Hilary R. Sessions

Where's My Tiffany? Hilary R. Sessions, 2011-02 While out exercising the afternoon of February 9, 1989, college student Tiffany Sessions disappeared. Her mother, Hilary, frantically tried to find her, but after twenty years, Tiffany is still missing. *Where's My Tiffany?* is a heartrending glimpse into one mother's struggles to deal with the emotions, hardships, and grief over the loss of her daughter. With intimate detail, Sessions reveals how the case unraveled, from the first moments of Tiffany's disappearance through the agonizing search for clues, and finally, to the eventual realization that Tiffany might not come back safely. But Sessions also focuses on how she turned her tragedy into a personal victory by never giving up hope. Instead of losing to the darkness of despair, Sessions sought to help other families of missing children and became a teacher, children's advocate, and legislative shepherd. She also explores the deeply personal spiritual journey she underwent during the twenty-year saga, one that made her a stronger, more courageous person. Brutally honest and deeply moving, *Where's My Tiffany?* offers a rare, behind-the-scenes look at the incredible void left by a missing child. Yet it is also a story of hope and comfort for others facing this devastating challenge.

Capturing Light Michael Freeman, 2014-06-20 In almost all photography it's the quality of light that makes or breaks the shot. For professional photographers, chasing the light, waiting for it, sometimes helping it, and finally capturing it is a constant preoccupation – and for some an obsession. Drawing on four

decades of doing just this, Michael Freeman takes a simple but practical approach to reacting to, and capturing photography's most important commodity. There are just three sections titled Waiting, Chasing, and Helping: Waiting explains the kinds of lighting that photographers can anticipate and plan for, while Chasing explores the transient, serendipitous light that photographers have to work quickly to exploit. Helping, the final and most technical section, focuses on the skills and techniques for enhancing, reducing, or otherwise controlling light, covering everything from in-the-field shooting choices to technical transformations to post-production.

Habitat Suitability and Distribution Models Antoine Guisan, Wilfried Thuiller, Niklaus E. Zimmermann, 2017-09-14 This book introduces the key stages of niche-based habitat suitability model building, evaluation and prediction required for understanding and predicting future patterns of species and biodiversity. Beginning with the main theory behind ecological niches and species distributions, the book proceeds through all

major steps of model building, from conceptualization and model training to model evaluation and spatio-temporal predictions. Extensive examples using R support graduate students and researchers in quantifying ecological niches and predicting species distributions with their own data, and help to address key environmental and conservation problems. Reflecting this highly active field of research, the book incorporates the latest developments from informatics and statistics, as well as using data from remote sources such as satellite imagery. A website at www.unil.ch/hsdm contains the codes and supporting material required to run the examples and teach courses.
