Building Web and Mobile ArcGIS Server Applications with JavaScript Eric Pimpler,Mark Lewin,2017-10-24 Master the ArcGIS API for JavaScript to build web and mobile applications using this practical guide. About This Book Develop ArcGIS Server applications with JavaScript, both for traditional web browsers as well as the mobile platform Make your maps informative with intuitive geographic layers, user interface widgets, and more Integrate ArcGIS content into your custom applications and perform analytics with the ArcGIS Online Who This Book Is For If you are a web or mobile application developer, who wants to create GIS applications in your respective platform, this book is ideal for you. You will need Java Script programming experience to get the most out of this book. Although designed as an introductory to intermediate level book, it will also be useful for more advanced developers who are new to the topic of developing applications with ArcGIS Server. What You Will Learn To create an application with the ArcGIS API for JavaScript Build and display a broad range of different geometry types to represent features on the map The best way to leverage a feature layer and display related attribute data The functionality of the wide range of widgets and how to use them effectively Query data to gain new insights into the information it contains Work with tasks to discover and locate features on the map Using the geocoder and associated widgets The ability of the API to provide turn by turn directions and routing capabilities How to use the Geometry Engine and Geometry Service tasks for common geoprocessing operations Integrate content on ArcGIS online and add it to your custom web mapping application In Detail The ArcGIS API for JavaScript enables you to quickly build web and mobile mapping applications that include sophisticated GIS capabilities, yet are easy and intuitive for the user. Aimed at both new and experienced web developers, this practical guide gives you everything you need to get started with the API. After a brief introduction to HTML/CSS/JavaScript, you'll embed maps in a web page, add the tiled, dynamic, and streaming data layers that your users will interact with, and mark up the map with graphics. You will learn how to quickly incorporate a broad range of useful user interface elements and GIS functionality to your application with minimal effort using prebuilt widgets. As the book progresses, you will discover and use the task framework to query layers with spatial and attribute criteria, search for and identify features on the map, geocode addresses, perform network analysis and routing, and add custom geoprocessing operations. Along the way, we cover exciting new features such as the client-side geometry engine, learn how to integrate content from ArcGIS.com, and use your new skills to build mobile web mapping applications. We conclude with a look at version 4 of the ArcGIS API for JavaScript (which is being developed in parallel with version 3.x) and what it means for you as a developer. Style and approach Readers will be taken through a series of exercises that will demonstrate how to efficiently build ArcGIS Server applications for the mobile and web.

Mobile Persuasion Design Aaron Marcus,2015-11-03 Mobile Persuasion Design presents ten conceptual design projects (or 'Machines') for new mobile application's (smartphone or tablet with Web portals) that combine theories of persuasion and information design to change people's behaviour. Areas such as the environment, health, learning and happiness are explored, looking at ways of marrying people's wants and needs to make simple, usable and desirable mobile applications. A user-centred design approach has been used, adopting user experience (UX) methods, in-depth case studies and market analysis to see what a modern user needs from their mobile application. By applying concepts like persuasion theory and information architecture, try to find ways to satisfy these needs and positively change their user habits. In 2011, the Green, Health, and Money Machines won design awards in an international competition hosted by the International Institute for Information Design, Vienna.

Introduction to Information Systems R. Kelly Rainer,Efraim Turban,2008-01-09

WHATS IN IT FOR ME? Information technology lives all around us-in how we communicate, how we do business, how we shop, and how we learn. Smart phones, iPods, PDAs, and wireless devices dominate our lives, and yet it's all too easy for students to take information technology for granted. Rainer and Turban's Introduction to Information Systems, 2nd edition helps make Information Technology come alive in the classroom. This text takes students where IT lives-in today's businesses and in our daily lives while helping students understand how valuable information technology is to their future careers. The new edition provides concise and accessible coverage of core IT topics while connecting these topics to Accounting, Finance, Marketing, Management, Human resources, and Operations, so students can discover how critical IT is to each functional area and every business. Also available with this edition is WileyPLUS - a powerful online tool that provides instructors and students with an integrated suite of teaching and learning resources in one easy-to-use website. The WileyPLUS course for Introduction to Information Systems, 2nd edition includes animated tutorials in Microsoft Office 2007, with iPod content and podcasts of chapter summaries provided by author Kelly Rainer.

Business Automation and Its Effect on the Labor Force Edward Uechi,2022-09-12

Business Automation and Its Effect on the Labor Force informs business managers on new technologies that can make their industries more efficient. This book provides a primer on quantum computing, artificial intelligence, robotics, and sensors. As a business

management book, managers can start planning for the future. The author predicts when the advanced systems would be ready to use. Getting a clearer picture of what is on the horizon, business managers can determine how many workers and machines will be needed. Managers will learn how to calculate the optimal mix of workers and machines. Key Book Highlights Covering labor and technology in agriculture, manufacturing, construction, transportation, hospitality, health care, office administration, and education. A review of the evolution of systems, machines, and devices from the past to the present, and where the latest advancement is headed. A visual timeline showing when new systems and machines would be available for eight industries in the next 25 years. Succinct descriptions of eliminated jobs, retained jobs, and new roles for workers. A simplified method to calculate the costs of operations, allowing business managers to compare human productivity against machine productivity. Labor market information in context of technological innovation for state workforce agencies and local workforce development boards. Lists of occupations with Standard Occupational Classification (SOC) codes for labor economists, workforce development specialists, and job seekers.

Serviceology for Services Masaaki Mochimaru, Kanji Ueda, Takeshi Takenaka, 2014-05-16
Services are key activities in the globalization of the economy and also underlie the quality of life of local residents. The advanced work presented in this book was selected from the proceedings of the First International Conference on Serviceology (ICServ2013), held October 16-18, 2013 in Tokyo. This book provides a useful overall guide to the state of the art in theory and practice of services for researchers in various fields, including engineering, marketing, economics, and others. This work also facilitates the scientific systematization of services and promotes technological developments for solutions of industrial issues.
