Tāla prakāśa Bhagavataśaraṇa Śarmā,1996

Tabla & the World of Indian Rhythms Sudhish Chandra Banerjee,2006 Here at last is a book in English on the Tabla, which the world has been waiting for. Due to continuation of insulated traditions in Indian Musical Practices as well as a veil of secrecy in the closeted legacy of the Guru-Shishya Parampara, most Tabla students were prevented from learning the subject in a free and unrestricted manner. This book has two sections viz. Theory and Practice. It is lucidly written and is both systematic and understandable. It starts from the very basics to the advanced levels of Tabla in all its multi-dimensions and will prove to be an asset for any Individual, Institution, Teacher or Student who would like to teach/learn or appreciate and enjoy the Tabla in a systematic way.

Encyclopedia of Percussion John H. Beck,2013-11-26 The Encyclopedia of Percussion is an extensive guide to percussion instruments, organized for research as well as general knowledge. Focusing on idiophones and membranophones, it covers in detail both Western and non-Western percussive instruments. These include not only instruments whose usual sound is produced percussively (like snare drums and triangles), but those whose usual sound is produced concussively (like castanets and claves) or by friction (like the cuíca and the lion's roar). The expertise of contributors have been used to produce a wide-ranging list of percussion topics. The volume includes: (1) an alphabetical listing of percussion instruments and terms from around the world; (2) an extensive section of illustrations of percussion instruments; (3) thirty-five articles covering topics from Basel drumming to the xylophone; (4) a list of percussion symbols; (5) a table of percussion instruments and terms in English, French, German, and Italian; and (6) an updated section of published writings on methods for percussion.

Jack Of All Master Of One Chanakya Shukla,2021-08-11 We might have often heard of this popular old saying that a jack of all could become the master of none. This is indeed a fact, some really experienced man might have said this because he might have tried his hands in all places he could which resulted from him becoming ultimately a master in none. Whenever we read motivational quotes and motivational speeches from all the great people in the world, we are advised to focus. That means we should concentrate on doing one specific thing where we want to achieve, and it helps. In fact, I have experienced and advised my juniors to do the same. I use to tell them that now you are a beginner and find yourself nowhere but as soon you spend a decade in a skill, an industry, a field of study, a sport, a profession, a business, or simply practicing a hobby; you reach somewhere and nobody in this world can take it away from you be it anywhere on this planet or elsewhere. Teachers deliver a lecture from half an hour to more but it is always the self-study, the amount of study you do without being told by anybody; it makes you the man you want to be in the future. The teacher (or Guru) again helps you to focus on one thing while there are millions of parallel events going around the world to lose your focus and waste your time. You might find yourself succeeding in various distinct fields, yes it is very much possible. Humans can create and extend the boundaries themselves but then you often find yourself not the number one. You could be good but can't be the best in the world in everything, there is always someone practicing the same skills and getting better than you in some part of the world and it should be appreciated with acceptance. And, here what this popular saying makes sense is that the Jack of all is a Master of None. But my all-loving readers I would like to share my story here where I grew up learning this phrase in schools and from my parents. During my interaction with the portion of the world in form of the people that I met, I found this phrase made sense, and sometimes it did not. A millennial like me always look for a modification of complex things and truths of life and death to make it simple. My late father who was a businessman used to tell his employees that in this competing World one has to be an all-rounder moreover has to master one particular skill to stand out in the crowd or must say simply survive. Luckily, I was there in his office to hear him telling this to some employee. I was very young when he left this world and all of a sudden I had a different perspective on life. Cheating people, telling lies for small profits

of money, frauds, bullying, sexual exploitation, grudges over communities, body shaming, superstition, greediness, impersonation, racial discrimination, depression, and much more that exists on earth and we often ignore it while people have justifications for it. I know already there are a number of books and educating videos available out there then why I am writing this one? Because this is my journey of learning ten different skills after the death of my father and I earned a little or more amount of money utilizing these skills. I could be a victim or a guilty while all above said evils surrounding me, but I was guided well by my mentors, parents, and elders moreover, I accepted that guided path and followed it to get benefited out of it and become an example that the world could learn from, a good example probably. With changes in time and situations, now if a father teaches his son driving a car it won't make a skill worth enough to make a living. Since now most of the people work from home moreover most of the people know themselves that how to drive a car. People need to learn more skills for a better tomorrow. My father uses to take a walk with me in the evening after dinner when he uses to tell me how children make their parents proud or shamed out of their doings. I hope this reached out to him somehow in a good way. ~ CHANAKYA SHUKLA

Excursions in World Music Timothy Rommen, Bruno Nettl, 2020-09-18 Excursions in World Music is a comprehensive introductory textbook to the musics of the world, creating a panoramic experience for students by engaging the many cultures around the globe, and highlighting the sheer diversity to be experienced in the world of music. At the same time, the text illustrates the often profound ways through which a deeper exploration of these many different communities can reveal overlaps, shared horizons, and common concerns in spite of, and because of, this very diversity. The new eighth edition features six brand new chapters, including chapters on Japan, Sub-Saharan Africa, China and Taiwan, Europe, Maritime Southeast Asia, and Indigenous Peoples. General updates have been made to other chapters, replacing visuals and updating charts/statistics. Another major addition to the eighth edition is the publication of a companion Reader, entitled Critical Issues in World Music. Each chapter in the Reader is designed to introduce students to a theoretical concept or thematic area within ethnomusicology and illustrate its possibilities by pointing to case studies drawn from at least three chapters in Excursions in World Music. Chapters include the following topics: Music, Gender, and Sexuality; Music and Ritual; Coloniality and World Music; Music and Space; Music and Diaspora; Communication, Technology, Media; Musical Labor, Musical Value; and Music and Memory. Instructors can use this resource as a primary or secondary path through the materials, either assigning chapters from the textbook and then digging deeper by exploring a chapter from the Reader, or starting with a Reader chapter and then moving into the musical specifics offered in the textbook chapters. Having available both an area studies and a thematic approach to the materials offers important flexibility to instructors and also provides students with additional means of engaging with the musics of the world. A companion website with a new test bank and fully updated instructor's manual is available for instructors. Numerous resources are posted for students, including streamed audio listening, additional resources (such as links to YouTube videos or websites), a musical fundamentals essay (introducing concepts such as meter, melody, harmony, form, etc.), interactive quizzes, and flashcards.
