**Tourism and Hospitality Development Between China and EU** Guojun Zeng,2014-10-16 Tourism and hospitality industry is facing a substantial amount of opportunities and challenges due to the globalization. The Third International Conference on Tourism and Hospitality between China and Spain (ICTCHS) provides a unique global forum for academics, thought leaders and key industry practitioners from diverse backgrounds and interests to meet, discuss and debate critical issues that will affect the future direction of tourism and hospitality research and practice.

**Technologies of Labour and the Politics of Contradiction** Paško Bilić,Jaka Primorac,Bjarki Valtýsson,2018-05-07 This book is situated in the nexus between technology, labour and politics. It focuses on contradictions as heuristic devices that uncover struggles, frictions and ambiguities of digitalization in work and labour environments. Topics include contradictions in automation, internet platforms, digital practices, creative industries, communication industries, human interaction, democratic participation and regulation. Three cross-cutting themes can be identified within the diverse chapters represented in the book. First, many authors argue that labour and economic valorisation occur outside of the traditional concept of working space and time. Second, digital technology is not fixed under capital. It is malleable and mouldable. Third, many political tensions are occurring without organized awareness or dissent. The book will, therefore, be of interest to researchers and students in the fields of sociology of work, media studies, cultural studies, gender studies, science and technology studies and Critical Theory as well as to trade-unionists and policy makers.

Non-state Threats and Future Wars Robert J. Bunker,2012-11-12 The intent behind this book was to bring together a team of defence and national security scholars and real-world military and law enforcement operators to focus on the topic of Non-State Threats and Future Wars. The book is divided into four main sections: The first concerns theory. The second section concerns non-state threats and case studies, providing an overview of non-state threats ranging from organized crime networks to cartels, gangs and warlords. The third section is based on counter-OPFOR (opposing force) strategies which detail advanced concepts, urban battlespace environmental perceptions, weaponry, intelligence preparation, networked force structure and C4I. The fourth and final section contains an archival

document from the late 1987 period concerning early Fourth Epoch War theory, and never before published interviews with Chechen commanders and officers who participated in combat operations against Russian forces in the 1994-96 war.

*Insurgents, Terrorists, and Militias* Richard H. Shultz, Andrea J. Dew, 2009 By focusing on four specific hotbeds of instability-Somalia, Chechnya, Afghanistan, and Iraq-Richard H. Shultz Jr. and Andrea J. Dew carefully analyze tribal culture and clan associations, examine why traditional or tribal warriors fight, identify how these groups recruit, and where they find sanctuary, and dissect the reasoning behind their strategy. Their new introduction evaluates recent developments in Iraq and Afghanistan, the growing prevalence of Shultz and Dew's conception of irregular warfare, and the Obama Defense Department's approach to fighting insurgents, terrorists, and militias. War in the post-Cold War era cannot be waged through traditional Western methods of combat, especially when friendly states and outside organizations like al-Qaeda serve as powerful allies to the enemy. Bridging two centuries and several continents, Shultz and Dew recommend how conventional militaries can defeat these irregular yet highly effective organizations.

Terrorist Recognition Handbook Malcolm W. Nance, 2008-04-14 Effective counterterrorism requires a non-prejudicial understanding of terrorist motives and methods. Security professionals need to identify who terrorists might be, recognize pre-incident indicators of terrorist activity, and competently analyze intelligence information. Unfortunately, most terrorist education comes in short, sketchy briefings,

*Solar Ultraviolet Radiation* Christos S. Zerefos, Alkiviadis F. Bais, 2013-06-29 Following the rapid developments in the UV-B measurement techniques and the rapidly growing research in the field in the late 80's and early 90's, we organized a large gathering of distinguished experts in a NATO Advanced Study Institute, held in Halkidiki, Greece on October, 2-11. 1995. The Institute was organized so as to include state of the art lectures on most aspects of solar ultraviolet radiation and its effects. This was achieved by extended lectures and discussions given in five sessions by 27 lecturers and a demonstration of field measurements and calibration techniques at the end of the Institute. The ASI began with the sun and fundamentals on solar radiative emissions and their variability in time and continued with the interaction of solar Ultraviolet with the atmosphere through the complex scattering processes and photochemical reactions involved. Particular emphasis was given to changes in atmospheric composition imposed by different manifestations of the solar activity cycle. as well as on the modelling of radiative transfer through the atmosphere and the ocean under variable environmental conditions. Overviews on the ozone issue. its monitoring and variability were extensively discussed with emphasis on the observed acceleration of ozone decline in the early 90's. This acceleration had as a consequence, significant increases in UV-B radiation observed at a few world-wide distributed stations.
