Rewilding European Landscapes Henrique M. Pereira, Laetitia M. Navarro, 2015-05-04 Some European lands have been progressively alleviated of human pressures, particularly traditional agriculture in remote areas. This book proposes that this land abandonment can be seen as an opportunity to restore natural ecosystems via rewilding. We define rewilding as the passive management of ecological successions having in mind the long-term goal of restoring natural ecosystem processes. The book aims at introducing the concept of rewilding to scientists, students and practitioners. The first part presents the theory of rewilding in the European context. The second part of the book directly addresses the link between rewilding, biodiversity, and habitats. The third and last part is dedicated to practical aspects of the implementation of rewilding as a land management option. We believe that this book will both set the basis for future research on rewilding and help practitioners think about how rewilding can take place in areas under their management.

Orthogeriatrics Paolo Falaschi, 2021 This new open access edition supported by the Fragility Fracture Network aims at giving the widest possible dissemination on fragility fracture (especially hip fracture) management and notably in countries where this expertise is sorely needed. It has been extensively revised and updated by the experts of this network to provide a unique and reliable content in one single volume. Throughout the book, attention is given to the difficult question of how to provide best practice in countries where the discipline of geriatric medicine is not well established and resources for secondary prevention are scarce. The revised and updated chapters on the epidemiology of hip fractures, osteoporosis, sarcopenia, surgery, anaesthesia, medical management of frailty, peri-operative complications, rehabilitation and nursing are supplemented by six new chapters. These include an overview of the multidisciplinary approach to fragility fractures and new contributions on pre-hospital care, treatment in the emergency room, falls prevention, nutrition and systems for audit. The reader will have an exhaustive overview and will gain essential, practical knowledge on how best to manage fractures in elderly patients and how to develop clinical systems that do so reliably.

Handbook of Research on Assertiveness, Clarity, and Positivity in Health Literacy Vaz de Almeida, Cristina, Ramos, Susana, 2021-09-17 Health literacy in practice requires the development of techniques that ensure that the patient can better access information, understand its content, know how to use this information, and make better health decisions. If the patient makes better health decisions, there are immediate reflexes in health outcomes. The aim is to develop an approach based on the commitment and creation of an atmosphere of trust that reduces uncertainty, anxiety, and embarrassment based on a process of assertive, clear, and positive communication (ACP model). The Handbook of Research on Assertiveness, Clarity, and Positivity in Health Literacy brings the consolidation of knowledge, strategies, and techniques to improve health literacy. This book discusses the importance of making sound health decisions: decisions that can save lives, prevent premature deaths, avoid hospitalizations and abusive resources to medical emergencies, and improve overall health outcomes for the individual, family, community, and society. Covering topics such as dietary guidance, health behavior change models, and medication reconciliation, this resource has theoretical and practical aspects essential to health information libraries, hospitals, clinics, health centers, health schools, patient associations, health professionals, medical students, researchers, professors, and academicians.

Hamlet on the Holodeck, updated edition Janet H. Murray, 2017-04-07 An updated edition of the classic book on digital storytelling, with a new introduction and expansive chapter commentaries. I want to say to all the hacker-bards from every field—gamers, researchers, journalists, artists, programmers, scriptwriters, creators of authoring systems... please know that I wrote this book for you.” —Hamlet on the Holodeck, from the author's introduction to the updated edition Janet Murray's *Hamlet on the Holodeck* was instantly influential and controversial when it was first published in 1997. Ahead of its time, it accurately predicted the rise of new genres of storytelling from the convergence of traditional media forms and computing. Taking the long view of artistic innovation over decades and even centuries, it remains forward-looking in its description of the development of new artistic traditions of practice, the growth of participatory audiences, and the realization of still-emerging technologies as consumer products. This updated edition of a book the *New Yorker* calls a “cult classic” offers a new introduction by Murray and chapter-by-chapter commentary relating Murray's predictions and enduring design insights to the most significant storytelling innovations of the past twenty years, from long-form television to artificial intelligence to virtual reality. Murray identifies the powerful new set of expressive affordances that computing offers for the ancient human activity of storytelling and considers what would be necessary for interactive narrative to become a mature and compelling art form. Her argument met with some resistance from print loyalists and postmodern hypertext enthusiasts, and it provoked a foundational debate in the emerging field of game studies on the relationship between narrative and videogames. But since *Hamlet on the Holodeck*'s publication, a practice that was largely speculative has been validated by academia, artistic practice, and the marketplace. In this substantially updated edition, Murray provides fresh examples of expressive digital storytelling and identifies new directions for narrative innovation.

Historic Cities of the Americas [2 volumes] David F. Marley, 2005-09-12 With rare maps, prints, and photographs, this unique volume explores the dramatic history of the Americas through the birth and development of the hemisphere's great cities. Written by award-winning author David F. Marley, *Historic Cities of the Americas* covers the hard-to-find information of these cities' earliest years, including the unique aspects of each region's economy and demography, such as the growth of local mining, trade, or industry. The chronological layout, aided by the numerous maps and photographs, reveals the exceptional changes, relocations, destruction, and transformations these cities endured to become the metropolises they are today. *Historic Cities of the Americas* provides over 70 extensively detailed entries covering the foundation and evolution of the most significant urban areas in the western hemisphere. Critically researched, this work offers a rare look into the times prior to Christopher Columbus' arrival in 1492 and explores the common difficulties overcome by these European-conquered or -founded cities as they flourished into some of the most influential locations in the world.

