Automata and Languages Alexander Meduna,2012-12-06 A step-by-step development of the theory of automata, languages and computation. Intended for use as the basis of an introductory course at both junior and senior levels, the text is organized so as to allow the design of various courses based on selected material. It features basic models of computation, formal languages and their properties; computability, decidability and complexity; a discussion of modern trends in the theory of automata and formal languages; design of programming languages, including the development of a new programming language; and compiler design, including the construction of a complete compiler. Alexander Meduna uses clear definitions, easy-to-follow proofs and helpful examples to make formerly obscure concepts easy to understand. He also includes challenging exercises and programming projects to enhance the reader's comprehension, and many 'real world' illustrations and applications in practical computer science.

Teaching Twelfth Night and Othello Peggy O'Brien,2006-08 FOLGER Shakespeare Library THE WORLD'S LEADING CENTER FOR SHAKESPEARE STUDIES The Folger Shakespeare Library is one of the world's leading centers for scholarship, learning, and culture. The Folger is dedicated to advancing knowledge and increasing understanding of Shakespeare and the early modern period; it is home to the world's largest Shakespeare collection and one of the leading collections of books and materials of the entire early modern period (1500-1750). Combining a worldclass research library and scholarly programs; leadership in curriculum, training, and publishing for K-12 education; and award-winning performing arts, exhibitions, and lectures, the Folger is Shakespeare's home in America. This volume of the Shakespeare Set Free series is written by institute faculty and participants, and includes the latest developments in recent scholarship. It bristles with the energy created by teaching and learning Shakespeare from the text and through active performance, and reflects the experience, wisdom, and wit of real classroom teachers in schools and colleges throughout the United States. In this book, you'll find the following: Clearly written essays by leading scholars to refresh teachers and challenge older students Effective and accessible techniques for teaching Shakespeare through performance and engaging students in Shakespeare's language and plays Day-by-day teaching strategies for Twelfth Night and Othello that successfully and energetically immerse students of every grade and skill level in the language and in the plays themselves -- created, taught, and written by real teachers

Developments In Language Theory: At The Crossroads Of Mathematics, Computer Sci And Biology Grzegorz Rozenberg,Arto Salomaa,1994-04-30 This proceedings volume provides a modern synopsis of recent studies concerning certain areas of language theory very close to applications. The topics covered range from image generation and developmental models to combinatorics of words and formal power series, as well as from fractals to computational complexity. Although the contributions represent ongoing research, much of the material is accessible to a reader with only a moderate previous knowledge of the subject.

SAFER Electronic Health Records Dean F. Sittig,Hardeep Singh,2015-04-14 This important volume provide a one-stop resource on the SAFER Guides along with the guides themselves and information on their use, development, and evaluation. The Safety Assurance Factors for EHR Resilience (SAFER) guides, developed by the editors of this book, identify recommended practices to optimize the safety and safe use of electronic health records (EHRs). These guides are designed to help organizations self-assess the safety and effectiveness of their EHR implementations, identify specific areas of vulnerability, and change their cultures and practices to mitigate risks. This book provides EHR designers, developers, implementers, users, and policymakers with the requisite historical context, clinical informatics knowledge, and real-world, practical guidance to enable them to utilize the SAFER Guides to proactively assess the safety and effectiveness of their electronic health records EHR implementations. The first five chapters are designed to provide readers with the conceptual knowledge required to understand why and how the guides were developed. The next nine chapters focus on the underlying informatics concepts, key research activities, and methods used to develop each of the guides. Each of these chapters concludes with a copy of the guide itself. The final chapter provides a vision for the future and the work required to ensure that future generations of EHRs are designed, developed, implemented, and used to improve the overall safety of the EHR-enabled healthcare system. Taken together, the information provided in this book should help any organization, whether large or small, implement its EHR program and improve the safety and effectiveness of its existing EHR-enabled healthcare systems. This volume will be extremely valuable to small, ambulatory physician practices and larger outpatient settings as well as for hospitals and professors and instructors charged with teaching safe and effective implementation and use of EHRs. It will also be highly useful for health information technology professionals responsible for maintaining a safe and effective EHR and for clinical and administrative staff working in EHR-enabled healthcare systems.

Shape, Structure And Pattern Recognition Horst Bunke,Alfred Bruckstein,D Dori,1995-06-29 The book is an extensive compilation of the papers presented at the IAPR International Workshop on Structural and Syntactic Pattern Recognition SSPR'94. It includes a preface by Professor Herbert Freeman, who is the recipient of the IAPR King Sun Fu Award for 1994. The book is divided into four parts and covers state-of-the art topics related to a variety of aspects of pattern recognition.

Dividing Texts Bidur Bhattarai,2019-12-02 The number of manuscripts produced in the Indian sub-continent is astounding and is the result of a massive enterprise that was carried out over a vast geographical area and over a vast stretch of time. Focusing mainly on areas of Northern India and Nepal between 800 to 1300 CE and on manuscripts containing Sanskrit texts, the present study investigates a fundamental and so far rarely studied aspect of manuscript production: visual organisation. Scribes adopted a variety of visual strategies to distinguish one text from another and to differentiate the various sections within a single text (chapters, sub-chapters, etc.). Their repertoire includes the use of space(s) on the folio, the adoption of different writing styles, the inclusion of symbols of various kind, the application of colours ('rubrication'), or a combination of all these. This study includes a description of these various strategies and an analysis of their different implementations across the selected geographical areas. It sheds light on how manuscripts were produced, as well as on some aspects of their employment in ritual contexts, in different areas of India and Nepal.

