A Dingo Ate My Math Book: Mathematics from Down Under Burkard Polster,Marty Ross,2017-12-27 A Dingo Ate My Math Book presents ingenious, unusual, and beautiful nuggets of mathematics with a distinctly Australian flavor. It focuses, for example, on Australians' love of sports and gambling, and on Melbourne's iconic, mathematically inspired architecture. Written in a playful and humorous style, the book offers mathematical entertainment as well as a glimpse of Australian culture for the mathematically curious of all ages. This collection of engaging stories was extracted from the Maths Masters column that ran from 2007 to 2014 in Australia's Age newspaper. The maths masters in question are Burkard Polster and Marty Ross, two (immigrant) Aussie mathematicians, who each week would write about math in the news, providing a new look at old favorites, mathematical history, quirks of school mathematics—whatever took their fancy. All articles were written for a very general audience, with the intention of being as inviting as possible and assuming a minimum of mathematical background.

Dancing from the Heart Kalissa Alexeyeff,2009-03-23 Dancing from the Heart is the first study of gender, globalization, and expressive culture in the Cook Islands. It demonstrates how dance in particular plays a key role in articulating the overlapping local, regional, and transnational agendas of Cook Islanders. Kalissa Alexeyeff reconfigures conventional views of globalization’s impact on indigenous communities, moving beyond diagnoses of cultural erosion and contamination to a grounded exploration of creative agency and vital cultural production. Central to the study is a rich and textured ethnographic account of contemporary Cook Islands dance practice. Based on fieldwork, in-depth interviews, and archival research, it offers an engrossing analysis of how Cook Islands social life is generated through expressive practices. Dance is explored in a variety of settings, including beauty pageants, tourist venues, nightclubs and community celebrations at home and within Cook Islands communities abroad. Contemporary Cook Islands dance practices are also shaped by competing ideas about the past. Debates about precolonial traditions, missionization, and colonialism pervade discussions about dance and expressive culture. Alexeyeff shows how the politics of tradition reflect the competing moral, political, personal, and economic practices of postcolonial Cook Islanders. Throughout the work the stories and voices of individuals are brought to the fore. Their views are juxtaposed with scholarship on tradition, modernity, and social dynamics. Engaging and accessible, Dancing from the Heart illuminates specific and intimate aspects of Cook Islands social life while, at the same time, addressing fundamental questions within anthropology and indigenous, performance, and postcolonial studies.

Problems in Probability T. M. Mills,2001 Probability theory is an important part of contemporary mathematics. It plays a key role in the insurance industry, in the modelling of financial markets, and in statistics generally ? including all those fields of endeavour to which statistics is applied (e.g. health, physical sciences, engineering, economics). The 20th century has been an important period for the subject, because we have witnessed the development of a solid mathematical basis for the study of probability, especially from the Russian school of probability under the leadership of A N Kolmogorov. We have also seen many new applications of probability ? from applications of stochastic calculus in the financial industry to Internet gambling. At the beginning of the 21st century, the subject offers plenty of scope for theoretical developments, modern applications and computational problems. There is something for everyone in probability The notes and problems in this book have been designed to provide a basis for a series of lectures suitable for advanced undergraduate students on the subject of probability. Through problem solving, students can experience the excitement associated with probability. This activity will help them to develop their problem-solving skills, which are so valuable in today's world. The problems in the book will introduce the student to some famous works and workers in probability and convey the historical, classical and contemporary aspects of probability. A key feature of the book is that many problems are in fact small guided research projects. The research work involved in solving the problems will enhance the student's library research skills.

Mostly Guilty Michael Challenger,2021-03-01 A book for the general reader rather than lawyers, this often tongue-in-cheek account of Michael Challenger's interactions with the criminals he defends gives a first-hand account of the quirky nature of human beings. Mostly Guilty deals with the workings of the lowest level of the Australian legal system. It's about the down-to-earth cases that happen daily in Magistrates' Courts. It does so through the experiences and anecdotes of a low-flying criminal barrister. While the cases are from Victoria, the book makes reference to other states and has relevance and interest Australia-wide. The style is light, punchy and informal, with lots of direct speech and many funny yarns. Some of the book is tongue-in-cheek (and even politically incorrect) but it also makes serious points throughout. It's entertaining as well as informative. The chapters are short, and generally deal with specific offences (shop theft, for example) or areas of law (bail). Others recount particular cases in an ironic or colourful way. Most cases are of low to medium criminality so the light-hearted tone is not inappropriate. Most legal memoirs are by big-shot advocates or retired judges. Mostly Guilty is different, and doesn't take itself too seriously.

On a Roll David Grant,1994 This substantial social history explores the culture and significance of gambling. It is well presented, fully illustrated with photographs, cartoons, and memorabilia, and comprehensively end-noted and indexed. The author, a professional historian, has also written 'Out In The Cold', about conscientious objectors.
