App development on multiple platforms has historically been difficult and complex. This book breaks down complex concepts and tasks into easily digestible segments with examples, pictures, and hands-on labs with starters and solutions. In doing so, you'll develop a basic understanding of the Dart

programming language; the entire Flutter development toolchain; the differences between stateful and stateless widgets; and a working knowledge of the architecture of apps. All the most important parts of app development with Flutter are covered in this book. Work with themes and styles. Develop custom widgets. Teach your app to respond to gestures like taps, swipes, and pinches. Design, create and control the layout of your app. Create tools to handle form data entry from users. And ultimately create killer multiscreen apps with navigation, menus, and tabs. Flutter is Google's new framework for creating mobile apps that run on iOS and Android phones both. You had to be a super-developer to write apps for iOS or Android alone. But writing for both? Forget about it! You had to be familiar with Swift, Java/Kotlin, Xcode, Eclipse, and a bunch of other technologies simultaneously. Beginning App Development with Flutter simplifies the entire process. What You'll Learn Get the most out of great Flutter widgets Create custom widgets, both stateless and stateful Exercise expert control over your Flutter layouts Make your app respond to gestures like swiping, pinching and tapping Initiate async Ajax calls to RESTful APIs — including Google Firebase! Who This Book Is For Developers who have coded in Java, C#, C++, or any similar language. It brings app development within the reach of younger developers, so STEM groups are likely to pick up the technology. Managers, product owners, and business analysts need to understand Flutter's capabilities.

Mobile Media In and Outside of the Art Classroom Juan Carlos Castro, 2019-09-19 This edited volume explores a range of educational effects on student learning that resulted from a long-term study using a creative visual arts curriculum designed for mobile media (smartphones and tablets) and used in art classrooms. The curriculum, entitled MonCoin, a French phrase meaning My Corner, was initially designed and piloted in a Montreal area school for at-risk youth in 2012. Since then, it has been refined, deployed, and researched across secondary schools from a range of socio-cultural educational contexts. This book is comprised of contributions from researchers and practitioners associated with the MonCoin project who address critical insights gleaned from our study, such as the social context of teen mobile media use; curriculum theory and design; influences of identity on creative practice; and specific strategies for creative applications of mobile media in schools. The purpose of this edited book is to offer art education researchers and teachers innovative curriculum for mobile media and the networked conditions that influence identity, space, and practice with and through this ubiquitous technology.
