Ancient Text Messages of the Yoruba Bata Drum Amanda Villepastour,2016-12-05 The bata is one of the most important and representative percussion traditions of the people in southwest Nigeria, and is now learnt and performed around the world. In Cuba, their own bata tradition derives from the Yoruba bata from Africa yet has had far more research attention than its African predecessor. Although the bata is one of the oldest known Yoruba drumming traditions, the drum and its unique language are now unfamiliar to many contemporary Yoruba people. Amanda Villepastour provides the first academic study of the bata's communication technology and the elaborate coded spoken language of bata drummers, which they refer to as 'ena bata'. Villepastour explains how the bata drummers' speech encoding method links into universal linguistic properties, unknown to the musicians themselves. The analysis draws the direct links between what is spoken in Yoruba, how Yoruba is transformed into the coded language (ena), how ena prescribes the drum strokes and, finally, how listeners (and which listeners) extract linguistic meaning from what is drummed. The description and analysis of this unique musical system adds substantially to what is known about bata drumming specifically, Yoruba drumming generally, speech surrogacy in music and coded systems of speaking. This book will appeal not only to ethnomusicologists and anthropologists, but also to linguists, drummers and those interested in African Studies.

Text Messages John Tucker,2017-12-06 Facebook. Twitter. Snapchat. We live in a rapidly changing world, a world that seems to be increasingly inhospitable toward preaching. In the face of digital technology, social media, cultural pluralism, and pastoral burnout, how can Christian preachers proclaim the gospel faithfully and effectively? This book answers that question by bringing together a selection of important voices from across North America, Asia, and the Pacific. It argues that Spirit-empowered preaching is characterized by five attributes: it opens the Scriptures, engages the culture, addresses the listener, dissects the preacher, and elevates the Savior. With contributions from authors like William Willimon, Darrell Johnson, Lynne Baab, Robert Smith Jr., and Paul Windsor, this is an excellent resource for ordained ministers, lay preachers, theological students, and anyone wrestling with the challenge of preaching God's word in a smartphone world.

Text Message Ian Stackhouse,Oliver D. Crisp,2014-03-10 Preaching has fallen on hard times with many questioning its relevance and even its validity as a New Testament practice. This symposium of specially commissioned essays draws together an international team of thirteen scholars and pastors to address the importance of textual preaching in the history and life of the early church, the historic church, and the contemporary church. Contributions include essays on Old Testament preaching, preaching in Hebrews, gender-sensitive preaching, preaching in the theology of Jonathan Edwards, Charles Spurgeon, Dietrich Bonhoeffer, and in Eastern Orthodoxy. It also includes essays on a range of homiletical challenges that textual preaching raises for the contemporary preacher, including genre, preaching without notes, inhabiting the text, and preaching without platitudes. A final reflection by Dave Hansen on the state of textual preaching rounds out the collection. The preaching of the gospel stands at the heart of Christian praxis. These essays make a vital contribution to the recovery of the importance of preaching, focused on the text of Scripture. Written with an eye to the pastor and practitioner as well as those in the pews and in the classroom, this is a book that should appeal to a wide range of readers.

Short Message Service (SMS) Friedhelm Hillebrand,2010-01-21 Contributions from Finn Trosby, Kevin Holley, Ian Harris Written to celebrate the 25th anniversary of SMS standardization by the people who produced the standards, Short Message Service (SMS): The Creation of Personal Text Messaging, describes the development of the SMS standard and its ongoing evolution. The standardization of SMS started in February 1985 as a part of the creation of the second generation digital cellular system GSM, and the 25th anniversary of the first work on SMS provides an opportunity to review and understand how this service was developed. The book also looks to the future, as a large number of new GSM and evolved GSM phones will support SMS as a mass market high availability messaging service, a new simple Multimedia Messaging Service (MMS) suitable for use by everyone and for implementation in every new terminal is proposed. One of the only books which covers the complete SMS genesis from concept ideas to standardization of a first technical solution and its evolution to the present day. Describes the service concept including the limitation of the message length to 160 characters and explains the rationale behind the concept. Based on existing and newly retrieved documentation. Concludes that SMS has a long future since most future GSM phones will support SMS as the only messaging service, and so an SMS evolution is put forward.

Man and Message Kathleen Callow,1998 Presents a new model of text analysis based on meaning rather than surface structure. The authors develop the cognitive categories from which communicated meaning derives and demonstrate how this meaning is realized in texts. They consider how words relate to the world, distinguishing message form from message meaning, the prosodies of the message, schematic and nonschematic message patterns, referential relations, presentational relations, and the meaning structure of a text. The Pragmatics of Text Messaging Michelle A. McSweeney,2018-05-30 This book provides a comprehensive linguistic exploration of textism use by bilingual young adults, illustrating the function of alternative and creative linguistic features and their role in conveying tone through text. Drawing on a corpus of nearly 45,000 text messages donated by bilingual young adults in New York City, this volume explores the ways in which the use of texting features such as 'lol,' emojis, abbreviations, and acronyms is systematic and essential. In part, toward the aim of exposing the tensions bilinguals face navigating a platform that preferences monolingual language practices, the book highlights creativity as a means of both constructing meaning and performing identity for bilingual youths. These findings are extended to explore the role texting plays in communication and identity construction in contemporary society more generally. This volume extends the boundaries of emerging research on language and digital communication, and will be of particular interest to graduate students and scholars in computer-mediated communication, pragmatics, and new media.
