**Coastal Navigation** Dominique F. Prinnet,2017-01-09 Coastal Navigation for Class and Home Study is based on the notes prepared for students by the author during some 20 years of teaching navigation, initially to private or commercial pilots, and then to sailors and professional mariners. The book is copiously illustrated with graphics which explain chart projections, scales and symbols, and describe lights and other navigation aids. It demystifies the True, Magnetic and Compass Norths as well as problems of time, speed and distances, and explains how to plot courses and take bearings, or draw regular and advanced Lines of Position using the international system of labeling. The book further clarifies the use of vectors to easily determine the impact of a current on the boat speed and direction, and goes on to show how to evaluate tides and currents. The final sections describe the use of GPS and electronic charts, highlighting their limitations. Additional notes and explanations are given in the areas where students traditionally experience difficulties, as well as supplementary examples and exercises. The companion book, Coastal Navigation Exercises, offers all the exercises needed for practice.

B747-400 ISD Training Questionnaire Leonidas Terzis,2016-01-29 This questionnaire is addressed to pilots operating the

B747-400. It is based on the Flight Crew Operations Manual (FCOM) 747-509, and the Flight Crew Training Manual (FCTM) B747-400, both published by Air Atlanta Icelandic. It is not substituting any approved bibliography and it is not covering all topics. It is organized in 26 chapters, in order to be compatible with the bibliography of origin. It is configured under the ISD method, used in the Air Force of many states (i.e. USAF). As such, it serves for studying and better understanding, instead of assessing. In an ISD questionnaire: □ There are no statements about equally True or False. □ It is usually very easy to identify the True answer. Remember that the question serves as an excuse to provide an information, not for assessing knowledge. □ The False answers serve to increase the contrast between True and False, and not to confuse the trainee and increase the level of difficulty. □ Whenever there is a choice of True or False, the answer is always the True. This is to prevent for a False information to be adopted. □ Whenever is asked to “Mark the True statements”, expect almost all statements to be valid. This serves as an excuse to provide information, not for assessing knowledge. Note that due to the bibliography of origin, some company limitations or procedures may be incorporated in the questionnaire.