Interculturalidad, inclusión y equidad en educación Erla Mariela Morales Morgado, 2023-01-16 Los trabajos presentados en el congreso «INCLUYE», organizado por el Grupo de Investigación Reconocido (GIR) en Multiculturalidad, Innovación y Tecnologías Aplicadas (MITA) de la Universidad de Salamanca, reúne a la comunidad investigadores para discutir y reflexionar sobre tres ejes temáticos relevantes y urgentes para nuestra educación actual, en las diversas latitudes del mundo: equidad e igualdad en educación escolar y superior; educación intercultural; métodos, metodologías y evaluación inclusivas. En el primero se presentan reflexiones y praxis educativas, que intentan alcanzar la equidad e igualdad, dejando atrás las etiquetas que lejos de unir, marcan las diferencias en el alumnado con diversidad de género y necesidades especiales. En el segundo se aborda la educación intercultural y multicultural en diversos contextos educativos en el contexto de los fenómenos migratorios que nos encontramos viviendo a nivel mundial. Tiene especial énfasis las competencias y principios pedagógicos para la acción educativa intercultural, como en las intervenciones educativas para prevenir situaciones de conflicto. En el tercer eje se exponen trabajos que abordan la innovación educativa para la inclusión a través de metodologías activas y emergentes para que el alumnado logre el máximo nivel de desarrollo personal y la adquisición del mayor grado de conocimientos y destrezas de acuerdo con sus propias posibilidades. Este tema, está dirigido especialmente a aquellas propuestas que recojan estrategias pedagógicas que tengan como finalidad la inclusión de todo el alumnado en la comunidad educativa, especialmente de los grupos

Touring Poverty Bianca Freire-Medeiros,2014-11-13 Touring Poverty addresses a highly controversial practice: the transformation of impoverished neighbourhoods into valued attractions for international tourists. In the megacities of the Global South, selected and idealized aspects of poverty are being turned into a tourist commodity for consumption. The book takes the reader on a journey through Rocinha, a neighbourhood in Rio de Janeiro which is advertised as the largest favela in Latin America. Bianca Freire-Medeiros presents interviews with tour operators, guides, tourists and dwellers to explore the vital questions raised by this kind of tourism. How and why do diverse social actors and institutions orchestrate, perform and consume touristic poverty? In the context of globalization and neoliberalism, what are the politics of selling and buying the social experience of cities, cultures and peoples? With a full and sensitive exploration of the ethical debates surrounding the ‘sale of emotions’ elicited by the first-hand contemplation of poverty, Touring Poverty is an innovative book that provokes the reader to think about the role played by tourism – and our role as tourists – within a context of growing poverty. It will be of interest to students of sociology, anthropology, ethnography and methodology, urban studies, tourism studies, mobility studies, development studies, politics and international relations.

Puberty from Bench to Clinic J.-P. Bourguignon,A.-S. Parent,2015-12-17 Puberty is a unique paradigm for the understanding of gene-environment interaction and developmental programming. Therefore, normal and abnormal pubertal development can be divided and examined in three sections: the role of genetic factors, the role of environmental factors (including nutrition) and therapeutic issues in disorders of puberty. Dealing with all of these sections and framed along current key concepts in pediatric endocrinology, experts share their view on critical issues such as weighting of genetic versus environmental factors or the impact of environmental factors in relation to critical periods in development. Not only showing the consensus and controversial issues in the various areas, each chapter presents lessons for clinical management in an attempt to link basic research, physiology and pathophysiology with the clinical management of pubertal disorders. Puberty from Bench to Clinic bridges up-to-date concepts from animal and human physiology and pathology towards a better understanding and management of pubertal disorders, making it a unique resource for researchers in the field of development and reproduction, clinical scientists and practitioners in neuro-, pediatric and adolescent endocrinology as well as gynecology.

The Routledge Handbook of Museums, Heritage, and Death Trish Biers,Katie Stringer Clary,2023-07-26 This book provides a comprehensive examination of death, dying, and human remains in museums and heritage sites around the world. Presenting a diverse range of contributions from scholars, practitioners, and artists, the book reminds us that death and the dead body are omnipresent in museum and heritage spaces. Chapters appraise collection practices and their historical context, present global perspectives and potential resolutions, and suggest how death and dying should be presented to the public. Acknowledging that professionals in the galleries, libraries, archives, and museums (GLAM) fields are engaging in vital discussions about repatriation and anti-colonialist narratives, the book includes reflections on a variety of deathscapes that are at the forefront of the debate. Taking a multivocal approach, the handbook provides a foundation for debate as well as a reference for how the dead are treated within the public arena. Most important, perhaps, the book highlights best practices and calls for more ethical frameworks and strategies for collaboration, particularly with descendant communities. The Routledge Handbook of Museums, Heritage, and Death will be useful to all individuals working with, studying, and interested in curation and exhibition at museums and heritage sites around the world. It will be of particular interest to those working in the fields of heritage, museum studies, death studies, archaeology, anthropology, sociology, and history.
