Skeleton Key David Shenk,Steve Silberman,2015-06-23 NOW AN EBOOK FOR THE FIRST TIME For fifty years and more than two thousand shows, the Grateful Dead have been earning the deadication of more than a million fans. Along the way, Deadheads have built an original and authentic American subculture, with vivid jargon and rich love, and its own legends, myths, and spirituality. Skeleton Key: A Dictionary for Deadheads is the first map of what Jerry Garcia calls the Grateful Dead outback, as seen through the eyes of the faithful, friends, and family, including Bill Walton, Elvis Costello, Tipper Gore, Al Franken, Bob Bralove, Dick Latvala, Blair Jackson, David Gans, Bruce Hornsby, Rob Wasserman, and Robert Hunter. Skeleton Key puts you on the Merry Pranksters' bus behind the real Cowboy Neal, uncovers the origins of Cherry Garcia, follows the dancing bear on its trip from psychedelic artifact to trademarked icon, and unlocks the Dead's own tape vault. Informative reading for the new fan or the most grizzled tourhead, Skeleton Key shines throughout with Deadheads' own stories, wit, insiders' knowledge, sincere appreciation of the music of the band beyond description, and the diverse and soulful culture it inspires.

Three Prominent Tournament Formats Dmitry Ryvkin,Andreas Ortmann,2008 We analyze tournaments of heterogeneous players from an organizer's perspective. Using a simple model of a noisy tournament, we demonstrate how the likelihood of selecting the best player, here termed the predictive power of a tournament, depends on the tournament format, the distribution of players' types, and the overall noise level. We formalize the organizer's decision problem for varying time and measurement costs and compare the predictive power of three widely used tournament formats - contests, binary elimination tournaments, and round-robin tournaments. We show which formats are preferred in the various scenarios and find that for certain parameter constellations, certain formats are not viable.

Enter Rumour Robert Bernard,2012-01-19 The common perception of Britain's Victorian era as one of strict and strait-laced conformity has long been subject to rebuttal, and Robert Bernard Martin's Enter Rumour (1962) was an early and distinguished endeavour in this line. Herein Martin weighs the evidence of four scandalous incidents that aroused great public interest during the first dozen years of Victoria's reign, each of them emanating from 'what the Victorians might have called the higher orders of society.' Martin recounts the sorry tale of Lady Flora Hastings, victim of Court gossip; Lord Eglinton, who tried and failed to revive the medieval tournament; the strange case of the St Cross Hospital Charity; and George Hudson, 'Railway King', whose rise and fall remains a story for our times. Martin examines sources expertly and further explores how three of these scandals were transformed into fiction - by none less than Dickens, Disraeli and Trollope.

Tennis Confidential Paul Fein,2003 In this outstanding collection of essays and interviews, Paul Fein takes the reader into the world of the pro tennis tour with inside scoops about the game's greatest stars, past and present. Tennis Confidential includes interviews with such all-time greats as Pete Sampras, John McEnroe, Arthur Ashe, and Jimmy Connors along with essays about the careers of other stars like Andre Agassi, the Williams sisters, Jennifer Capriati, and Anna Kournikova. Fein also reviews the careers of pioneering players like Martina Navratilova, Bjorn Borg, and Rod Laver. Tennis Confidential tackles the issues that confront the sport today, from the media's fascination with teenage players on the women's tour to the changes in the game caused by new racket designs and tactical innovations. Fein also reviews the ten greatest matches in tennis history. He gives fans at every level a unique perspective on the game and its history.

Players and Pawns Gary Alan Fine,2015-08-06 A chess match seems as solitary an endeavor as there is in sports: two minds, on their own, in fierce opposition. In contrast, Gary Alan Fine argues that chess is a social duet: two players in silent dialogue who always take each other into account in their play. Surrounding that one-on-one contest is a community life that can be nearly as dramatic and intense as the across-the-board confrontation. Fine has spent years immersed in the communities of amateur and professional chess players, and with *Players and Pawns* he takes readers deep inside them, revealing a complex, brilliant, feisty world of commitment and conflict. Within their community, chess players find both support and challenges, all amid a shared interest in and love of the long-standing traditions of the game, traditions that help chess players build a communal identity. Full of idiosyncratic characters and dramatic gameplay, *Players and Pawns* is a celebration of the fascinating world of serious chess.

