Critical Engagements: A Journal of Criticism and Theory 2.1 Philip Tew,

Two Dimensions of Meaning Andrew Goatly, 2022-09-30 The book takes as its point of departure the notion that similarity and contiguity are fundamental to meaning. It shows how they manifest in oral, literate, print, and internet cultures, in language acquisition, pragmatics, dialogism, classification, the semantics of grammar, literature, and, most centrally, metaphor and metonymy. The book situates these reflections on similarity and contiguity in the interplay of language, cognition, culture, and ideology, and within broader

debates around such issues as capitalism, biodiversity, and human control over nature. Positing that while similarity-focused systems can be reductive, and have therefore been contested in social science, philosophy, and poetry, and contiguity-based ones might disregard useful statistical and scientific evidence, Andrew Goatly argues for the need for humans to entertain diverse metaphors, models, and languages as ways of understanding and acting on our world. The volume also considers the cognitive connections between the similarity-contiguity duality and the noun-verb distinction. This innovative volume will appeal to scholars involved in wider debates on meaning, within the fields of cognitive semantics, pragmatics, metaphor and metonymy theory, critical discourse analysis, and the philosophy of language. Equally, the motivated and intelligent general reader, interested in language, philosophy, culture, and ecology, should find the later chapters of the book fascinating, and the earlier technical chapters accessible.

Journal for the Evangelical Study of the Old Testament, 2.1 Stephen J. Andrews, 2013-07-01

Journal for the Evangelical Study of the Old Testament (JESOT) is a peer-reviewed journal devoted to the academic and evangelical study of the Old Testament. The journal seeks to fill a need in academia by providing a venue for high-level scholarship on the Old Testament from an

evangelical standpoint. The journal is not affiliated with any particular academic institution, and with an international editorial board, open access format, and multi-language submissions, JESOT cultivates and promotes Old Testament scholarship in the evangelical global community. The journal differs from many evangelical journals in that it seeks to publish current academic research in the areas of ancient Near Eastern backgrounds, Dead Sea Scrolls, Rabbinics, Linguistics, Septuagint, Research Methodology, Literary Analysis, Exegesis, Text Criticism, and Theology as they pertain only to the Old Testament. JESOT also includes up-to-date book reviews on various academic studies of the Old Testament.

Journal of Biblical and Theological Studies, Issue 2.1 Daniel S. Diffey, Ryan A. Brandt, Justin McLendon, 2017-03-29 The Journal of Biblical and Theological Studies (JBTS) is an academic journal focused on the fields of Bible and Theology from an inter-denominational point of view. The journal is comprised of an editorial board of scholars that represent several academic institutions throughout the world. JBTS is concerned with presenting high-level original scholarship in an approachable way. Academic journals are often written by scholars for other scholars. They are technical in nature, assuming a robust knowledge of the field. There are fewer journals that seek to introduce biblical and theological scholarship that is also accessible to students. JBTS seeks to provide high-level scholarship and research to both scholars and students, which results in original scholarship that is readable and accessible. As an inter-denominational journal JBTS is broadly evangelical. We accept contributions in all theological disciplines from any

evangelical perspective. In particular, we encourage articles and book reviews within the fields of Old Testament, New Testament, Biblical Theology, Church History, Systematic Theology, Practical Theology, Philosophical Theology, Philosophy, and Ethics.

Strategic Engineering Jacques Arcade, 2021-03-31 In the face of increasing complexity, uncertainty and difficulty in the design and implementation of reforms, companies, organizations and institutions must strive to capitalize on the prevailing disarray by acting wisely in overcoming it. Strategic engineering is part of an integrative, tool-based approach, inspired by the life sciences and creative recursion. This book is structured into three parts, which correspond to the three main phases of the strategic engineering approach: observe and discern; judge and arbitrate; act and intervene. Strategic Engineering has wide appeal, relevant to senior leaders, decisionmakers, managers and practitioners within businesses, government and local authorities. It is also intended for those who wish to develop their capability in anticipatory or transformative management within economic, sociopolitical and strategic contexts.

