Transgender Athletes in Competitive Sport Eric Anderson,Ann Travers,2017-06-26 While efforts to include gay and lesbian athletes in competitive sport have received significant attention, it is only recently that we have begun examining the experiences of transgender athletes in competitive sport. This book represents the first comprehensive study of the challenges that transgender athletes face in competitive sport; and the challenges they pose for this sex-segregated institution. Beginning with a discussion of the historical role that sport has played in preserving sex as a binary, the book examines how gender has been policed by policymakers within competitive athletics. It also considers how transgender athletes are treated by a system predicated on separating males from females, consequently forcing transgender athletes to negotiate the system in coercive ways. The book not only exposes our culture's binary thinking in terms of both sex and gender, but also offers a series of thought-provoking and sometimes contradictory recommendations for how to make sport more hospitable, inclusive and equitable. Transgender Athletes in Competitive Sport is important reading for all students and scholars of the sociology of sport with an interest in the relationship between sport and gender, politics, identity and ethics.

School Leadership Stuart Carl Smith, Philip K. Piele, 1989 Recognizing the importance of good leadership to the achievement of educational excellence, the second edition of this handbook synthesizes a large body of school leadership literature and explores the subject from three

perspectives: the person, the structure, and the skills. Part I examines characteristics of today's educational leaders; effective leadership styles and qualities; administrator training, hiring, and induction methods; and the scarcity of female and black school leaders. Part II looks at the organizational supports underlying school leadership. This section examines the balance of authority between the central office and the school site, the team approach to management, the decision-making context, and the components of school climate. Part III highlights leadership abilities needed by today's school administrators. Besides knowing how to manage the school's instructional program and staff, administrators must be able to communicate in today's more open, sharing organization; build coalitions of community groups; make meetings more productive; and manage time, stress, and conflict more effectively. Concerned about integrating theory with practice, the book offers many practical suggestions for using the information presented. Accompanying each chapter are extensive bibliographical references that appear at the end of the volume. (MLH)
