In Bytes We Travel Hsin Hsin Lin,1997-12-04 In bits we marvel, in bytes we travel, this is a book written by a techie, Lin Hsin Hsin, which describes, navigates and encapsulates life in the cyberspace in five chapters: Net Life, Net.Net, Net Art, World Wide Web and NetFuture.It is here we savor the lifestyle of geeks and nerds, the cyber “kindwunders” and hear the voices of Netizens tunnelling through email. As we aspire and perspire in e-commerce, this book tells us how the author observed e-fraud and e-crimes that murder. Check out her views of aesthetics on the Net in the Net Art. In Net.Net, watch how she poetically portrays the beauty of firewall and protocols, and feel her frustration when a line drops. However, move on to the World Wide Web, pause and navigate together. As we look further, she asks “can we be cyberly-punctured?” As we wonder, this chapter offers a glimpse into the NetFuture. Whatever the case, as we nurture and mature in cyberspace, these are the bytes she has unraveled, hoping that you DON'T EVER miss this witty, humorous, unprecedented, unique 100-poems Net savvy poetry recital, sandwiched with the most lucid and sparkling images graphically created by the author in between chapters!

Kid Athletes David Stabler,2015-11-17 Hilarious childhood biographies and full-color illustrations show how Tiger Woods, Gabby Douglas, Bruce Lee, Billie Jean King, and other budding sports champions faced kid-sized challenges growing up. Forget the gold medals, the championships, and the undefeated seasons. When all-star athletes were growing up, they had regular-kid problems just like you. Baseball legend Babe Ruth was such a troublemaker, his family sent him to reform school. Race car champion Danica Patrick fended off bullies who told her “girls can’t drive.” And football superstar Peyton Manning was forced to dance the tango in his school play. Kid Athletes tells all of their stories and more with full-color cartoon illustrations on every page. Other subjects include Billie Jean King, Jackie Robinson, Yao Ming, Gabby Douglas, Tiger Woods, Julie Krone, Bruce Lee, Muhammad Ali, Bobby Orr, Lionel Messi, and more!

The Historical Archaeology of Shadow and Intimate Economies James A. Nyman,Kevin R. Fogle,Mary C. Beaudry,2019-06-03 Emphasizing the important social relationships that form among people who participate in small-scale economic transactions, contributors to this volume explore often-overlooked networks of intimate and shadow economies—terms used to describe trade that takes place outside formal market

systems. Case studies from a variety of historical contexts around the world reveal the ways such transactions created community and identity, subverted class and power relations, and helped people adapt to new social realities. In Maine, woven baskets sold by Native American artisans to Euroamerican consumers supported Native strategies for cultural survival and agency. Alcohol exchanged by Scandinavian merchants for furs and skins enabled their indigenous trading partners to expand social webs that contested colonialism. Moonshine production in Appalachia was an integral part of economic exchanges in isolated mountain communities. Caribbean and American plantations contain evidence of interactions, exchanges, and attachments between enslaved communities and poor whites that defied established racial boundaries. From brothel workers in Boston to seal hunters in Antarctica, the examples in this volume show how historical archaeologists can use the concept of intimate economies to uncover deeply meaningful connections that exist beyond the traditional framework of global capitalism.

