Science and Empires P. Petitjean,Cathérine Jami,A.M. Moulin,2012-12-06 SCIENCE AND EMPIRES: FROM THE INTERNATIONAL COLLOQUIUM TO THE BOOK Patrick PETITJEAN, Catherine JAMI and Anne Marie MOULIN The International Colloquium Science and Empires - Historical Studies about Scientific Development and European Expansion is the product of an International Colloquium, Sciences and Empires - A Comparative History of Scientific Exchanges: European Expansion and Scientific Development in Asian, African, American and Oceanian Countries. Organized by the REHSEIS group (Research on Epistemology and History of Exact Sciences and Scientific Institutions) of CNRS (National Center for Scientific Research), the colloquium was held from 3 to 6 April 1990 in the UNESCO building in Paris. This colloquium was an idea of Professor Roshdi Rashed who initiated this field of studies in France some years ago, and proposed Sciences and Empires as one of the main research programmes for the The project to organize such a colloquium was a bit REHSEIS group. of a gamble. Its subject, reflected in the title Sciences and Empires, is not a currently-accepted sub-discipline of the history of science; rather, it refers to a set of questions which found autonomy only recently. The terminology was strongly debated by the participants and, as is frequently suggested in this book, awaits fuller clarification.

Safe Abortion Organisation mondiale de la santé,World Health Organization,WHO,World Health Organisation Staff,2003-05-13 At a UN General Assembly Special Session in 1999, governments recognised unsafe abortion as a major public health concern, and pledged their commitment to reduce the need for abortion through expanded and improved family planning services, as well as ensure abortion services should be safe and accessible. This technical and policy guidance provides a comprehensive overview of the many actions that can be taken in health systems to ensure that women have access to good quality abortion services as allowed by law.

Les racines bibliques de l'imaginaire des pandémies David Hamidovic,2020-09-24 Les crises sanitaires perçues dans l'Antiquité peuvent nous donner quelques pistes de compréhension de la crise sanitaire que nous venons de vivre. L'historien David Hamidovic montre que chaque civilisation entretient son propre rapport à la mort, son propre imaginaire issu d'un long et lent processus culturel. Cet imaginaire à l'oeuvre s'appuie en partie sur des ressorts très anciens. Le Moyen Âge occidental a fourni la matrice à la perception européenne des crises sanitaires à cause de différentes épidémies dévastatrices. Mais cette perception n'est pas née en Europe au Moyen Âge. Elle repose en grande partie sur un héritage venu du Proche-Orient ancien, notamment la culture biblique prenant place dans le judaïsme ancien et le christianisme primitif. Comprendre la nature de cet héritage, c'est connaître l'imaginaire contemporain à l'oeuvre pour le mettre à distance. Comprendre notre imaginaire de la crise sanitaire, c'est aussi pouvoir agir sur celle-ci.

China's New Sources of Economic Growth: Vol. 1 Ligang Song,Ross Garnaut,Cai Fang,Lauren Johnston,2016-07-21 China's change to a new model of growth, now called the 'new normal', was always going to be hard. Events over the past year show how hard it is. The attempts to moderate the extremes of high investment and low consumption, the correction of overcapacity in the heavy industries that were the mainstays of the old model of growth, the hauling in of the immense debt hangover from the fiscal and monetary expansion that pulled China out of the Great Crash of 2008 would all have been hard at any time. They are harder when changes in economic policy and structure coincide with stagnation in global trade and rising protectionist sentiment in developed countries, extraordinarily rapid demographic change and recognition of the urgency of easing the environmental damage from the old model. China's economy has slowed and there are worries that the authorities will not be able to contain the slowdown within preferred limits. This year's Update explores the challenge of the slowdown in growth and the change in economic structure. Leading experts on China's economy and environment review change within China's new model of growth, and its interaction with ageing, environmental pressure, new patterns of urbanisation, and debt problems at different levels of government. It illuminates some new developments in China's economy, including the transformational potential of internet banking, and the dynamics of financial market instability. China's economic development since 1978 is full of exciting change, and this year's China Update is again the way to know it as it is happening.
