Advances in Digital Forensics XII Gilbert Peterson, Sujeet

Shenoi, 2016-09-19 Digital forensics deals with the acquisition, preservation, examination, analysis and presentation of electronic evidence. Networked computing, wireless communications and portable electronic devices have expanded the role of digital forensics beyond traditional computer crime investigations. Practically every crime now involves some aspect of digital evidence; digital forensics provides the techniques and tools to articulate this evidence. Digital forensics also has myriad intelligence applications. Furthermore, it has a vital role in information assurance -- investigations of security breaches yield valuable information that can be used to design more secure systems. **Advances in Digital Forensics XII** describes original research results and innovative applications in the discipline of digital forensics. In addition, it highlights some of the major technical and legal issues related to digital evidence and electronic crime investigations. The areas of coverage include: Themes and Issues, Mobile Device Forensics, Network Forensics, Cloud Forensics, Social Media Forensics, Image Forensics, Forensic Techniques, and Forensic Tools. This book is the twelfth volume in the annual series produced by the International Federation for Information Processing (IFIP) Working Group 11.9 on Digital Forensics, an international community of scientists, engineers and practitioners dedicated to advancing the state of the art of research and practice in digital forensics. The book contains a selection of twenty edited papers from the Twelfth Annual IFIP WG 11.9 International Conference on Digital Forensics, held in New Delhi, India in the winter of 2016. **Advances in Digital Forensics XII** is an important resource for researchers, faculty members and graduate students, as well as for practitioners and individuals engaged

in research and development efforts for the law enforcement and intelligence communities. Gilbert Peterson, Chair, IFIP WG 11.9 on Digital Forensics, is a Professor of Computer Engineering at the Air Force Institute of Technology, Wright-Patterson Air Force Base, Ohio, USA. Sujeet Shenoi is the F.P. Walter Professor of Computer Science and a Professor of Chemical Engineering at the University of Tulsa, Tulsa, Oklahoma, USA.

HTML and CSS Web Standards Solutions Nicklas

Persson,Christopher Murphy,2010-08-06 This book will teach you how to build hand-crafted web pages the Web Standardistas way: using well-structured XHTML for content and CSS for presentation.

By embracing a web standards approach, you will hold the key to creating web sites that not only look great in all modern browsers, but also are accessible to a wide variety of audiences across a range of platforms—from those browsing on everyday computers, to those accessing the Web on the latest emerging mobile devices. Even if you're an absolute beginner in web design, this book will teach you how to build future-proof web pages the right way using easy-to-master tools which are, in most cases, free. Through 14 easy-to-follow chapters, we introduce you to the fundamentals of contemporary web design practice. Step by step we'll assemble well-structured XHTML webpages, which we'll then style using handcrafted CSS. By the end of the book, you'll have a firm knowledge of the essentials of web design: everything you need to know to move forward in your lifelong journey as a Web Standardista. To equip you on this noble quest, we've included enjoyable practical assignments at the end of each chapter. Embracing these challenges will not only teach you how to create great looking web sites that are the envy of your peers, but also equip you with an unrivaled knowledge of monkeys that journeyed to space and apes that starred in the movies—the real stars of this book. On completion of this book not only will you be able to create well-crafted web sites, but you will have earned the badge of a Web Standardista, proving your worth as a good citizen of the Web.

Interactions with Search Systems Ryen W. White, 2016-03-14

Information seeking is a fundamental human activity. In the modern world, it is frequently conducted through interactions with search systems. The retrieval and comprehension of information returned by these systems is a key part of decision making and action in a broad range of settings. Advances in data availability coupled with new interaction paradigms, and mobile and cloud computing capabilities, have created a broad range of new opportunities for information access and use. In this comprehensive book for professionals, researchers, and students involved in search system design and evaluation, search expert Ryen White discusses how search systems can capitalize on new capabilities and how next-generation systems must support higher order search activities such as task completion, learning, and decision making. He outlines the implications of these changes for the evolution of search evaluation, as well as challenges that extend beyond search systems in areas such as privacy and societal benefit.
