The Train and the Telegraph Benjamin Sidney Michael

Schwantes, 2019-08-06 A challenge to the long-held notion of close ties between the railroad and telegraph industries of the nineteenth century. To many people in the nineteenth century, the railroad and the telegraph were powerful, transformative forces, ones that seemed to work closely together to shape the economy, society, and politics of the United States. However, the perception—both popular and scholarly—of the intrinsic connections between these two institutions

has largely obscured a far more complex and contested relationship, one that created profound divisions between entrepreneurial telegraph promoters and warier railroad managers. In *The Train and the Telegraph*, Benjamin Sidney Michael Schwantes argues that uncertainty, mutual suspicion, and cautious experimentation more aptly describe how railroad officials and telegraph entrepreneurs hesitantly established a business and technical relationship. The two industries, Schwantes reveals, were drawn together gradually through external factors such as war, state and federal safety regulations, and financial necessity, rather than because of any perception that the two industries were naturally related or beneficial to each other. Complicating the existing scholarship by demonstrating that the railroad and telegraph in the United States were uneasy partners at best—and more often outright antagonists—throughout the nineteenth and early twentieth centuries, *The Train and the Telegraph* will appeal to scholars of communication, transportation, and American business history and political economy, as well as to enthusiasts of the nineteenth-century American railroad industry.

Radom Regional Railway Tomasz Gęsiak, The outline of the Radom Regional Railway was created in response to the question whether the railway in Radom could be used as an urban railway. Ultimately, it turned out that its potential was much wider than just the city area, encompassing existing regional connections. That is why the RRR Concept was created, which assumes the development of regional connections with the center of the region, i.e. Radom. The publication is divided into seven parts so that the reader can better understand the railway infrastructure in Radom. The first three chapters contain information collected by the author as starting material for further analyzes and assumptions. Chapter four presents current solutions used in suburban railways around the world, including in Poland, especially in larger provincial centers. Chapters five and seven present the main assumptions of the Radom Commuter Railway as a project ready for implementation. The fifth part focuses on the role of the city of Radom as the natural center of the region.

Communication Technologies for Vehicles Thomas Strang, Andreas Festag, Alexey Vinel, Rashid Mehmood, Cristina Rico Garcia, Matthias Röckl, 2011-03-23 This book constitutes the joint refereed proceedings of the Third International Workshop on Communication Technologies for Vehicles, Nets4Cars 2011 and the First International Workshop on Communication Technologies for Vehicles in the Railway Transportation, Nets4Trains 2011, held in Oberpfaffenhofen, Germany, in March 2011. The 7 full papers of the rail track and 12 full papers of the road track presented together with a keynote were carefully reviewed and selected from 13 and 21 submissions respectively. They provide an overview over the latest technologies and research in the field of intra- and inter-vehicle communication and present original research results in areas relating to communication protocols and standards, mobility and traffic models, experimental and field operational testing, and performance analysis.

Catalog of the Gerald K. Stone Collection of Judaica Gerald K. Stone, 2021-01-05 Gerald K. Stone has collected books about Canadian Jewry since the early 1980s. This volume is a descriptive catalog of his Judaica collection, comprising nearly 6,000 paper or electronic documentary resources in English, French, Yiddish, and Hebrew. Logically organized, indexed, and selectively annotated, the catalog is broad in scope, covering Jewish Canadian history, biography, religion, literature, the Holocaust, antisemitism, Israel and the Middle East, and more. An introduction by Richard Menkis discusses the significance of

the Catalog and collecting for the study of the Jewish experience in Canada. An informative bibliographical resource, this book will be of interest to scholars and students of Canadian and North American Jewish studies.

Field and Service Robotics Shin'ichi Yuta,Hajime Asama,Sebastian Thrun,Erwin Prassler,Takashi Tsubouchi,2006-07-11 This unique collection is the post-conference proceedings of the 4th International Conference on Field and Service Robotics (FSR). This book has authoritative contributors and presents current developments and new directions in field and service robotics. The book represents a cross-section of the current state of robotics research from one particular aspect: field and service applications, and how they reflect on the theoretical basis of subsequent developments.

Protecting the American Homeland Michael E. O'Hanlon,Peter R. Orszag,Ivo H. Daalder,I. M. Destler,David L. Gunter,James M. Lindsay,Robert E. Litan,James B. Steinberg,2011-10-25 A good deal has been done to improve the safety of Americans on their own soil since the attacks of September 11, 2001. Yet there have been numerous setbacks. The Bush administration and Congress wasted at least six months in 2002 due to partisan disagreement over a new budget for homeland security, and as one consequence, resources were slow to reach first responders across the country. Most improvements in homeland security have focused on refighting the last war—improving defenses against attacks similar to those the country has already suffered. Not enough has been done to anticipate possible new kinds of terrorist actions. Policymakers have also focused too much attention on the creation of a department of homeland security—rather than identifying and addressing the kinds of threats to which the country remains vulnerable. While the creation of a

cabinet-level agency focusing on homeland security may have merit, the authors of this study argue that the department will not, in and of itself, make Americans safer. To the contrary, the complexity of merging so many disparate agencies threatens to distract Congress and the administration from other, more urgent security efforts. This second edition of *Protecting the American Homeland* urges policymakers to focus on filling key gaps that remain in the current homeland security effort: identifying better protection for private infrastructure; using information technology to share intelligence and more effectively connect the dots that could hold hints to possible terrorist tactics; expanding the capacities of the Coast Guard and Customs Service, as well as airline transportation security; dealing with the possible threat of surface-to-air missiles to airliners; and encouraging better coordination among intelligence agencies. While acknowledging the impossibility of preventing every possible type of terrorist violence, the authors recommend a more systematic approach to homeland security that focuses on preventing attacks that can cause large numbers of casualties, massive economic or societal disruption, or severe political harm to the nation.
