Entrepreneurship and SME Management Across Africa Leona Achtenhagen,Ethel Brundin,2016-07-12 This book focuses on issues related to entrepreneurship and SME management on the African continent by providing insights from different conceptual, empirical and case studies. In doing so, it focuses on context-specific challenges for conducting entrepreneurial activities or business endeavors in smaller firms in the African continent. The book responds to calls for more research about African businesses given the acknowledgement of scholars, students and policy makers around the world who realize the increasing and growing economic importance of the African continent. In addition to serving as a source book for more in-depth studies by assisting the reader in gaining increased understanding of the topics covered, complementing the different parts with reviews, the book also elaborates on issues such political unrest, corruption, untrained personnel and environmental concerns. Entrepreneurship and SME Management Across Africa: Context, Challenges, Cases will be useful to academics with an interest in different entrepreneurial contexts in general, and Africa in particular, and for students interested in regional business practices, as well as for practitioners and policy makers.

FORTY-FOUR TURKISH FAIRY TALES Ignacz Kunos,Willy Pogány,2010-02 This volume is a treasure chest of classic Eastern tales drawing on the rich folklore of Turkey. Forty-four Turkish Fairy Tales has not been in print for almost 100 years, mainly because the original edition had lavish production standards. On the used market, mint copies of the 1913 original can cost up to four figures. This volume is appropriately titled Fairy Tales because something definitely 'fairy' occurs. There are talking animals, flying horses, birds that magically change into beautiful maidens, quests to win the hand of a princess, magical objects, simple, yet brave, peasants, wizards, witches, dragons and dungeons, epic journeys, and loveable fools. The majority of these stories contain encounters with 'Dews', or Turkish supernatural beings, better known in the West as 'Genies.' Sometimes the Turkish Dews are also called 'Arabs ' There are many other specifically Turkish elements and references in the stories, for which the glossary at the end of the book is of particular help. So this isn't simply an orientalised set of European Tales, but was drawn from an authentic Turkish oral storytelling tradition by Dr. Ignacz Kunos . Plus, there are almost 200 illustrations exquisitely crafted by Willy Pogany. While our production is not as lavish as the original, it does contain the original illustrations. Note: some of the illustrations could be considered unsuitable by 21st Century standards because they can be considered as caricatures with obvious ethnic stereotypes. However, in most cases, the illustrator is portraying imaginary creatures, which are supposed to be grotesque. Also to be remembered is the book was originally produced in 1913 when the world's attitudes towards racial tolerance and acceptance were quite different to those of today. 33% of the net will be donated to

charities in Turkey for education scholarships

Gender and Economic Growth in Tanzania ,2007 While Tanzania has been at the forefront of creating a positive legal framework and political context for gender equality, certain legal, regulatory, and administrative barriers still hinder women's full participation in private sector development. This report analyzes these barriers and makes recommendations for needed change, to ensure women's full contribution to private sector development and economic growth in Tanzania. Building on intensive stakeholder consultations and the findings of numerous studies, notably the MKURABITA diagnostic and the 2003/4 Investment Climate Assessments for Tanzania and Zanzibar, this report examines these gender-related barriers to growth and investment. It highlights legal and administrative constraints that have a disproportionately negative effect on female-headed businesses, and makes recommendations for needed reforms. Addressing these issues would not only help unlock the full economic potential of women, but would help improve the environment for all businesses in Tanzania. While Tanzania's economic growth has been strong, this report finds that if the country were to bring female secondary schooling and female total years of schooling to the same level as now enjoyed by males, this could produce up to an additional annual percentage point of growth - a valuable contribution to achieving the 6-8 percent annual growth targets of the National Strategy for Growth and Reduction of Poverty (NSGRP or MKUKUTA).