Ichthyology in Context (1500–1880) Paul J. Smith,Florike Egmond,2023-12-28 Ichthyology in Context (1500–1880) provides a broad spectre of early modern manifestations of human fascination with fish – “fish” understood in the early modern sense of the term, as aquatilia: all aquatic animals, including sea mammals and crustaceans. It addresses the period’s quickly growing knowledge about fish in its multiple, varied and rapidly changing interaction with culture. This topic is approached from various disciplines: history of science, cultural history, history of collections, historical ecology, art history, literary studies, and lexicology. Attention is given to the problematic questions of visual and textual representation of fish, and pre- and post-Linnean classification and taxonomy. This book also explores the transnational exchange of ichthyological knowledge and items in and outside Europe. Contributors: Cristina Brito, Tobias Bulang, João Paulo S. Cabral,

Collision Detection for Robot Manipulators: Methods and Algorithms Kyu Min Park, Frank C. Park, 2023-05-19 This book provides a concise survey and description of recent collision detection methods for robot manipulators. Beginning with a review of robot kinodynamic models and preliminaries on basic statistical learning methods, the book covers fundamental aspects of the collision detection problem, from collision types and collision detection performance criteria to model-free versus model-based methods, and the more recent data-driven learning-based approaches to collision detection. Special effort has been given to describing and evaluating existing methods with a unified set of notation, systematically categorizing these methods according to a basic set of criteria, and summarizing the advantages and disadvantages of each method. This book is the first to comprehensively organize the growing body of learning-based collision detection methods, ranging from basic supervised learning methods to more advanced approaches based on unsupervised learning and transfer learning techniques. Step-by-step implementation details and pseudocode descriptions are provided for key algorithms. Collision detection performance is measured with respect to both conventional criteria such as detection delay and the number of false alarms, as well as criteria that measure generalization capability for learning-based methods. Whether it be for research or commercial applications, in settings ranging from industrial factories to physical human-robot interaction experiments, this book can help the reader choose and successfully implement the most appropriate detection method that suits their robot system and application.

Performances of Ancient Jewish Letters Marvin Lloyd Miller, 2015-09-16 This ambitious and engaging book sets itself the task of combining a wide range of approaches to cast new light on the form and function of several ancient Jewish letters in a variety of languages. The focus of *The Performance of Ancient Jewish Letters* is on applying a new emerging field of performance theory to texts and arguing that letters and other documents were not just read in silence, as is normal today, but were performed, especially when they were addressed to a community. A distinctive feature of this book consists of being one of the first to apply the approach of performance criticism to ancient Jewish letters. Previous treatments of ancient letters have not given enough consideration to their oral context; however, this book prompts the reader to listen sympathetically with the audience. The Performance focuses close attention on the ways in which the engagement of the audience during the performance of a text might be read from traces present in the text itself. This book invites the audience to hear a fresh reading of a family letter from Hermopolis, concerning ugly tunics and castor oil; festal letters, about issues surrounding the celebration of Passover, Purim and Hanukkah; a diaspora letter on how to live in a foreign land; and also an official letter concerning the building of the Jerusalem temple. These letters will help us understand a text from the Dead Sea Scrolls, namely, MMT. Marvin L. Miller argues for the centrality of performance in the life of Jews of the Second Temple period, an area of study that has been traditionally neglected. The Performance advances the fields of orality and epistolography and supplements other scholars' works in those fields.

Word 2010 Introduction ,

She Must and Shall Go Free Matthew S. Harmon, 2010-08-31 Scholars have long recognized the importance of Paul’s citations from the Pentateuch for understanding the argument of Galatians. But what has not been fully appreciated is the key role that Isaiah plays in shaping what Paul says and how he says it, even though he cites Isaiah explicitly only once (Isaiah 54:1 in Galatians 4:27). Using an intertextual approach to trace more subtle appropriations of Scripture (i.e., allusions, echoes and thematic parallels), Harmon argues that Isaiah 49-54 in particular has shaped the structure of Paul’s argument and the content of his theological reflection in Galatians. Each example of Isaianic influence is situated within its original context as well as its new context in Galatians. Attention is also paid to how those same Isaianic texts were interpreted in Second Temple Judaism, providing the larger interpretive context within which Paul read Scripture. The result is fresh light shed on Paul’s self-understanding as an apostle to the Gentiles, the content of his gospel message, his reading of the Abraham story and the larger structure of Galatians.

Conflict Talk in English as a Lingua Franca Mayu Konakahara, 2023-05-08 This volume aims to fill two gaps in pragmatic research into English as a lingua franca (ELF): the investigation of conflict talk and the incorporation of a multimodal perspective into the analysis of ELF interactions. To this end, multimodal conversation analysis is used, combined with the perspective of politeness theory. The author shows how interactants use multimodal resources to manage competitive overlaps, disagreement, and third-party complaints in casual ELF conversations among friends. In doing so, the notion of cooperativeness is re-examined, and the appropriateness of an intercultural approach to analyzing multimodal resources in ELF interactions is demonstrated.
