*Immunophenotyping in Autoimmune Diseases and Cancer* Gábor J. Szebeni,László G. Puskás,2020-12-02 The cooperation of highly specialized cell types maintains the homeostasis of multicellular organisms. The disturbance of that harmony contributes to the development of several diseases. Most of the cellular functions are executed by proteins, so it is essential to investigate biological processes at the protein level. Antibodies, complex biomolecules with high specificity, are used to recognize our protein of interest in a process known as “immunophenotyping”. One of the routinely used methods to study cellular proteins is flow cytometry, which detects cell surface or intracellular proteins at single-cell resolution. The other most frequent technique is the traditional immunohistochemical investigation of microscopic sections of human tissues. We called authors to publish their latest data studying cancer or autoimmune diseases by immunophenotyping.

**Advances in Hard-to-Cut Materials** Grzegorz M. Królczyk,Radosław W. Maruda,Szymon Wojciechowski,2020-03-13 The rapid growth of modern industry has resulted in a growing demand for construction materials with excellent operational properties. However, the improved features of these materials can significantly hinder their manufacture and, therefore, they can be defined as hard-to-cut. The main difficulties during the manufacturing/processing of hard-to-cut materials are attributed especially to their high hardness and abrasion resistance, high strength at room or elevated temperatures, increased thermal conductivity, as well as resistance to oxidation and corrosion. Nowadays, the group of hard-to-cut materials is extensive and still expanding, which is attributed to the development of a novel manufacturing techniques (e.g., additive technologies). Currently, the group of hard-to-cut materials mainly includes hardened and stainless steels, titanium, cobalt and nickel alloys, composites, ceramics, as well as the hard clads fabricated by additive techniques. This Special Issue, “Advances in Hard-to-Cut Materials: Manufacturing, Properties, Process Mechanics and Evaluation of Surface Integrity”, provides the collection of research papers regarding the various problems correlated with hard-to-cut materials. The analysis of these studies reveals the primary directions regarding the developments in manufacturing methods, characterization, and optimization of hard-to-cut materials.

**Communicable Diseases in Developing Countries** John Malcolm Dowling,Chin Fang Yap,2014-10-05 This books provides an essential study of communicable diseases, by integrating the diagnosis, treatment and cure of communicable diseases in developing countries with the practical aspects of delivery of these services to the public.

**Radar and Sonar Imaging and Processing** Andrzej Stateczny,Krzysztof Kulpa,Witold Kazimierski,2021-01-22 The Special Issue “Radar and Sonar Imaging Processing” is a collection of 21 articles exploring many topics related to remote sensing with radar and sonar sensors. In this editorial, we present short introductions of the published articles. The series of articles in this SI deal with a broad profile of aspects of the use of radar and sonar images in line with the latest scientific trends while making use of the latest developments in science, including artificial intelligence. It can be said that both radar and sonar imaging and processing still remain a “hot

topic” and much research in this area is being conducted worldwide. New techniques and methods for extracting information from radar and sonar sensors and data have been proposed and verified. Some of these will stimulate further research while others have reached maturity and can be considered for industrial implementation and development.

**Hybrid Bulk Metal Components** Bernd-Arno Behrens,2021-09-06 In recent years, the requirements for technical components have steadily been increasing. This development is intensified by the desire for products with a lower weight, smaller size, and extended functionality, but also with a higher resistance against specific stresses. Mono-material components, which are produced by established processes, feature limited properties according to their respective material characteristics. Thus, a significant increase in production quality and efficiency can only be reached by combining different materials in a hybrid metal component. In this way, components with tailored properties can be manufactured that meet the locally varying requirements. Through the local use of different materials within a component, for example, the weight or the use of expensive alloying elements can be reduced. The aim of this Special Issue is to cover the recent progress and new developments regarding all aspects of hybrid bulk metal components. This includes fundamental questions regarding the joining, forming, finishing, simulation, and testing of hybrid metal parts.

*Digital Currency: Breakthroughs in Research and Practice* Management Association, Information Resources,2018-07-06 Digital technology has revitalized the landscape of the global economy. As digital currency, such as bitcoin and IOTA, continues to become more prominent in society, conducting further research in this area is vital to promoting economic advancements. *Digital Currency: Breakthroughs in Research and Practice* is a critical source of academic knowledge on the use of computers, smartphones, and the internet to purchase goods and services using virtual currency. The security and privacy aspects of using digital currency are also explored. Highlighting a range of pertinent topics such as electronic commerce, online transaction payment, and web-based electronic money, this book is an ideal reference source for business executives, financial analysts, business professionals, economists, IT professionals, and researchers interested in emerging trends in digital currency and finance.