The Oxford Handbook of Transnational Feminist Movements Rawwida Baksh-Soodeen,Wendy Harcourt,2015 The Oxford Handbook of Transnational Feminist Movements explores the historical, political, economic and social contexts in which transnational feminist movements have emerged and spread, and the contributions they have made to global knowledge, power and social change over the past half century. The publication of the handbook in 2015 marks the fortieth anniversary of the United Nations International Women's Year, the thirtieth anniversary of the Third World Conference on Women held in Nairobi, the twentieth anniversary of the Beijing Declaration and Platform for Action, and the fifteenth anniversaries of the Millennium Development Goals and of UN Security Council Resolution 1325 on 'women, peace and security'. The editors and contributors critically interrogate transnational feminist movements from a broad spectrum of locations in the global South and North: feminist organizations and networks at all levels (local, national, regional, global and 'glocal'); wider civil society organizations and networks; governmental and multilateral agencies; and academic and research institutions, among others. The handbook reflects candidly on what we have learned about transnational feminist movements. What are the different spaces from which transnational feminisms have operated and in what ways? How have they contributed to our understanding of the myriad formal and informal ways in which gendered power relations define and inform everyday life? To what

extent have they destabilized or transformed the global hegemonic systems that constitute patriarchy? From a position of fifty years of knowledge production, activism, working with institutions, and critical reflection, the handbook recognizes that transnational feminist movements form a key epistemic community that can inspire and provide leadership in shaping political spaces and institutions at all levels, and transforming international political economy, development and peace processes. The handbook is organized into ten sections, each beginning with an introduction by the editors. The sections explore the main themes that have emerged from transnational feminist movements: knowledge, theory and praxis; organizing for change; body politics, health and well-being; human rights and human security; economic and social justice; citizenship and statebuilding; militarism and religious fundamentalisms; peace movements, UNSCR 1325 and postconflict rebuilding; feminist political ecology; and digital-age transformations and future trajectories.

Transportation Expressions (1996) Richard Feldman,1998-12 Compiles definitions of transportation terms used throughout the Department of Transportation and other U.S. government agencies. The terms are organized by their common name, with each term appearing in bold print and followed by its definition and the source citation. Specific documents, publications or databases used to compile the report are identified in a source index. Terms are cross-referenced within the document and within a term index.

The Rise and Decline of the Medici Bank, 1397-1494 Prof. Raymond de Roover,2018-03-12 The roots of modern capitalism go back to the Italian banking system of the late Middle Ages and the Renaissance. In the fifteenth century, the Medici Bank succeeded in overshadowing its competitors, the Bardi and the Peruzzi, who were the giants of the fourteenth century, and grew into a vast establishment with branches in most of the large cities of Western Europe. A study of its operations is essential to an understanding of the economic conditions in Europe in the fifteenth century. From a careful study of pertinent documents, including a set of libri segreti (confidential ledgers) discovered in 1950, Professor de Roover has reconstructed the details of the bank's organization and operating methods; its loan policies, which reflected the Church's doctrine on usury; its trading and industrial investments; its roles within the Florentine gild system and tax structure; and its activities as financial agent of the Church. He covers every aspect of the bank's history, from its early years under the management of Giovanni di Bicci de' Medici to its collapse with the expulsion of the Medici from Florence. "An invaluable contribution to the economic history of the period....A splendid book."—Harry A. Miskimin, The American Economic Review "The most important work in English on a medieval or Renaissance bank."—The Economist "The best book ever written on the

medieval banking system."—John T. Noonan, Jr., Harvard Law Review "The most authoritative treatment of its subject in any language."—Rondo Cameron, The Accounting Review

  Working with Customary Justice Systems Erica Harper,2011 Working with Customary Justice Systems: Post-conflict and Fragile States is a collection of articles from the 'Legal Empowerment and Customary Law Research Grants' program, where seven bursaries were awarded to scholar-practitioners to develop and conduct empirically grounded and evidence-based research programs to evaluate the impact of an empowerment-based initiative involving customary justice. The case studies illustrate that what is effective is situation-specific and contingent upon a variety of factors including, among others, social norms, the presence and strength of a rule of law culture, socioeconomic realities and national and geo-politics--Provided by publisher.

  Women, Land and Agriculture Caroline Sweetman,1999 Contributors assert that women's contribution to global agricultural production for food and for profit continues to be largely unacknowledged and undervalued and that their ability to farm is constrained by lack of control over land, agricultural inputs, credit and other essential resources.
