contact, she reaches out to her former head of security, who has since become

a police detective. When he arrives at her deep-sea home and finds Akira methodically dismembered, this detective will risk everything—his career, his family, even his own life—and delve back into his shared past with Akira to find her killer. With a rich, cinematic voice and burning cynicism, *Midnight, Water City* is both a thrilling neo-noir procedural and a stunning exploration of research, class, climate change, the cult of personality, and the dark sacrifices we are willing to make in the name of progress.

A Sense-of-Wonderful Century Gary Westfahl, 2013-07-30

This book gathers together many of the illuminating essays on science fiction and fantasy film penned by a major critic in the SF field. The pieces are roughly organized in the chronological order of when the movies and television programs being discussed first appeared, with essays providing more general overviews clustered near the beginning and end of the volume, to provide the overall aura of a historical survey. Although this book does not pretend to provide a comprehensive history of science fiction and fantasy films, it does intermingle analyses of films and TV programs with some discussions of related plays, novels, stories, and comic books, particularly in the essays on *This Island Earth* and *2001: A Space Odyssey* and its sequels. Inciteful, entertaining, and full of intelligent and witty observations about science fiction and its sometimes curious relationship with the visual media, these essays will both delight and entertain critics, fans, and viewers alike.