*Multidisciplinary Perspectives on Human Capital and Information Technology Professionals* Ahuja, Vandana,Rathore, Shubhangini,2018-02-16 In this technological age, the information technology (IT) industry is an important facet of society and business. The IT industry is able to become more efficient and successful through the examination of its structure and a larger understanding of the individuals that work in the field. *Multidisciplinary Perspectives on Human Capital and Information Technology Professionals* is a critical scholarly resource that focuses on IT as an industry and examines it from an array of academic viewpoints. Featuring coverage on a wide range of topics, such as employee online communities, role stress, and competence frameworks, this book is targeted toward academicians, students, and researchers seeking relevant research on IT as an industry.

**Time Bank as a Complementary Economic System: Emerging Research and Opportunities** Valek, Lukas,Bures,

Vladimir,2018-09-21 Contemporary research in the field of time-based currency has generally been unstructured and takes a retrospective point of view. In practice, approaches to this field commonly taken until now have shown that there can be as many points of view as there are researchers. Time Bank as a Complementary Economic System: Emerging Research and Opportunities provides a systemic study of a soft system called the Time Bank, a reciprocal service exchange that uses units of time as currency. This publication explores the contemporary context of Time Bank and describes the most recent research methodologies and results. Its content represents the work of business exchange, knowledge management, and soft systems, and it is designed for economists, managers, business professionals, social scientists, academicians, and researchers seeking coverage on topics centered on soft systems and their economic influence.

Novel Biomarkers for Heart Disease Michael Lichtenauer,2020-12-28 Cardiac biomarkers such as troponins and natriuretic peptides have made a great impact on clinical decision making as well as improving our understanding of molecular mechanisms of different disease conditions. However, the biomarkers that are currently in use do not reflect all the multiple disease pathways that are involved in a broad spectrum of cardiac disease conditions ranging from acute coronary syndrome, to heart failure (and heart failure with preserved ejection fraction, HFpEF), to pulmonary hypertension or arrhythmias. In this Special Issue, we will provide an overview of the current developments in the field of biomarker research, beginning with research on molecular pathways and cellular communication (e.g., microRNA) up to the clinical use of biomarkers.

**Clinical Studies, Big Data, and Artificial Intelligence in Nephrology and Transplantation** Wisit

Cheungpasitporn,Wisit Kaewput,2021-09-02 In recent years, artificial intelligence has increasingly been playing an essential role in diverse areas in medicine, assisting clinicians in patient management. In nephrology and transplantation, artificial intelligence can be utilized to enhance clinical care, such as through hemodialysis prescriptions and the follow-up of kidney transplant patients. Furthermore, there are rapidly expanding applications and validations of comprehensive, computerized medical records and related databases, including national registries, health insurance, and drug prescriptions. For this Special Issue, we made a call to action to stimulate researchers and clinicians to submit their invaluable works and present, here, a collection of articles covering original clinical research (single- or multi-center), database studies from registries, meta-analyses, and artificial intelligence research in nephrology including acute kidney injury, electrolytes and acid-base, chronic kidney disease, glomerular disease, dialysis, and transplantation that will provide additional knowledge and skills in the field of nephrology and transplantation toward improving patient outcomes.

**Harrison's Pulmonary and Critical Care Medicine, 2e** Joseph Loscalzo,2013-03-26 Pulmonary and Critical Care Medicine – as only Harrison's can cover it Featuring a superb compilation of chapters related to pulmonary and critical care medicine that appear in Harrison's Principles of Internal Medicine, Eighteenth Edition, this

concise, full-color clinical companion delivers the latest knowledge in the field backed by the scientific rigor and authority that have defined Harrison's. **Urban Deformation Monitoring using Persistent Scatterer Interferometry and SAR tomography** Michele Crosetto, Oriol Monserrat, Alessandra Budillon, 2019-06-24 This book focuses on remote sensing for urban deformation monitoring. In particular, it highlights how deformation monitoring in urban areas can be carried out using Persistent Scatterer Interferometry (PSI) and Synthetic Aperture Radar (SAR) Tomography (TomoSAR). Several contributions show the capabilities of Interferometric SAR (InSAR) and PSI techniques for urban deformation monitoring. Some of them show the advantages of TomoSAR in un-mixing multiple scatterers for urban mapping and monitoring. This book is dedicated to the technical and scientific community interested in urban applications. It is useful for choosing the appropriate technique and gaining an assessment of the expected performance. The book will also be useful to researchers, as it provides information on the state-of-the-art and new trends in this field

**Innovative Mobile and Internet Services in Ubiquitous Computing** Leonard Barolli, Aneta Poniszewska-Maranda, Hyunhee Park, 2020-06-09 This book presents the latest research findings, methods and development techniques, challenges and solutions concerning UPC from both theoretical and practical perspectives, with an emphasis on innovative, mobile and Internet services. With the proliferation of wireless technologies and electronic devices, there is a rapidly growing interest in Ubiquitous and Pervasive Computing (UPC), which makes it possible to create a human-oriented computing environment in which computer chips are embedded in everyday objects and interact with the physical world. Through UPC, people can go online even while moving around, thus enjoying nearly permanent access to their preferred services. Though it has the potential to revolutionize our lives, UPC also poses a number of new research challenges.
