*Engines of Discovery* Andrew Sessler,Edmund Wilson,2014-04-17 The first edition of *Engines of Discovery* celebrated in words, images and anecdotes the accelerators and their constructors that culminated in the discovery of the Higgs boson. But even before the Higgs was discovered, before the champagne corks popped and while the television producers brushed up their quantum mechanics, a new wave of enthusiasm for accelerators to be applied for more practical purposes was gaining momentum. Almost all fields of human endeavour will be enhanced by this trend: energy conservation, medical diagnostics and treatment, national security, as well as industrial processing. Accelerators have been used most spectacularly to reveal the structure of the complex molecules that determine our metabolism and life. For every accelerator chasing the Higgs, there are now ten thousand serving other purposes. It is high time to move from abstract mathematics and philosophy to the practical needs of humankind. It is the aim of this revised and expanded edition to describe this revolution in a manner which will attract the young, not only to apply their curiosity to the building blocks of matter but to help them contribute to the improvement of the quality of life itself on this planet. As always, the authors have tried to avoid lengthy mathematical description. In describing a field which reaches out to almost all of today's cutting edge technology, some detailed explanation cannot be avoided but this has been confined to sidebars. References guide experts to move on to the journal *Reviews of Accelerator Science and Technology* and other publications for more information. But first we would urge every young physicist, teacher, journalist and politician to read this book. A fascinating story of inventions and breakthroughs, presented to us by two prominent scientists, takes the reader through a mesmerising gallery of revolutionary developments in accelerator science and technology. The book is a wonderful source of inspiration and will be a great companion to the young and curious who, undoubtedly, will be the ones to make new breakthroughs and new discoveries in the future.” Professor Andrei A Seryi Director, John Adams Institute for Accelerator Science University of Oxford, Royal Holloway University of London and Imperial College London “Andrew Sessler's and Edmund Wilson's history of accelerators is a rich tapestry illustrating an intellectual adventure story with its own heroes, dramas, competitions, and even missteps and a few villains. They explain the imaginative physical and engineering insights that accelerator pioneers have employed to make modern accelerators engines of commerce and engines of well being as well as the quintessential engines of discovery. They describe this human enterprise in language that is easily accessible to the layman. Their book is lavishly illustrated with photographs of ground-breaking machines and their applications from the dawn of the accelerator age to the present.” William A Barletta USPAS Director Adjunct Professor of Physics, MIT & UCLA Visiting Professor of Economics, Univ. of Ljubljana “Accelerators have become essential tools in many areas of research, ranging from medicine through biology, chemistry and physics to archaeology. They also play vital roles in medicine and industry. Sessler and Wilson's wide-ranging history of the development of accelerators and their uses will appeal to everyone with an interest in how science and technology progress. They provide an insiders' perspective, illustrated by a wealth of anecdotes and sketches of engineers and scientists who have advanced the state of the art. Their book will enlighten and entertain experts as well as general readers.” Professor Sir Chris Llewellyn Smith FRS Director of Energy Research Oxford University President of the Council of SESAME (Synchrotron-light for Experimental Science and Applications in the Middle East), and Director General of CERN (1994–98) “In this revised edition of *Engines of Discovery*, the authors have substantially expanded their text on accelerators. From principles to applications reaching deep into the specialized fields involving dedicated accelerators, the book describes the history and the state of

the art of accelerator-based facilities used by experimental scientists worldwide. In particular the applications of accelerators in research and industry, medicine and security systems highlight the important role of accelerators and their vast impact on our daily life.” Norbert Holtkamp Associate Laboratory Director, Accelerator Directorate SLAC National Accelerator Laboratory, Stanford “This book will stand as part of Andrew Sessler's legacy to future generations. The hope is that it will inspire budding young scientists and engineers today, for they are the future of the field.” Christine Sutton CERN “In conclusion, the book offers a very pleasant trip in the world of accelerators and applications, putting particular emphasis on the facilities designed and realized to give answers to common life questions.” Il Nuovo Saggiatore

