475 Tax Deductions for Businesses and Self-Employed Individuals Bernard B. Kamoroff,2018-02-01 Are you paying more taxes than you have to? The IRS is certainly not going to tell you about a deduction you failed to take, and your accountant is not likely to take the time to ask you about every deduction you're entitled to. As former IRS Commissioner Mark Everson admitted, "If you don't claim it, you don't get it. That's money down the drain for millions of Americans." This invaluable book, updated to reflect changes in tax law, not only lists the individual items that are deductible—from Internet domain name costs to theft losses—but also explains where to list them on your income tax form. "Tax law isn't easy," the author explains, "but this book is." The twelfth edition will be completely updated to include new changes in tax law, a chapter on home-based businesses, and include a special "jump out" highlights in the A-to-Z listings for any deduction that has special rules for home-based businesses.

Write It Off! Deduct It! Bernard B. Kamoroff,2015-01-12 Are you paying more taxes than you have to? There are more than nineteen million home-based businesses in the United States—56 percent of all businesses—and they generate \$102 billion in annual revenue. As far as the IRS is concerned, a home business is no different than any other business. But there is a difference: not only can you deduct the business expenses that every business is entitled to, you can turn personal, nondeductible expenses into tax-deductible business expenses—if you are careful to follow the rules. No tax software or accountant knows the details of your home-based business like you do, and the IRS is certainly not going to tell you about a deduction you failed to take. This invaluable book not only lists the individual items that are deductible in your home-based business—from utilities to that part of the home where you work—but also explains where to list them on your income tax forms.

66 Most Important Tax Deductions Scott Casterson, 2016-03-30 Taxation is a must in any country as this is how the nation survives. Under the U.S. system, citizens are allowed to reduce their taxable income for both business and individual expenditures. This action is known as deduction. Businesses selling goods decrease gross income directly by the cost of goods sold. In addition, businesses may subtract most types of expenses incurred in the business. Individuals too are also allowed to benefit from tax deductions and credits. Some of these deductions are subject to restrictions and there are certain eligibility criteria that are necessary to get these deductions. Many of these deductions help to put some extra cash in the pockets of individuals' and businesses alike. Here is a list of deductions and credits.

422 Tax Deductions for Businesses & Self Employed Individuals Bernard B. Kamoroff, 2004 Unlike other tax guides, this is an encyclopedia of legal deductions that entirely sidesteps tax loopholes, tax avoidance schemes, and questionable areas of law. Written in alphabetical order, the book saves readers the onerous task of hunting through a maze of index entries. Complex, confusing tax and accounting terminology has been replaced with simple, straightforward English. Also included are inspiring quotes, little known facts, and witty cartoons to cheer up readers as they tackle this often-intimidating subject.

Tax Deductions for Individuals Sean Lowry, 2013-01-06 Every tax filer has the option to claim deductions when filing their income tax return. Deductions serve four main purposes in the tax code: (1) to account for large, unusual, and necessary personal expenditures, such as extraordinary medical expenses; (2) to encourage certain types of activities, such as homeownership and charitable contributions; (3) to ease the burden of taxes paid to state and local governments; and (4) to adjust for the expenses of earning income, such as unreimbursed employee expenses. Some tax deductions can be taken by individuals even if they do not itemize. These deductions are commonly referred to as above-the-line deductions, because they reduce a tax filer's adjusted gross income (AGI, or the line). In contrast, itemized and standard deductions are referred to as below-the-line deductions, because they are applied after AGI is calculated to arrive at taxable income. Tax filers have the option to claim either a standard deduction or to itemize certain deductions. The standard deduction, which is based on filing status, is, among other things,

intended to reduce the complexity of paying taxes, as it requires no additional documentation. Alternatively, tax filers claiming itemized deductions must list each item separately on their tax return and be able to provide documentation that the expenditures being deducted have been made. Only tax filers with deductions that can be itemized in excess of the standard deduction find it worthwhile to itemize. Whichever deduction the tax filer claims—standard or itemized—the amount is subtracted from AGI. Deductions differ from other tax provisions that can reduce a tax filer's final tax liability. Deductions reduce final tax liability by a percentage of the amount deducted, because deductions are calculated before applicable marginal income tax rates. In contrast, tax credits generally reduce an individual's tax liability directly, on a dollar-for-dollar basis, because they are incorporated into tax calculations after marginal tax rates are applied. Some deductions can only be claimed if they meet or exceed minimum threshold amounts (usually a certain percentage of AGI), in order to simplify tax administration and compliance. In addition, some deductions are subject to a cap (also known as a ceiling) in benefits or eligibility. Caps are meant to reduce the extent that tax provisions can distort economic behavior, limit revenue losses, or reduce the availability of the deduction to higher-income tax filers. Because some tax filers and policymakers may not have detailed knowledge of tax deductions, this report first describes what they are, how they vary in their effects on reducing taxable income, and how they differ from other provisions (e.g., exclusions or credits). Next, a discussion concerning the rationale for deductions as part of the tax code is provided. Because some deductions are classified as tax expenditures, or losses in federal revenue, they might be of interest to Congress from a budgetary perspective. The final section of this publication includes tables that summarize each individual tax deduction, under current law. Although many of these deductions are part of the permanent income tax code, four of them have expired in 2011 or 2012. The Family and Business Tax Cut Certainty Act of 2012 (S. 3521) would extend these temporary provisions through 2012 and 2013.