Guinness World Records 2009 Craig Glenday,2009 Lists records, superlatives, and unusual facts about computer and video games, and includes interviews with champion gamers, tips on play, and profiles of the best-selling games.

Improving Your NCAA® Bracket with Statistics Tom Adams,2019-01-14 Twenty-four million people wager nearly \$3 billion on college basketball pools each year, but few are aware that winning strategies have been developed by researchers at Harvard, Yale, and other universities over the past two decades. Bad advice from media sources and even our own psychological inclinations are often a bigger obstacle to winning than our pool opponents. Profit opportunities are missed and most brackets submitted to pools don't have a breakeven chance to win money before the tournament begins. *Improving Your NCAA® Bracket with Statistics* is both an easy-to-use tip sheet to improve your winning odds and an intellectual history of how statistical reasoning has been applied to the bracket pool using standard and innovative methods. It covers bracket improvement methods ranging from those that require only the information in the seeded bracket to sophisticated estimation techniques available via online simulations. Included are: Prominently displayed bracket improvement tips based on the published research A history of the origins of the bracket pool A history of bracket improvement methods and their results in play Historical sketches and background information on the mathematical and statistical methods that have been used in bracket analysis A source list of good bracket pool advice available each year that seeks to be comprehensive Warnings about common bad advice that will hurt your chances Tom Adams' work presenting bracket improvement methods has been featured in the *New York Times*, *Sports Illustrated*, and *SmartMoney* magazine.

The Wealth Creators Roy C. Smith,2007-04-01 *The Multi-Millionaires How Much They Made. How Each One Made It.* At the beginning of 2000, there were nearly three hundred billionaires and five million millionaires living in the United States. Total household wealth had reached \$37 trillion, up from just over \$8 trillion when Ronald Reagan became president. The stories of these super-rich men and women reflect the social and economic history of the last twenty years. Roy C. Smith takes the reader into five core areas of opportunity today as well as the career turning points of key individuals in each: - Entrepreneurs like Mike Bloomberg, Sam Walton, and Ted Turner, - Dealmakers such as Kirk Kerkorian, Ron Perelman, and Larry Tisch, - Investors like Warren Buffett and financiers like George Soros, - Corporate executives such as Jack Welch, Sandy Weill, and Michael Eisner, - And entertainers like Oprah Winfrey, Steven Spielberg, and Tiger Woods.

Research and Advanced Technology for Digital Libraries Stefan Gradmann,Francesca Borri,Carlo Meghini,Heiko Schuldt,2011-09-15 This book constitutes the refereed proceedings of the International Conference on Theory and Practice of Digital Libraries, TPD L 2011 - formerly known as ECDL (European Conference on Research and Advanced Technology for Digital Libraries) - held in Berlin, Germany, in September 2011. The 27 full papers, 13 short papers, 9 posters and 9 demos presented in this volume were carefully reviewed and selected from 162 initial submissions. In addition the book contains the abstract of 2 keynote speeches and an appendix stating information on the doctoral consortium, as well as the panel, which were held at the conference. The papers are grouped in topical sections on networked information, semantics and interoperability, systems and architectures, text and multimedia retrieval, collaborative information spaces, DL applications and legal aspects, user interaction and information visualization, user studies, archives and repositories, europeana, and preservation.

