The Labour Ward Handbook, second edition Leroy Edozien,2010-03-24 The Labour Ward Handbook, second edition, is a succinct manual that provides detailed clinical practice guidelines for the care of women in labour. Dealing more with the practice than the theory of labour ward management, this book is designed to be a ready guide for use in the delivery suite by the busy clinician. The format has been specifically designed to make retrieval of information quick and simple. Relevant pages can be reproduced and filed in the patient's case-notes thus serving not only as an aide memoire and checklist, but also as a supplementary record of the care provided. The Labour Ward Handbook is essential reading for practising obstetricians of all grades, midwives, labour ward managers, and all other medical professionals who are interested in the conduct of labour and risk management in the delivery suite. Key Features Checklists and bullet points for quick and straightforward guidance 'Further reading' at the end of each section Compliant with RCOG and NICE guidelines Builds on a very popular first edition If you work on the labour ward, this is the book to have with you at all times.

Metropolitan Governance Vinita Yadav,2014 Metropolitan Governance is an indispensable book for understanding the governance of metropolitan cities. The book covers an insight into the governance in Ahmedabad and Hyderabad. The participatory metropolitan governance is also of interest to the students of sociology, social work and geography. The students of public administration would find it useful to study the decentralisation of powers from centre to state to local level government. For academicians engaged in service delivery in metropolitan areas, it brings in clarity regarding role of varied stakeholders in governance.

Ward-based Critical Care: a guide for health professionals Ann M Price,Dr Sally A Smith,Dr Alistair Challiner,2016-01-01 Like the original Ward-based Critical Care, this second edition aims to guide practitioners in the initial management of critically ill adult patients within the ward setting. It should be of value to a wide range of healthcare professionals, including junior doctors, nurses, physiotherapists and students. It will also be relevant to practitioners who are moving into any setting that cares for acutely ill patients. This volume has been slightly reorganised since the first edition to ensure that practical aspects are incorporated within the relevant sections. The book is still structured around the ABCDE approach to assessing and managing patients, as this is promoted in critical care and resuscitation care training. The focus on practical examples and ‘hot tips’ to aid memory of key points continues. All the chapters have been updated with the most recent guidance, as available at the time of writing. This has meant that some chapters have required major revisions, while others have remained relatively unchanged. Some new chapters have been included, such as the ones on anaphylactic shock, patient safety, dealing with pregnant women in the ward setting, and massive blood transfusion. In addition, each section now starts with a chapter giving an overview of the A-E approach in order to provide more detail about assessing and managing those aspects of patient care. This informative book contains many useful features such as clinical scenarios, hot tips and practical skills, and the text is richly illustrated and cross-referenced throughout.
