The Vietnam War in Popular Culture [2 volumes] Ron

Milam,2016-11-07 Covering many aspects of the Vietnam War that have not been addressed before, this book supplies new perspectives from academics as well as Vietnam veterans that explore how this key conflict of the 20th century has influenced

everyday life and popular culture during the war as well as for the past 50 years. How did the experience of the Vietnam War change the United States, not just in the 1950s through the 1970s, but through to today? What role do popular music and movies play in how we think of the Vietnam War? How similar are the recent wars in Iraq and Afghanistan—and now Syria—to the Vietnam War in terms of duration, cost, success and failure rates, and veteran issues? This two-volume set addresses these questions and many more, examining how the Vietnam War has been represented in media, music, and film, and how American popular culture changed because of the war. Accessibly written and appropriate for students and general readers, this work documents how the war that occurred on the other side of the globe in the jungles of Vietnam impacted everyday life in the United States and influenced various entertainment modes. It not only covers the impact of the counterculture revolution, popular music about Vietnam recorded while the war was being fought (and after), and films made immediately following the end of the war in the 1970s, but also draws connections to more modern events and popular culture expressions, such as films made in the aftermath of September 11, 2001. Attention is paid to the impact of social movements like the

environmental movement and the civil rights movement and their relationships to the Vietnam War. The set will also highlight how the experiences and events of the Vietnam War are still impacting current generations through television shows such as Mad Men.

Advanced Topics in Global Information Management, Volume 4 Hunter, M. Gordon, Tan, Felix B., 2005-03-31 Advanced Topics in Global Information Management is a series of books on advance topics in global information management (GIM). GIM research continues to progress, with some scholars pushing the boundaries of thinking and others challenging the status quo. Advanced Topics in Global Information Management, Volume 4 is a part of this series. In order to sustain any competitive advantage gained through the application of information technology, companies must continually seek improvement. They must employ environmental scanning techniques to determine what technology is available, be willing to adopt new information technology, and know what the competition is planning or doing. Advanced Topics in Global Information Management, Volume 4 addresses these important

issues.

Spirituality and Religiousness and Alcohol/other Drug

Problems Brent B. Benda,Thomas F. McGovern,2006 Spiritual issues and forgiveness are often neglected topics in treatment programs for substance abusers. *Spirituality and Religiousness and Alcohol/Other Drug Problems* brings those underrated components of recovery to the forefront through current research, case studies, and the insight of experts in the field of spirituality as well as drug/alcohol treatment. This unique book illustrates the important interrelationship among religiousness, spirituality, forgiveness, and alcohol and drug use and abuse throughout the lifespan. The contributors examine the effects of religiousness and spirituality on recovery in relation to more widely recognized supports. Each chapter is extensively referenced, and most include tables and/or figures that make difficult information easy to understand and work with.

The Scientific Endeavor Jeffrey A. Lee,2016-08-03 **The**

Scientific Endeavor is an introduction to what science is and how it is done. Many college courses are good at presenting particular disciplines (Biology, Chemistry, etc.), but not the details of science itself. Science literacy for educated citizens and for professional scientists requires an understanding of science itself. Written at an introductory college level, this book provides an overview of what science is, the philosophy of science, how research is done, how scientists interact, ethics and misconduct, scientific thinking, and pseudoscience. It has been used as a supplementary textbook in introductory science classes, as the main text in classes about science, and as background reading to spark discussions in advanced undergraduate and graduate courses.

Play-by-Play Bill Mercer, 2007-07-09 Both a memoir and a how-to for anyone who aspires to a career in broadcast journalism, particularly sports, this book calls on Mercer's vast experience and name recognition in Texas to give an insider's view of everything from play-by-play to interviewing a celebrity athlete. Mercer began his career as the voice of professional wrestling in Dallas in the 1950s, and later went on to be a play-by-play announcer for teams ranging from the Dallas Cowboys to the Chicago White Sox, in addition to a brief hard news stint at the time of the Kennedy

assassination in Dallas in 1963.

Conversations With Food Dorothy Chansky, Sarah W.

Tracy, 2021-02-02 *Conversations With Food* offers readers an array of essays revealing the power of food (and its absence) to transform relationships between the human and non-human realms; to define national, colonial, and postcolonial cultures; to help instantiate race, gender, and class relations; and to serve as the basis for policymaking. Food functions in these contexts as items in religious or secular law, as objects with which to bargain or over which to fight, as literary trope, and as a way to improve or harm health—individual or collective. The anthology ranges from Ancient Greece to the posthuman fairy underworld; from the codifying of French culinary heritage to the strategic marketing of 100-calorie snacks; from the European famine after the Second World War to the lush and exotic cuisines of culinary tourism today. *Conversations With Food* will engage anyone interested in discovering the disciplinary breadth and depth of food studies. The anthology is ideally suited for introductory and advanced courses in food studies, as it includes essays in a range of humanities and social science disciplines, and each author draws cross-disciplinary linkages between their own work and other essays in the volume.

This thematic and conceptual intercalation, when read with the editors' introduction, makes the collection an exceptionally strong representation of the field of food studies.

Annual Review of Nursing Education, Volume 4, 2006 Marilyn H. Oermann, PhD, RN, FAAN, 2005-12-12 Designated a Doody's Core Title! This is *must* reading for anyone teaching nursing, at any level, in any program or institution. Covers trends and innovative strategies to help you develop a curriculum and be more effective in using it. Educators describe problems--such as students who cannot write or high NCLEX failure rates--and how they tackled and solved them. Each chapter contains common sense approaches to every educator's questions. A resource no nursing education program can afford to be without.

Customer Experience in Modern Marketing James Seligman, 2012-11-01 Customer Experience Management in Modern Marketing is a dynamic approach to the co-creation of value through the relationship. The book, chapter by chapter provides information, examples of how to develop and create a lasting experience for your customers

Icons of the Middle Ages [2 volumes] Lister M. Matheson, 2011-12-02 From Thomas Becket to Charlemagne, from

Leif Erickson to Count Dracula, this series of biographical essays separates truth from legend as it explores the lives of some of the most accomplished and influential figures of medieval history. Drawing on the latest research, *Icons of the Middle Ages: Rulers, Writers, Rebels, and Saints* examines the lives of some of the most remarkable personalities of the Medieval Era—powerful, ruthless, compassionate, brilliant people who remain widely influential today. Each portrait in this extraordinary gallery sets its subject in the context of their world, revealing what we really know about their lives, their iconic status in their own times, and their lasting legacies in our time. Readers will encounter fascinating individuals devoted to the pursuit of power (Richard III), to freedom (Robert the Bruce), to philosophy and religion (Maimonides; Thomas More), and to the arts (Dante; Hildegard of Bingen). Additional chapters explore life in the medieval castle and the advent of siege warfare—two defining developments in the Middle Ages.

Dynamics in Logistics Michael Freitag, Herbert Kotzab, Nicole Megow, 2021-12-02 This open access book highlights the interdisciplinary aspects of logistics research. Featuring empirical, methodological, and practice-oriented articles, it addresses the modelling, planning, optimization and control of processes. Chiefly

focusing on supply chains, logistics networks, production systems, and systems and facilities for material flows, the respective contributions combine research on classical supply chain management, digitalized business processes, production engineering, electrical engineering, computer science and mathematical optimization. To celebrate 25 years of interdisciplinary and collaborative research conducted at the Bremen Research Cluster for Dynamics in Logistics (LogDynamics), in this book hand-picked experts currently or formerly affiliated with the Cluster provide retrospectives, present cutting-edge research, and outline future research directions.