Just Law Tim Just,2016-08-20 Ever been confused by the division of a tournament prize fund? Wonder how to fix an incorrectly set clock? How can players file a complaint? Can someone explain official and unofficial ratings? What's the secret to dealing with chess lawyers? Is there a trick tournaments directors can use to start games on time? How do organizers learn to construct prize funds, rent space, hire staff, and advertise? Puzzled by scholastic chess tournaments? Get the *Just Law* scoop on the most popular chess tournament questions from players, tournament directors and organizers. In the book's Q&A format, Tim Just guides you through a wide range of tournament topics, including details about notation, draws, byes, clocks, prizes, prize funds, ratings, making claims, playing sites, time controls, pairings, tournament management, tournament creation, scholastic chess mysteries, and even more. *Just Law's* bonus material includes a list of rulebook Successful Player Habits and the *Just Law* Jargon list of common US Chess terms. Tim's expert replies come from his stints as the US Chess rulebook editor for both the 5th and 6th editions. Then there are his many years

as a National Tournament Director, tournament organizer, US Chess Delegate, and member of both the US Chess rules committee plus the US Chess tournament director certification committee.

Backgammon For Serious Players Bill Robertie, 2000

The Masters Curt Sampson, 2010-11-10 The Masters golf tournament weaves a hypnotic spell. It is the toughest ticket in sports, with black-market tickets selling for \$10,000 and more. Success at Augusta National breeds legends, while failure can overshadow even the most brilliant of careers. But as Curt Sampson, author of the bestselling *Hogan*, reveals in *The Masters*, a cold heart beats behind the warm antebellum façade of this famous Augusta course. And that heart belongs to the man who killed himself on the grounds two decades ago. Club and tournament founder Clifford Roberts, a New York stockbroker, still seems to run the place from his grave. An elusive and reclusive figure, Roberts pulled the strings that made the Masters the greatest golf tournament in the world. His story—including his relationship with presidents, power brokers, and every golf champion from Bobby Jones to Arnold Palmer to Jack Nicklaus—has never been told. Until now. *The Masters* is an amazing slice of history, taking us inside the presidency of Dwight D. Eisenhower, Augusta's most famous member. It is a look at how the new South coexists with the old South: the relationships between blacks and whites, between Southerners and Northerners, between rich and poor—with such characters as James Brown, the Godfather of Soul; the great boxer Beau Jack; and Frank Stranahan, the playboy golfer and the only white pro ever banned from the tournament. *The Masters* is a spellbinding portrait of a tournament unlike any other.

Knockout Tournament Design Thuc Duy Vu, 2010 Knockout tournaments constitute a very common and important form of social institution. They are perhaps best known in sporting competitions, but also play a key role in other social and commercial settings as they model a specific type of election scheme (namely, sequential pairwise elimination election). In such tournaments the organizer controls the shape of the tournament (a binary tree) and the seeding of the players (their assignment to the tree leaves). A tournament can involve millions of people and billions of dollars, and yet there is no consensus on how it should be organized. It is usually dependent on arbitrary decisions of the organizers, and it remains unclear why one design receives precedence over another. The question turns out to be surprisingly subtle. It depends among other things on (a) the objective, (b) the model of the players, (c) the constraints on the structure of the tournament, and (d) whether one considers only ordinal solutions or also cardinal ones. We investigate the problem of finding a good or optimal tournament design across various settings. We first focus on the problem of tournament schedule control, i.e., designing a tournament that maximizes the winning probability of a target player. While the complexity of the general problem is still unknown, various constraints -- all naturally occurring in practice -- serve to push the problem to one side or the other: easy (polynomial) or hard (NP-complete). We then address the question of how to find a fair tournament. We consider two alternative fairness criteria, adapted from the literature: envy-freeness and order preservation. For each setting, we provide either impossibility results or algorithms (either exact or heuristic) to find such a fair tournament. We show through experiments that our heuristics are both efficient and effective. Finally, using a combination of analytic and experimental tools we investigate the optimality of ordinal solutions for three objective functions: maximizing the predictive power, maximizing the expected value of the winner, and maximizing the revenue of the tournament. The analysis relies on innovative upper bounds that allow us to evaluate the optimality of any seeding, even when the number of possible seedings is extremely large.
