Transport Planning and Traffic Engineering Coleman O'Flaherty,1997 Transport Planning and Traffic Engineering is a comprehensive textbook on principles and practice. It includes sections on transport policy and planning, traffic surveys and accident investigation, road design for capacity and safety, and traffic management. Clearly written and illustrated, the book is ideal reading for students of transport, transport planning, traffic engineering

and road design. Written by senior academics in the field of transport, it is a worthy successor to the widely acclaimed first volume of O'Flaherty's Highways. The content has been expanded and thoroughly updated to reflect the many changes that have taken place in this topical area.

*Sydney's Century* Peter Spearritt, 2000 In this lively portrait of Sydney's development, Peter Spearritt traces a century in the life of the city - from the celebrations of the Federation of Australia in 1901 to the 2000 Olympic Games. He describes the extra-ordinary growth of the city and its sprawling suburbs, and the transition from a port and a manufacturing center to an international financial hub.
