Goyal,2022-05-30 We present to you Moto, a smart, multi-functional virtual assistant that can easily be customized to cater the needs of the user, helping them multitask and get things done. As an exemplification if you're a software developer or a new to coding, Project Zenith can act as your coding assistant like it can create classes or functions for you at your command. It can also open basic coding related apps or websites like PyCharm, stack overflow, vs code etc and if that's not enough our voice assistant can lighten up your mood with some programming jokes. Apart from these developer specific features our voice assistant can perform a wide variety of tasks from various domains. Be it some general tasks like automating emails and WhatsApp or fun feature like horror pranks and even checking you and your partner's compatibility on Love Calculator. Jokes aside, Moto also has some real-life applications which are very relevant in today's times like Face Mask detection using TensorFlow and Facial Recognition. Our bot can do all the redundant and monotonous tasks like searching for topic on the internet, typing emails, writing boilerplate code, browsing multiple websites etc along with a set of many super-fluon's tasks, that consume the user's precious time, that otherwise could be utilized in doing some productive work. Along with several usual features found in most of the voice assistants in the market, our assistant has certain unique and state-of-the-art features like face recognition, human mood recognition, facemask-recognition, coding-helper, social-media automation, shopping automation, Messaging and Music Automation etc, that make our project in competition with the other commercial products in the market. Some downfalls of our project include,

slight increase in the latency of speech recognition and also errors in the precision of the recognised speech. In conclusion, Project Zenith is still in need of a few improvements and since the project is based on open-source architecture, we expect that these issues will be resolved soon in the future.