**The Sales Acceleration Formula** Mark Roberge,2015-02-24 Use data, technology, and inbound selling to build a remarkable team and accelerate sales The Sales Acceleration Formula provides a scalable, predictable approach to growing revenue and building a winning sales team. Everyone wants to build the next \$100 million business and author Mark Roberge has actually done it using a unique methodology that he shares with his readers. As an MIT alum with an engineering background, Roberge challenged the conventional methods of scaling sales utilizing the metrics-driven, process-oriented lens through which he was trained to see the world. In this book, he reveals his formulas for success. Readers will learn how to apply data, technology, and inbound selling to every aspect of accelerating sales, including hiring, training, managing, and generating demand. As SVP of Worldwide Sales and Services for software company HubSpot, Mark led hundreds of his employees to the acquisition and retention of the company's first 10,000 customers across more than 60 countries. This book outlines his approach and provides an action plan for others to replicate his success, including the following key elements: Hire the same successful salesperson every time – The Sales Hiring Formula Train every salesperson in the same manner – The Sales Training Formula Hold salespeople accountable to the same sales process – The Sales Management Formula Provide salespeople with the same quality and quantity of leads every month – The Demand Generation Formula Leverage technology to enable better buying for customers and faster selling for salespeople Business owners, sales executives, and investors are all looking to turn their brilliant ideas into the next \$100 million revenue business. Often, the biggest challenge they face is the task of scaling sales. They crave a blueprint for success, but fail to find it because sales has traditionally been referred to as an art form, rather than a science. You can't major in sales in college. Many people question whether sales can even be taught. Executives and entrepreneurs are often left feeling helpless and hopeless. The Sales Acceleration Formula completely alters this paradigm. In today's digital world, in which every action is logged and masses of data sit at our fingertips, building a sales team no longer needs to be an art form. There is a process. Sales can be predictable. A formula does exist.

Siegel MD,Marietta McCarty,2012-02-21 Learn about the joys and pitfalls of parenting—from infancy to adolescence—and strategies for raising well-adjusted, competent children with open minds and big hearts, from two of Tarcher/Penguin's favorite authors. Now only \$25.99! Parenting from the Inside Out by Dr. Daniel Siegel How many parents have found themselves thinking: I can't believe I just said to my child the very thing my parents used to say to me! Am I just destined to repeat the mistakes of my parents? In Parenting from the Inside Out, child psychiatrist Daniel J. Siegel, M.D., and early childhood expert Mary Hartzell, M.Ed., explore the extent to which our childhood experiences actually do shape the way we parent. Drawing upon stunning new findings in neurobiology and attachment research, they explain how interpersonal relationships directly impact the development of the brain, and offer parents a step-by-step approach to forming a deeper understanding of their own life stories, which will help them raise compassionate and resilient children. Born out of a series of parents' workshops that combined Siegel's cutting-edge research on how communication impacts brain development with Hartzell's thirty years of experience as a child-development specialist and parent educator, Parenting from the Inside Out guides parents through creating the necessary foundations for loving and secure relationships with their children. Little Big Minds by Marietta McCarty A guide for parents and educators to sharing the enduring ideas of the biggest minds throughout the centuries—from Plato to Jane Addams—with the littlest minds. Children are no strangers to cruelty and courage, to love and to loss, and in this unique book teacher and educational consultant Marietta McCarty reveals that they are, in fact, natural philosophers. Drawing on a program she has honed in schools around the country over the last fifteen years, Little Big Minds (a New York Times extended list bestseller) guides parents and educators in introducing philosophy to K-8 children in order to develop their critical thinking, deepen their appreciation for others, and brace them for the philosophical quandaries that lurk in all of our lives, young or old. Arranged according to themes-including prejudice, compassion, and death-and featuring the work of philosophers from Plato and Socrates to the Dalai Lama and Martin Luther King Jr., this step-by-step guide to teaching kids how to think philosophically is full of excellent discussion questions, teaching tips, and group exercises.
