Dustin Tahmahkera

Cinematic Comanches Dustin Tahmahkera, 2022

Cinematic Comanches engages in a description and critical appraisal of Indigenous hype, visual representation, and audience reception of Comanche culture and history through the 2013 Disney film The Lone Ranger.

Selling the Silver Bullet Avi Santo, 2015-04-15
Originating as a radio series in 1933, the Lone Ranger is a cross-media star who has appeared in comic strips, comic books, adult and juvenile novels, feature films and serials, clothing, games, toys, home furnishings, and many other consumer products. In his prime, he rivaled Mickey Mouse as one of the most successfully licensed and merchandised children's properties in the United States, while in more recent decades, the Lone Ranger has struggled to resonate with consumers, leading to efforts to rebrand the property. The Lone Ranger's eighty-year history as a lifestyle brand thus offers a perfect case study of how the fields of licensing, merchandizing, and brand management have operated within shifting industrial and sociohistorical conditions that continue to redefine how the business of entertainment functions. Deciphering how iconic characters gain and retain their status as cultural commodities, Selling the Silver Bullet focuses on the work done by peripheral consumer product and licensing divisions in selectively extending the characters' reach and in cultivating investment in these characters among potential stakeholders. Tracing the Lone Ranger's decades-long career as intellectual property allows Avi Santo to analyze the mechanisms that drive contemporary character licensing and entertainment brand management practices, while at the same time situating the licensing field's development within particular sociohistorical and industrial contexts. He also offers a nuanced assessment of

the ways that character licensing firms and consumer product divisions have responded to changing cultural and economic conditions over the past eighty years, which will alter perceptions about the creative and managerial authority these ancillary units wield.

The Perfect Test Ron Dietel, 2011-10-30 Some ten years from today, American schools have tried every possible education fad. Common national standards, year-round schools, takeover of school boards, and even the super-qualified teacher program have failed to improve low U.S. achievement on international assessments. That all changes when Grant and Jennifer Wilson, both Stanford Ph.D. graduates, create what they believe are the perfect tests. The Venus Assessment System, the first national tests in U.S. history, flip American education on its ear, making U.S. students number one in the world in math and science. But then Jennifer Wilson discovers a secret list of names, students who are exceptions to the high-stakes consequences of the test. So secret that some people are willing to kill for it. With a tremendous blending of suspense tied to realistic future events, *The Perfect Test* will appeal to readers of all types, from educators and parents to simply anyone who loves a great, page-turner. As writer Paul Baker from the University of Wisconsin says, "Like *The Name of the Rose* and *The Da Vinci Code*, this story grabs the reader and won't let go." "At a moment of national testing madness, the [Perfect Test] story-line was both fun and gripping. And like all good mystery/science fiction, educational too. I won't give away the ending." Deborah Meier, New York University: teacher, writer, and public activist. Author of *In Schools We Trust* and *Many Children Left Behind* "Ron Dietel's *The Perfect Test* reads like a Stephen King novel. A perfect blend of mystery, action and constant surprises, nicely

intertwined in a future world of national high-stakes tests. You won't be able to stop reading it." Jim Kohlmoos, President, Knowledge Alliance: Research to Action in Education "Ready for a break, for a romp? Pick up Ronald Dietel's biting spoof, *The Perfect Test*. It's a dystopian vision of a world gone crazy, a science fiction portrait of the future that often comes wickedly close to where we are now. John Merrow, President, Learning Matters

The Tyranny of Testing Banesh Hoffmann, Jacques Barzun, 2003-08-01 Hoffmann's complete and well-documented account of the failings and dangers of mechanical testing illustrates the inherent flaws in aptitude and achievement tests. It demonstrates the inadequacies of multiple-choice testing, in which candidates simply choose answers and need not justify their replies, revealing the tests' inclination to reward superficiality rather than subtlety and creativity. Aimed at teachers and others involved in education, this polemic exposes the corporate testing giants whose dubious claims to scientific accuracy shield them from public scrutiny.

Le migliori App Massimo Carboni, 2012-06-26T15:00:00+02:00 Esiste un'App praticamente per tutto. Così recita una nota pubblicità Apple, e risulta davvero difficile mettere in dubbio questa affermazione perché le App sono diventate parte integrante e irrinunciabile della nostra vita o almeno di quella dei possessori di iPhone, iPad e iPod Touch. Ne esistono migliaia, di tutti i tipi: alcune utili, altre assolutamente futili, altre ancora che sono veri e propri capolavori. Questo manuale risolve i tanti dubbi che tutti i possessori di device Apple si trovano ad affrontare, selezionando in mezzo alla moltitudine delle App presenti nell'App Store, le migliori, le più meritevoli, quelle che aiutano concretamente a

risolvere un problema o sono in grado di suscitare la nostra emozione. Tutte le App presenti in questo libro, circa 200, sono state scaricate e provate per verificarne il reale valore. Il testo presenta anche una sezione per imparare a gestire al meglio le App sui propri dispositivi, illustrando tutti i trucchi per riconoscere immediatamente quelle più utili e i segreti per fare diventare il proprio iPhone o iPad uno strumento di lavoro e di svago irrinunciabile.

Testing Testing F. Allan Hanson, 1994-01-01 This book is about how our addiction to testing influences both society and ourselves as socially defined persons. The analysis focuses on tests of people, particularly tests in schools, intelligence tests, vocational interest tests, lie detection, integrity tests, and drug tests. Diagnostic psychiatric tests and medical tests are included only tangentially. A good deal of the descriptive material will be familiar to readers from their personal experience as takers and/or givers of tests. But testing, as with much of ordinary life, has implications that we seldom pause to ponder and often do not even notice. My aim is to uncover in the everyday operation of testing a series of well-concealed and mostly unintended consequences that exercise far deeper and more pervasive influence in social life than is commonly recognized.

Bias in Mental Testing Arthur Robert Jensen, 1980
