Measurement of Sound Levels Associated with Aircraft, Highway and Railroad Traffic ,1947 Highway Traffic Noise Analysis and Abatement United States. Federal Highway Administration. Office of Environment and Planning. Noise and Air Quality Branch,1995 Highway Traffic Noise ,1980 **Sound, Media, Ecology** Milena Droumeva,Randolph Jordan,2019-06-27 This volume reads the global urban environment through mediated sonic practices to put a contemporary spin on acoustic ecology's investigations at the intersection of space, cultures, technology, and the senses. Acoustic ecology is an interdisciplinary framework from the 1970s for documenting, analyzing, and transforming sonic environments: an early model of the cross-boundary thinking and multi-modal practices now common across the digital humanities. With the recent emergence of sound studies and the expansion of "ecological" thinking, there is an increased urgency to re-discover and contemporize the acoustic ecology tradition. This book serves as a comprehensive investigation into the ways in which current scholars working with sound are re-inventing acoustic ecology across diverse fields, drawing on acoustic ecology's focus on sensory experience, place, and applied research, as well as attendance to mediatized practices in sounded space. From sounding out the Anthropocene, to rethinking our auditory media landscapes, to exploring citizenship and community, this volume brings the original acoustic ecology problem set into the contemporary landscape of sound studies.
