In the Trenches II Richard Phillips, Brooklyn Williams, 2015-01-27 Remember, tomorrow is always a new day, and victory, in many cases, is there for the taking. And, in the midst of all of this, may HOPE be your constant companion! By telling my story, it is hoped that this book will tell people about my war, and help people who are fighting obesity, glucose control, High Blood Pressure or, perhaps something else. This may help them understand that they are not alone, and that there is hope, that tomorrow can be new day, and that victory, in many cases, is there for the taking. If there is a central theme to this story, it is hope! We want to take this opportunity to thank the many people who have encouraged us along the way. The power of people is simply amazing, and we are in their debt. During the early part of this journey, the encouragement played a large role in staying the course and building resolve. The temptation to go back to old habits was very strong. Our thanks go to these people, some of whom are recent advocates. Blessings to all of you! Seeking the First Farmers in Western Sjælland, Denmark T. Douglas Price, 2022-06-16 This volume summarizes 30 years of fieldwork in Denmark, some of the evidence for the spread of agriculture and the Neolithic into Scandinavia and some opinions about the origins of agriculture. It is intended to be both academic and personal and to describe the actual process of research, because most projects involve elements of both. There is an introduction to each chapter that relates some of the more personal aspects of the research and the bulk of each chapter will be a more technical scientific

report on our investigations. Each chapter will deal with one of the components of the project - survey, testing and excavations. We excavated eight sites from the Late Mesolithic and Early Neolithic that are discussed in this volume. The concluding chapter summarizes our research in the area and proffers opinions on a variety of archaeological subjects, with visits to climate change, seasonality and sedentism, hunter-gatherer complexity, aDNA, inequality and the origins and spread of agriculture.