Tangible Modeling with Open Source GIS Anna Petrasova, Brendan Harmon, Vaclav Petras, Payam Tabrizian, Helena Mitsova, 2018-05-11 This book provides an overview of the latest developments in the fast growing field of tangible user interfaces. It presents a new type of modeling environment where the users interact with geospatial data and simulations using 3D physical landscape model coupled with 3D rendering engine. Multiple users can modify the physical model, while it is being scanned, providing input for geospatial analysis and simulations. The results are then visualized by projecting images or animations back on the physical model while photorealistic renderings of human views are displayed on a computer screen or in a virtual reality headset. New techniques and software which couple the hardware set-up with open source GRASS GIS and Blender rendering engine, make the system instantly applicable to a wide range of applications in geoscience education, landscape design, computer games, stakeholder engagement, and many others. This second edition introduces a new more powerful version of the tangible modeling environment with multiple types of interaction, including polymeric sand molding, placement of markers, and delineation of areas using colored felt patches. Chapters on coupling tangible interaction with 3D rendering engine and immersive virtual environment, and a case study integrating the tools presented throughout this book, demonstrate the second generation of the system - Immersive Tangible Landscape - that enhances the modeling and design process through interactive rendering of modeled landscape. This book explains main components of Immersive Tangible Landscape System, and provides the basic workflows for running the applications. The fundamentals of the system are followed by series of example applications in geomorphometry, hydrology, coastal and fluvial flooding, fire spread, landscape and park design, solar energy, trail planning, and others. Graduate and undergraduate students and educators in geospatial science, earth science, landscape architecture, computer graphics and games, natural resources and many others disciplines, will find this book useful as a reference or secondary textbook. Researchers who want to build and further develop the system will most likely be the core audience, but also anybody interested in geospatial modeling applications (hazard risk management, hydrology, solar energy, coastal and fluvial flooding, fire spread, landscape and park design) will want to purchase this book.

GIS-based Analysis of Coastal Lidar Time-Series Eric Hardin, Helena Mitsova, Laura Tateosian, Margery Overton, 2014-09-12 This SpringerBrief presents the principles, methods, and workflows for processing and analyzing coastal LiDAR data time-series. Robust methods for computing high resolution digital elevation models (DEMs) are introduced as well as raster-based metrics for assessment of topographic change. An innovative approach to feature extraction and measurement of feature migration is followed by methods for estimating volume change and sand redistribution mapping. Simple methods for potential storm impacts and inundation pattern analysis are also covered, along with visualization techniques to support analysis of coastal terrain feature and surface dynamics. Hands-on examples in GRASS GIS and python scripts are provided for each type of analysis and visualization using public LiDAR data time-series. GIS-based Analysis of Coastal Lidar Time-Series is ideal for professors and researchers in GIS and earth sciences. Advanced-level students interested in computer applications and engineering will also find this brief a valuable resource.

I Know You Annabel Kantaria, 2019-06-11 A twisted domestic thriller in the vein of B. A. Paris and Shari Lapena that asks: How well do you know your friends? That picture you posted? I've seen it. That location you tagged? I've been there. I know everything about your life . . . And I'm going to destroy it. A recent transplant from sunny California, life in the London suburbs is not what Taylor Watson expected. Far from the West End shops and city lights she imagined, she finds herself pregnant and lonely, with a husband frequently away on business and only social media to keep her company. It's only after Taylor joins a book club and a walking group, that she finally starts to make some real-life friends. Before long, Taylor's hanging out with Anna, Sarah, Simon, and Caroline but, as her pregnancy progresses and her friendships blossom, a sense of unease develops. Nothing's ever quite as it seems on the surface, and it soon becomes clear that Taylor's new friends have secrets. One appears to be after Taylor's husband, another's always putting her down, and then there's the question of Simon. Could he have feelings for Taylor? But far more worryingly, one of the group's not being too careful what they post on social media—and another is watching all too closely. Who's stalking who . . . and why?

Island of the Blue Dolphins Scott O'Dell,1960 Far off the coast of California looms a harsh rock known as the island of San Nicholas. Dolphins flash in the blue waters around it, sea otter play in the vast kep beds, and sea elephants loll on the stony beaches. Here, in the early 1800s, according to history, an Indian girl spent eighteen years alone, and this beautifully written novel is her story. It is a romantic adventure filled with drama and heartache, for not only was mere subsistence on so desolate a spot a near miracle, but Karana had to contend with the ferocious pack of wild dogs that had killed her younger brother, constantly guard against the Aleutian sea otter hunters, and maintain a precarious food supply. More than this, it is an adventure of the spirit that will haunt the reader long after the book has been put down. Karana's quiet courage, her Indian self-reliance and acceptance of fate, transform what to many would have been a devastating ordeal into an uplifting experience. From loneliness and terror come strength and serenity in this Newbery Medal-winning classic.
