Terrific Makerspace Projects Juan Denzer, Sharona Ginsberg, 2020-08-12 Terrific Makerspace Projects: A Practical Guide for Librarians features fifteen customizable projects that were designed as projects created by librarians/makerspace facilitators, rather than projects in which librarians guided others (makerspace users). These projects were showcased during library events with the goal of promoting the makerspace, as well as other library services, while using them to build connections both within and external to the library. This book outlines maker projects in detail and provides plenty of photos and resources so readers can recreate, customize, and implement them. People at all skill levels in every type of makerspace will find something they can try, with projects that range from simple and low-tech to more complex and tech-heavy. Most projects are inexpensive, taking advantage of free online tools, upcycled or repurposed materials, and low cost electronics such as Arduinos. Each project can be approached as an offering for makerspace visitors or can be created by library employees themselves as tools to engage in outreach and promote the makerspace, library services, the institution, and more. Every project has been created and tested in a real library setting by the authors, who present lessons learned, possible variations, and different ideas on how to implement the projects to their fullest extent. Explore the idea of using the makerspace to highlight the value of other library services, or simply find new and fun ways to engage with your users. The book also offers suggestions on how to be a great maker, and tips on makerspace safety, finding low-cost materials, and more. Whether you're just beginning your makerspace or looking for fresh ideas for your established space, this book has something to offer.

Digital Marketing using Google Services Balu, 2015-01-24 Digital Marketing using Google Services book Aim of this book: To make your Website listed in Google Search. Photography Trenton Hamilton, 2016-07-15 Photography is generally considered to have had its birth in 1839, when Louis-Jacques-Mandé Daguerre first revealed his photographic process to the public. Increasingly, cameras have become more automated and electronic over the years. In spite of the increasing sophistication of the equipment, however, the photographer's eye continues to be all-important. Photography remains a unique human act. This compendium focuses on the technology of photography, the camera and its parts, types of lenses, shutters and speeds, films and filters, making photographs, exposing film, lighting, darkroom techniques and processing, printing photographs, and some of the practical applications of the medium.

Advances in Artificial Intelligence Balázs Kégl, Guy Lapalme, 2005-05-03 The 18th conference of the Canadian Society for the Computational Study of Intelligence (CSCSI) continued the success of its predecessors. This set of - pers re?ects the diversity of the Canadian AI community and its international partners. AI 2005 attracted 135 high-quality submissions: 64 from Canada and 71 from around the world. Of these, eight were written in French. All submitted papers were thoroughly reviewed by at least three members of the Program Committee. A total of 30 contributions, accepted as long papers, and 19 as short papers are included in this volume. We invited three distinguished researchers to give talks about their current research interests: Eric Brill from Microsoft Research, Craig Boutilier from the University of Toronto, and Henry Krautz from the University of Washington. The organization of such a successful conference bene?ted from the coll- oration of many individuals. Foremost, we would like to express our apprec- tion to the Program Committee members and external referees, who provided timely and signi?cant reviews. To manage the submission and reviewing process we used the Paperdyne system, which was developed by Dirk Peters. We owe special thanks to Kellogg Booth and Tricia d'Entremont for handling the local arrangements and registration. We also thank Bruce Spencer and members of the CSCSI executive for all their e?orts in making AI 2005 a successful conference.