Hamish MacCunn (1868-1916): A Musical Life Jennifer L. Oates, 2016-04-22 Hamish MacCunn's career unfolded amidst the restructuring of British musical culture and the rewriting of the Western European political landscape. Having risen to fame in the late 1880s with a string of Scottish works, MacCunn further highlighted his Caledonian background by cultivating a Scottish

artistic persona that defined him throughout his life. His attempts to broaden his appeal ultimately failed. This, along with his difficult personality and a series of poor professional choices, led to the slow demise of what began as a promising career. As the first comprehensive study of MacCunn's life, the book illustrates how social and cultural situations as well as his personal relationships influenced his career. While his fierce loyalty to his friends endeared him to influential people who helped him throughout his career, his refusal of his Royal College of Music degree and his failure to complete early commissions assured him a difficult path. Drawing upon primary resources, Oates traces the development of MacCunn's music chronologically, juxtaposing his Scottish and more cosmopolitan compositions within a discussion of his life and other professional activities. This picture of MacCunn and his music reveals on the one hand a talented composer who played a role in establishing national identity in British music and, on the other, a man who unwittingly sabotaged his own career.

It Keeps Me Seeking Andrew Briggs, Hans Halvorson, Andrew Steane, 2018-09-05
Here is a fresh look at how science contributes to the bigger picture of human flourishing, through a collage of science and philosophy, richly illustrated by the authors' own experience and personal reflection. They survey the territory of fundamental physics, machine learning, philosophy of human identity, evolutionary biology, miracles, arguments from design,

naturalism, the history of ideas, and more. The natural world can be appreciated not only for itself, but also as an eloquent gesture, a narrative and a pointer beyond itself. Our human journey is not to a theorem or a treatise, but to a meeting which encompasses all our capacities. In this meeting, science is the means to find out about the structure of the physical world of which we are a part, not a means to reduce ourselves and our fellow human beings to mere objects of scrutiny, and still less a means to attempt the utterly futile exercise of trying to do that to God. We have intellectual permission to be open to the notion that God can be trusted and known. The material world encourages an open-hearted reaching out to something more, with a freedom to seek and to be received by what lies beyond the scope of purely impersonal descriptions and attitudes.

Aëtiana Jaap Mansfeld, David T. Runia, 1997 The theme of this study is the Doxography of problems in physics from the Presocratics to the early first century BCE attributed to Aëtius. Part I focuses on the argument of the compendium as a whole, of its books, of its sequences of chapters, and of individual chapters, against the background of Peripatetic and Stoic

methodology. Part II offers the first full reconstruction in a single unified text of Book II, which deals with the cosmos and the heavenly bodies. It is based on extensive analysis of the relevant witnesses and includes listings of numerous doxographical-dialectical parallels in other ancient writings. This new treatment of the evidence supersedes Diels still dominant source-critical approach, and will prove indispensable for scholars in ancient philosophy.

Divine Secrets and Human Imaginations Angelika Berlejung, 2021-04-13 The articles in this volume of collected essays, written over the last two decades and all revised, updated, and supplemented with unpublished material, are grouped around two themes: Divine Secrets and Human Imaginations. The first essays deal with the production, initiation, use and function, the abduction, repatriation, and the replacement of divine images, their outer appearance, and the many facets of the divine presence theology in Ancient Mesopotamia. The essays on the second topic deal with human imaginations, human constructs, and constructed memories, which assign meaning to the past or to things or experiences that are beyond human control. Thematically, several aspects of the human condition are examined, such as the ideas associated in the Old Testament and the Ancient Near East with death, corporeality, enemies, disasters, utopias, and passionate love.

Smart Homes and Their Users Tom Hargreaves,Charlie Wilson,2017-09-25 Smart
home technologies promise to transform domestic comfort, convenience,
security and leisure while also reducing energy use. But delivering on these
potentially conflicting promises depends on how they are adopted and used in
homes. This book starts by developing a new analytical framework for
understanding smart homes and their users. Drawing on a range of new
empirical research combining both qualitative and quantitative data, the book
then explores how smart home technologies are perceived by potential users,
how they can be used to link domestic energy use to common daily activities,
how they may (or may not) be integrated into everyday life by actual users,
and how they serve to change the nature of control within households and the
home. The book concludes by synthesising a range of evidence-based insights,
and posing a series of challenges for industry, policy, and research that

need addressing if a smart home future is to be realised. Researchers will find this book provides useful insights into this fast-growing field
